SR. PROJECT AND VALIDATION ENGINEER

Seasoned Project and Validation Engineer with 20 years of professional experience, coupled with academic completion of a Bachelor of Science in Mechanical Engineering Technology and Master of Science in Management of Information Systems. Experienced in the Pharma industry, FDA regulated environment with an understanding of regulatory compliance pertaining to software validation of an IT Infrastructure and Enterprise Systems supporting business, manufacturing, or quality management. Cross functional expertise and knowledge analyzing technical designs, implementation plans, program management, and technical writing.

PROFESSIONAL EXPERIENCE

JEC Validation Solutions Huntsville, AL

Sr. Project and Validation Managing Consultant, July 2023 – Present

Provide consulting for Project Managing and Validation (Equipment and CSV), Serialization, Track & Trace Supply Chain B2B, and DSCSA compliance for pharmaceutical companies.

- Development/review/approval of the full suite of validation deliverable documentations such as User Requirements, Validation Master Plans, Traceability Matrix, Installation/Operation/Performance Qualification/Testing, Summary Reports, and Standard Operating Procedures (SOPs) for manufacturing and packaging equipment, including quality IT applications (Including Part 11 compliance).
- Collaborated closely with the clients for activities and documentation related to Commissioning, Qualification and Validation (CQV) programs during start-ups.
- Orchestrated software validation requirements for ERP to EPCIS connectivity.
- Solution Architect for client L4 solutions, implementation, and validation.
- Developed computer validation (CV) protocols and lead development work managing coding effects providing serialization EPCIS 1.2 compliant reports.
- Hands on experience in manual or Valgenesis IOQ test execution of various applications.
- Developed Test Plans and documented UAT's based on the User Requirements and assessed the risk and security for the application.

GXP Impact, LLC Huntsville, AL

Sr. Validation Consultant and Technical Writer, July 2022 – July 2023

Provide equipment validation consulting support for BioTech clients. Support technical activities associated with T-cell manufacturing and continuing to demonstrate a strong understanding of cGMP and FDA regulations.

- Served as technical expert for drafting and executing protocols, equipment validation of tube welders, tube sealing, filter integrity tester, K-Seps, CliniMACs, and Novaflex equipment.
- Ensured calibration of all tube sealing, filter integrity tester, K-Seps, CliniMACs, and Novaflex lab equipment and wrote SOPs for calibration and maintenance of this equipment.
- Supported execution of computer validation UAT test scripts of internal networks connecting to the manufacturing equipment.
- Provided training to colleagues and contractors on our approach to systems implementations.
- Created templates, procedures, and SOPs, to valid QMS infrastructure system, lab equipment, SAP, and WMS applications.

JOHNNY E. COLVIN

RemTech, LLC Huntsville, AL

Sr. Validation Consultant and Technical Writer, July 2018 – July 2022

Provided equipment validation consulting support for a RemTech client's external manufacturers.

- Serve as technical expert for drafting and executing IOPQ protocols, equipment validation of Tablet and Liquid fillers, blisters, cappers, induction sealers, labelers/vision system, retorquers, neck banders, shrink wrappers, case packers, and palletizing equipment.
- Provided packaging assessments of multiple external manufacturing packaging equipment and developed an AQL defects plan and catalog.
- Support equipment entry into the Blue Mountain platform ensuring maintenance and calibration was scheduled
- Experience with entering drafted SOPs and UAT test scripts into Veeva Quality Documents for review, editing, and approval.

PAR PHARMACEUTICALS, Huntsville, AL

Sr. Project Manager, January 2012 – July 2018

Direct implementation of an enterprise resources planning, SQL server, and packaging line infrastructure for track and trace abilities throughout the supply chain.

- Managed capital project budgets up to \$15 million for serialization infrastructure development and piloting.
- Supervised and direct contract maintenance forces during periodic turnarounds.
- Achieved effective financial control through management of qualifications and verification scopes, estimates, and effective use of financial and budgeting tools.
- Identified, implemented, and validated packaging equipment upgrades and improvements to increase packaging efficiency and yields for up to 16 packaging lines, including serialization capabilities.

QUALITEST PHARMACEUTICALS, Huntsville, AL

Equipment and Computer Validation Engineer, September 2006 – January 2012

Department lead for all validation activities including process, packaging, water, and computer validations.

- Authored and updated validation standard operating procedures with coordination through change control, installation, operation, and performance testing protocols for equipment, computer, and utility validation qualification, including final analysis reports.
- Communicated effectively and professionally with various vendors of equipment and services as it relates to validation testing activity through exceptional oral and written interpersonal skills.
- Prepared, provided, and evaluated documentation regarding specific engineering and manufacturing questions requiring resolution.
- Supervised and mentored staff on execution of validation new and existing products, processes, and protocols in manufacturing and packaging.
- Verified new applications and software modifications met requirements and operated successfully in a system environment through computer validation qualification.
- Performed testing according to SOP's assured all validation documents are in compliance with GXP regulations.

JOHNNY E. COLVIN

EDUCATION AND CREDENTIALS

Bachelors of Science Degree in Mechanical Engineering Technology
Alabama A&M University - Normal, AL

Master of Science Degree in Management of Information Systems
University of Phoenix, Phoenix, AZ

Fanuc Robotics Trained in Handling Tool Operation and Programming
