Trinity, TX 75862 | (707) 234-8148 | mydream.tiger30@gmail.com
[linkedin.com/in/james-cody-smith](https://www.linkedin.com/in/james-cody-smith)

Senior Software Engineer

Senior Backend Engineer with over 10 years of experience in building secure, scalable, and high-performance backend systems. Skilled in Python and frameworks like Flask, FastAPI, and Django, along with deep expertise in DevOps, microservices architecture, and cloud technologies (AWS, GCP). Proven track record of developing secure mobile backend services for iOS and Android clients, ensuring privacy and security at scale. Passionate about automation, efficiency, and coding best practices. Highly experienced in API design, database management, BI (Business Intelligence), and cloud technologies.

TECHNICAL SKILLS

Languages & Frameworks: Python, Flask, FastAPI, Django, Kotlin, Node.js, Express, .NET, JavaScript, TypeScript, HTML5, CSS3

Databases: PostgreSQL, MySQL, DynamoDB, Couchbase, Redis, NoSQL, SQL, ORM

DevOps & Cloud: AWS, GCP, Docker, Kubernetes, Terraform, Jenkins, CI/CD, Git, CloudTrail, Ansible

Tools: GitHub, Jira, ServiceNow, Firebase, SQS, Pub/Sub, Postman

Concepts: Microservices Architecture, Asynchronous Programming (asyncio, aiohttp), API Management, Event-Driven Architecture, Data Transcoding, Workflow Automation

Security & Encryption: Cryptography, Key Management, Identity Management (OAuth, SSO), IAM

Other: Business Intelligence (BI), Analytics, RESTful APIs, Message Queues, Real-Time Communication, Networking, Rust, Technical Documentation, Agile Development, Knowledge Sharing

API Management: GraphQL, RESTful APIs

CORE COMPETENCIES

intuitive, communication, best practice, scheduling, creativity, mentorship

PROFESSIONAL EXPERIENCE

EMERGE, Denver, CO | 01/2024-04/2025

Senior Software Engineer

- Spearheaded the modernization of a legacy video editing platform using microservices and AWS technologies, enhancing system scalability and security. Reduced platform downtime by 40%.
- Automated deployment pipelines with Terraform, Jenkins, and Docker, leading to a 70% faster build time and improved deployment consistency.
- Integrated real-time analytics into the platform using AWS Lambda and PostgreSQL, increasing user engagement by 30%.
- Contributed to technical documentation, enabling better collaboration across teams and improving knowledge sharing.

PHENOTYPE, New York, NY | 03/2020-12/2023

Senior Backend Engineer

- Developed secure backend services in Python for mobile applications in crypto trading, ensuring 100% data integrity and seamless transaction processing.
- Optimized API integration with third-party services, achieving a 60% reduction in response times for platform transactions.
- Worked closely with product teams to design features that adhered to best practices in encryption, authentication, and data security.
- Implemented automated tests, improving system reliability by 25%.

ROOBET, Curacao, CW | 03/2018-02/2020

Full Stack Engineer

- Led backend development for a scalable eCommerce platform, improving performance and security by integrating PostgreSQL and Redis, resulting in 25% faster load times.
- Built and maintained API endpoints for iOS/Android mobile apps, increasing user interaction and boosting sales by 20%.
- Focused on CI/CD practices, automating deployment with GitLab CI and reducing deployment failures by 50%.
- Integrated GraphQL for efficient data retrieval and enhanced UI performance.

VISA, Austin, TX | 04/2015-02/2018

Software Engineer Intern

- Assisted in optimizing cloud-based applications using AWS and Docker, improving performance and data security.
- Supported backend teams by designing RESTful APIs and integrating payment gateways, ensuring compliance with industry-standard encryption and security protocols.
- Developed technical documentation that improved team collaboration and project management.

EDUCATION

Bachelor of Computer Science | Texas Wesleyan University

CERTIFICATION
