(813) 966-1404

Raleigh, NC, 27613, USA

Experienced IT professional with over 10 years' experience steering enterprise architecture, platform strategy, and digital financial services in regulated industries. Articulate advancing technology adoptions and leading high-performance teams, adept delivering transformative Software Solutions to meet business needs driving organizational growth

Core Skills

Business Strategy, Presales, Context Analysis, Analysis, Client Engagement, Leadership, Enterprise Architecture : Expertise in AWS, Azure, Google Cloud, IaaS, PaaS, SaaS, VMs, Secrets Management, Presales, Cloud Migration, Implementation Consulting, Software Development, Help Customers, Managed Services, Professional Services, Cloud Computing, IT Development, Specific Technology, Systems Engineering, AWS Platform, Application Architecture, Application Modernization, Business Development, Cloud Adoption, Co-Development, Cloud Migration Strategies, Context Analysis, Custom Application, Customer Needs, Customer Solutions, IT Operations, Micro Services, Migration Plan, Modern Architectures

Education

University of California, San Diego (NROTC)

Bachelor of Science Engineering

Boston Architectural College

M.Arch Architecture

Work Experience

Principal Solutions Architect

Jun 2017 - Jun 2024

DTCC | Tampa

- Successfully led 15 architects and 35 interdisciplinary engineers across multiple IT platforms developing digital modernization, SEC regulatory-realignment and transition strategies migrating from AWS 2.0 to A3P/AWS 3 with a 15% decrease in architectural drift
- Orchestrated strategic alignment of solution architecture resource allocation to specific business financial lines increasing solutions architecture delivery response by 60% harvesting SME intellectual capital into an agile and adaptive architectural pattern repository
- Reduced team backlog from 120% to 80% by streamlining collaborative business processes without an increase in headcount
- Adopted an enterprise IAM financial-industry security solution reducing costs 10% subsequently designed the transition solution for over 90% of the corporate infrastructure migrating ground to cloud-based operations
- Created KPIs tracking Architecture Review Board/ARB Governance new application submission approvals, resulting in interdisciplinary team re-alignment, ARB process improvement from six months to eight weeks, an ROI of roughly \$15k labor saving per-person per-project
- Spearheaded network platform DR automation orchestration between datacenters for tier 0/mission critical application recoverability achieving a 2 min RTO/RPO, additional included automated VLAN creation capabilities reducing deployment from 10 manual days to 30 minutes, an ROI greater than 10x
- Successfully designed Jenkins-Nexus CI/CD pipeline in AWS for 0s downtime regional data center failure and recovery RTO/RPO of DTCC business and security sensitive cloud applications

Sr. Manager, Solutions Architecture

Jan 2009 - Jun 2017

PWC Global | Tampa

- Led the adoption of global DevOps processes, reducing deployment lifecycle by 30% with prescriptive business specifications aligned across business lines
- Developed the UCC integration solution for video use : 300K users, multiple voice architectures, constantly changing user needs, unique network segments, 1000 telepresence systems, 7000 desktops

Certificates

MCSE

Microsoft

CCIE

Cisco Networks

Solutions Architect

AWS

Global Information Assurance (GIAC)

SANS

IT Trainer - CCIE/MCSE

Certificate Associates

Interests

Florida Certified General Contractor, Green/
LEED Certified Builder, IRONMAN - 2005-
2020, Team USA Triathlon, World
Championships, Beijing, China 2012

resulting in a 35% decrease in telco costs and 25% reduction in support incidents

- Design global data cloud architecture infrastructure with adherence to MDM, ITIL governance, NIST/ISO2700X, Safe Harbor, SOC-1, and international data privacy laws for Financial Services
- Managed the global communication services application portfolio quality by implementing Troux Insights for global management : design repository, API management, data workflow, and governance reviews

Cisco Consultant

Jun 2006 - Jan 2009

FairPoint Communications, Motorola, Verizon

- Led a 14-man engineering team in the design of fiber network blueprints for emerging networks with data center integration with a 35% increase in network performance
- Increased market availability by 40% for Verizon customers across New England through the development of DWDM architecture for MSAN and IP transport via SONET and ATM rings.
- Pre-sales engineer for Fairpoint Communications enterprise government customers, improving sales by 20% with a 10% increase in contract size and duration
