RESUME

PERSONAL STATEMENT

A Senior Governance, Risk and Compliance professional with innovative, proactive and adaptive qualities. An International Commercial Law graduate, with experience across Oil & Gas, Financial, Legal, Telecommunications, Technology and Construction. Adept at stakeholder management at all levels with passion, energy, a 'Can Do' attitude and is a quick study.

KEY STRENGTHS

- Knowledgeable of International Standards, Risk Management Processes & EU directives and their practical application e.g. ISO 31000, ISO 27001, ISO 27002, the GDPR, DORA, HIPAA, PCI DSS, AI Act, NIST2 etc.
- Expertise in setting up and implementing Governance, Risk & Compliance functions and systems in medium to large scale organisations
- Experienced in Data Management: Data Security, Data Governance and Data Protection
- Fully proficient in managing Projects and Risk Management for medium to large scale projects and enterprises
- Experienced in Client and Contractor interface management
- Knowledgeable of legal and compliance implications of conducting business and contract execution across borders
- Experienced in UK & International contracting frameworks in diverse operational environments
- Proficient in Contract drafting, negotiation, tendering and general contract management

EMPLOYMENT HISTORY

FEB 2025 - JUL 2025

BOOKING.COM

GOVERNANCE, RISK & COMPLIANCE CONSULTANT & PROJECT MANAGER, AMSTERDAM

Requested by the Head of Risk Governance of this Digital Travel Company to work on the development and implementation of the IT risk processes within TRAC (Technology, Risk Assurance & Compliance) supporting different departments to ensure processes and controls are aligned with Booking.com's cyber security business strategy

Process and Content Management

- Supported risk owners in designing controls that mitigate relevant risks through to implementation and monitoring
- Provided advice on control design that is both sustainable and right sized (i.e. a simple solution for a simple problem, no overengineering)
- Coordinated new requests from the business functions and units for support with risk governance

Stakeholder Engagement

- Worked closely with the TRAC teams Internal Controls, Risk Governance and Risk Management teams on risk-based programs/projects focusing on IT Risk revamp, Risk & Compliance Management designing and Business Unit mapping of risks
- Worked with Capability Leads (CALs) on risk reviews, compliance assessments and control analyses

Training and Awareness

- Assisted in the development and leading of regular training/awareness programs to train and educate risk owners on risk governance

Software Management

- Worked on ServiceNow (SNOW) to perform risk mapping of all Safety, Security & Fraud (SS&F) risks with their associated issues (Policy Exceptions, Security Exceptions, Risk Acceptances, Audit, Observations & Findings) that were registered in disparate systems (Google Sheets, JIRA, Confluence etc.)
- Worked with the Business Information Security Officers (BISO) to map risks to relevant business units

DEC 2023 - JUN 2024

RANDSTAD B.V.

SECURITY CONSULTANT & PROJECT MANAGER, DIEMEN

Requested by the Global Chief Information Security Officer of this Human Resource Management & Recruitment Company to lead and implement the Data Security Framework project and the Data Loss Prevention (DLP) Project at the Global and operating market levels

JOAN IROMANTU, LLB, LL.M, BL
Senior Risk Manager, Governance & Compliance SME

RESUME

Process and Content Management

- Developed the framework for Data Security that combines Information Security and Data Protection into a comprehensive outline of all concepts and activities essential to safeguarding Randstad's data especially in view of the impending AI Act
- Developed the supporting documents for the Data Security Framework including the RA(S)CI Chart, Data Security Framework Policy document, the Implementation Plan and the Control Framework (including the Key Information Security Controls) ensuring fitness for purpose to achieve ISO Certification
- Developed the Data Loss Prevention Project Plan for the management of the DLP project according to the Randstad PMO methodology utilising SPM (Project Management module of ServiceNow/SNOW)

Stakeholder Engagement

- Supported the Global CISO, Randstad and their team of Regional CISO
- Worked with Regional CISOs North America, Germany and Italy as Project Lead for the management of the DLP Project
- Supported the establishment of SLAs with our internal Google Workspace (GWS) and Global Information Services (GIS) teams for the execution of the DLP Project
- Collaborated with our Cloud Connector provider (Zscaler) which included: Technology Designers, Data Protection Expert and Application Architect on the Zscaler DLP capabilities tool implementation
- Worked with Data Protection, GRC and Data Strategy teams in establishing the Data Security Framework
- Worked with Randstad's PMO in the execution of the Data Security and DLP projects in accordance with Randstad's project management methodology as well as on the improvement of project management processes

Training and Awareness

- Developed the Implementation Plan for the Data Security Framework
- Wrote the awareness text for the Connect Information Security site pertaining Data Security and DLP

Reporting

- Developed reporting structure within the Data Security Framework for stakeholders to gain insights
- Produced reports to Management showing progress of the Data Security and DLP project
- Performed monthly reconciliation of cost, time, resources against the project's budget to ensure accurate projections of expenditure

Software Management

- Setup SPM for the management of the Data Security Framework and DLP projects
- Worked out the consolidation of all Data Security risk assessments: CIA, BIA, PIA, DPIA, Security-by-Design, LRA, Data Ethics & AI etc into a singular tool of OneTrust or SNOW being kicked-off from the conduit assessment of the PSQ (Privacy & Security Quickscan)

MAY 2022 - JUN 2023

ASML B.V.

BUSINESS PROCESS MANAGER, VELDHOVEN

Requested by the RBA Centre of Excellence Manager of this Lithograph Technology Company to lead and implement the development of select business processes and concepts including Policy Exception Management (alongside its migration to the ServiceNow (SNOW) tool), Business Application Ownership process and to develop the framework for Security engagement in Mergers & Acquisitions

Process Management

- Developed the framework for activating RBA Security engagement at the commencement and through the lifecycle of M&A projects
- Developed the Policy Exception Management process documentation and engagement structure for stakeholders
- Developed the definition of the Business Application Ownership for the implementation of the role amongst senior business stakeholders whose proprietorship over individual applications required structure

Stakeholder Engagement

- Supported CFO, RBA (Risk & Business Assurance) and Central Security Management Team and RBA Centre of Excellence
- Developed the way of working and SLA for the Security Office, Sector Security Risk Managers, the Investment Committee and the Mergers & Acquisition Projects

- Collaborated with our Implementation Partner (EY) which included: Technology Designers, User Experience Expert and Application Architect on the SNOW tool implementation for Policy Exception Management
- Worked with RBA Risk Portal team (IRM) for implementation of Policy Exception Management into ServiceNow tool
- Worked with Internal Controls, Compliance and Policy Management Teams to develop the "To Be" Policy Exception Management Process ServiceNow

Training and Awareness

- Developed training for the Security subject matter experts and their involvement in Mergers & Acquisition projects
- Trained new joiners to the Policy Exception Management in the Policy Exception Management process
- Developed training for identified Business Application Owners to obtain skills, knowledge and awareness of available support to conduct their tasks

Reporting

- Developed reporting structure within SNOW for stakeholders to manage M&A insights
- Produced BAO reports to Management showing progress of their onboarding
- Developed reporting structure and cadence for Policy Exception Management in SNOW

Software Management

- Setup BitSight for the earlier review and security due diligence of M&A target companies
- Setup SNOW for the risk & security assessment of M&A target companies
- Liaised with EY as implementation partner for the SNOW transition of the Policy Exception Management process
- Participated in workshops for the setup of the SNOW

JUN 2021- MAY 2022

ASML B.V.

GOVERNANCE, RISK & COMPLIANCE INTAKE MANAGER, VELDHOVEN

Requested by the RBA Central Security Manager of this Lithograph Technology Company to lead and implement an Enterprise-wide Governance, Risk Management and Compliance (GRC) Intake Program and oversee its migration to the ServiceNow (SNOW) tool

Process Management

- Developed, improved and implemented the GRC Intake (which includes Business Impact Analysis and Legal & Regulatory Assessment) process across all business sectors and regions of ASML
- Wrote the GRC Intake Process & Procedure, Framework and User Manual
- Migrated the process from SharePoint based tooling to SNOW implementation to digitise the GRC Intake assessments
- Administered the GRC Intake database (SharePoint and SNOW)
- Developed the E2E processing of GRC Intake assessments

Stakeholder Engagement

- Supported CFO, RBA (Risk & Business Assurance) and Central Security Management Team
- Set-up the Governance, Risk & Compliance (GRC) Stakeholder Community Forum for oversight
- Supported RBA with internal customer engagement providing timely responses to customer GRC Intake requests
- Developed the way of working and SLA for the Privacy Office, Sector Risk Managers, Procurement, Compliance Domain Experts and Internal Controls in the E2E validations of GRC Intake assessments
- Collaborated with our Implementation Partner (EY) which included: Technology Designers, User Experience Expert and Application Architect on the SNOW tool implementation
- Worked with the RBA Transformational Strategy team in setting up GRC Intake as an independent office within the RBA business
- Worked with RBA Risk Portal team (IRM) for implementation of GRC Intake into ServiceNow tool

Training and GRC Intake Awareness

- Developed and conducted GRC Intake training & knowledge sharing sessions including the use of tools (GRC Intake form, SharePoint, OneTrust) and resources (GRC Intake Process & Procedure, Framework, User Manual, related Information Security, Privacy and Compliance Policies e.g. Export Controls, IP etc.) amongst our stakeholders

JOAN IROMANTU, LLB, LLM, BL
Senior Risk Manager, Governance & Compliance SME
+44 (0) 7872 049 104

Joan_Iromantu@yahoo.com

LinkedIn: <https://www.linkedin.com/in/joan-iromantu-97083313/>

RESUME

- Trained new joiners to the GRC Intake team in performing and processing GRC Intakes

Reporting

- Produced regular GRC Intake progress reports for RBA Management (weekly trends and monthly reporting)

Governance, Risk, Compliance & GDPR

- Identified the need for and developed the centrally managed GRC Intake Process & Procedure applied across ASML
- Developed the GRC Intake Assessment template collaborating with key stakeholders in updating each version to promote inclusivity
- Worked with various teams (Compliance, Internal Controls, Security Risk Management) to outline the potential exposures and risks to ASML per project/initiative and supported their implementation of mitigation, requirements and controls

Software Management

- Setup and consolidated the GRC Intake tools (SharePoint, Kanban) and connection to other systems (e.g. OneTrust, IAM etc.) in preparation for transition to the SNOW platform as the integrated tool for all GRC assessments
- Liaised with EY as implementation partner for the SNOW transition
- Participated in workshops for the setup of the SNOW

Nov 2020- JUNE 2021

BACKBASE B.V.

RISK & COMPLIANCE OFFICER, AMSTERDAM

Requested by CFO of this FinTech (Financial Technology) Company to lead and implement an Enterprise-wide Governance, Risk Management and Compliance Program making the function more robust and inclusive.

Process Management

- Created and implemented the Enterprise Risk Management, Risk 2.0, Framework
- Created and implemented the risk-based approach to Supplier Assurance and updated our Supplier Assurance process and Policy
- Onboarded the GRC Tool, OneTrust for use to track compliance reviews including created the 3rd Party due diligence questionnaire to align with the risk-based approach to Supplier Assurance.
- Administered the RFP.IO database on behalf of function to ensure Q&A information needed to support Proposal process is readily available to the Sales & Marketing, Customer Success and Strategy functions
- Prepared organisation for SOC2 compliance following decision to transition to SaaS business model
- Project Managed the Reseller Programme ensuring timely due diligence of potential suppliers whose services Backbase could resell as part of their product

Stakeholder Engagement

- Supported CFO and Management Team (C-Suite)
- Set-up the Governance, Risk & Compliance (GRC) Committee for oversight
- Supported Sales & Marketing and Customer Success with customer engagement providing timely responses to Customer Legal & Regulatory compliance requests
- Supported E2E Strategy team who identify opportunities for the Reseller Programme
- Liaised with Technology Designers, ICT and Application Architect to conduct GDPR review on work product to ensure privacy-by-design
- Worked with Strategy team in setting up nearshore support centres (Hydrabad, Warsaw) and performing timely due diligence as part of Nearshore Partner projects

Training and Data Privacy Culture Awareness

- Developed and conducted GRC training & knowledge sharing sessions including the use of tools (OneTrust, RFP.IO) and resources (Framework, Policies, templates)
- Conducted Legal & Regulatory Assessments on new acquisitions and partners determining current culture and potentials for alignment

Reporting

- Produced regular progress reports for Management Team

Compliance & GDPR

- Identified the need for and developed the centrally managed GDPR based Data Privacy Framework applied across enterprise, product and projects

- Wrote key compliance policies, Employee Privacy Policy, Subject Access Request Policy, Risk Management Policy, Code of Conduct
- Developed Assessment templates e.g. DPIA, Information Security, Compliance for conducting 3rd party due diligence, Privacy Impact Assessment etc. on 3rd Parties, IT Solutions and services
- Worked with various teams (Legal, Customer Success, Sales & Marketing, ICT) to outline the potential privacy exposures and reputational risks to the company and supported their implementation of remediation

Software Management

- Setup the OneTrust tool as the GRC system in which Privacy Impact Assessments, Supplier Assurance, Legal & Regulatory Compliance, ISO & SOC2 Compliance and Internal Audit may be performed, assessed and evidenced
- Oversaw connection and data migration between OneTrust and ServiceNow

AUG 2020- OCT 2020 CARTUP AI B.V. (ENTREPRENEURSHIP VENTURE)

CONTRACTS, GDPR, LEGAL & REGULATORY COMPLIANCE, DEN HAAG

Requested by CEO of this AI/Machine Learning E-SAAS (Software as a Service) Technology Start-Up to provide drafting and negotiation services, GDPR Compliance and Risk Management consultancy services.

Legal Instruments

- Drafted and negotiated the Master SAAS Services Agreement and the Data Processing Agreement between CartUp AI and client (Intertoys B.V.). Drafted the Terms of Service
- Drafted Letter of Intent with potential new client.

GDPR Compliance & Risk Management

- Performed the GDPR Compliance review to ensure privacy by design with tech designer and Solution Architect
- Outlined the potential privacy exposures and reputational risks and worked with team to implement mitigation and remediation
- Created the official Data Privacy documentation including Data Privacy Manual and Privacy Policy

APR 2019- APR 2020 SHELL INTERNATIONAL B.V.

LEAD GDPR & LR2 SME, GLOBAL FUNCTIONS LMA & LR2 REMEDIATION PROJECT, DEN HAAG

Promoted to Lead Subject Matter Expert (SME) of LoD1 team to support the Project Director with developing and implementing the framework and methodology for getting IT Solutions/applications compliant with the General Data Protection Regulation as well as determining compliance with other relevant Laws and Regulations (LR2)

Process Management

- Authored the LR2 and GDPR playbook for LoD1 which outlined the framework and methodology for the remediation of GDPR/LR2 findings raised by LoD2 concerning deficiencies with artefacts (evidentiary documents of compliance) and ITGC (IT General Controls) against IT Solutions used by GF
- Ensured LoD1 analysts had content understanding and practical application of the playbook and their relationship with LoD2, application owners/stakeholders, Global Functions and other businesses
- Supported scope determination and work apportionment within the team

Stakeholder Engagement and Interface Management

- Obtained buy-in of application stakeholders (business application owners, OLM, ITM etc.), key departments (Data Privacy, Contracting & Procurement, IRM) and consultants (PWC) to the remediation process
- Conducted alignment sessions with PWC (who provided LOD1 nearshore analysts) ensuring understanding of the practical application of Shell's Data Protection approach

Training and Data Privacy Culture Awareness

- Developed and conducted training & knowledge sharing sessions on the remediation process, the use of tools (Collective, SOFY, SNOW) and resources (SECO Manual, templates, stakeholder engagement) for the LOD1 nearshore analysts ensuring that over 10 people were equipped to meet their deliverables
- Conducted Legal & Regulatory Assessments on new acquisitions determining current culture and potentials for alignment

Reporting

- Produced regular progress reports for project management and stakeholders

Software Management

- Using the Collective and SOFY tools, built team's knowledge of Shell's IRM and Risk Management capabilities and highlighted changes/updates to the Legal & Regulatory Assessment following the enactment of the GDPR

OCT 2017-MAR 2019

SHELL INTERNATIONAL B.V.

LEGAL IRM CONSULTANT, GLOBAL FUNCTIONS GDPR REMEDIATION PROJECT, DEN HAAG

Supported the Project Director with developing and implementing the framework and methodology for getting IT Solutions/applications that process personal data compliant with the General Data Protection Regulation

Process Management

- Developed the gap analysis framework and methodology in line with ISO 27001:2013 for the assessment of IT Solutions, used by GF, to determine their compliance with Shell's updated Data Privacy Manual (DPM) and the GDPR
- Supported scope determination and work apportionment amongst the teams and developed the self-assignment procedure for consultants
- Developed the remediation framework and methodology for the remediation workstream ensuring that over 300 applications that process personal data had a clear process for resolving points of non-compliance
- Supported SAMCo with MiFIDII compliance by ensuring applications such as Bloomberg were remediated

Stakeholder Engagement and Interface Management

- Obtained buy-in of application stakeholders (business application owners, OLM, ITM etc.), key departments (Data Privacy, Contracting & Procurement, IRM) to the analysis and remediation process. Stood as the project's GDPR remediation SME
- Successfully facilitated the analysis of several IT solutions and the remediation of key compliance findings by developing documentation, supporting the implementation of controls, conducting Legal & Regulatory Assessments and maintained transparent and trackable progress for the benefit of application stakeholders
- Conducted presentations to the application stakeholders outlining the project's purpose & strategy as well as the practical application of Shell's Data Protection approach

Training and Data Privacy Culture Awareness

- Developed and conducted training & knowledge sharing sessions on the gap analysis & remediation process, the use of tools (questionnaire, Collective) and resources (DPM, template, engaging stakeholders) for the Consultants ensuring that over 15 people were equipped to meet their deliverables
- Conducted Privacy Impact assessments on new acquisitions determining current culture and potentials for alignment

Reporting

- Produced regular progress reports for application stakeholders

Software Management

- Conducted Legal & Regulatory Assessments, Privacy Impact Assessments, Business Impact Assessments, Risk Profile Assessments etc. using Collective and SOFY tools

JUL 2014-FEB 2017

WORLEYPARSONS EUROPE LIMITED

PROJECT RISK MANAGER, TRANS ANATOLIAN GAS PIPELINE PROJECT, ANKARA, LONDON

Supported the Project Director with developing and implementing the risk management process for this \$15B project

Process Management

- Developed the Risk Management Framework, Risk Process and associated documents (Risk Management Plan) that aligned with TANAP strategy requirements and ISO 31000:2009 guidelines
- Implemented the risk management process, facilitated the identification and assessment of threats/opportunities (workshops, schedule & cost risk analysis) and ensured the mitigation or elimination of risks while providing senior management with a clear risk profile and priorities of the business
- Developed IRM framework with IT ensuring compliance with ISO 27001:2013 security techniques & requirements
- Managed team of 3 qualified risk personnel based in Ankara, Mumbai and London to fulfil function expectations

Stakeholder Engagement and Interface Management

- Obtained Client buy-in to the risk management process
- Successfully facilitated all risk workshops with participants from client and contractor organisations. Worked with Risk Action Owners to drive mitigation implementation through proactive monitoring and communication while ensuring work is conducted in accordance with the Risk Management Plan

JOAN IROMANTU, LLB, LLM, BL
Senior Risk Manager, Governance & Compliance SME
+44 (0) 7872 049 104

Joan_Iromantu@yahoo.com

LinkedIn: <https://www.linkedin.com/in/joan-iromantu-97083313/>

RESUME

- Created and maintained a high level of engagement in project risk management activity from project members throughout the project life cycle while adhering to the project risk schedule

Training and Risk Culture Improvement

- Conducted training and information sessions on risk management for the Management Team and discipline leads ensuring that over 55 people met their risk management KPIs improving the risk management culture

Reporting

- Produced regular risk reports and risk profile maps for multiple audiences especially Project Management Team
