

Joshua Ogunibe

AWS Cloud Engineer/AWS Network Engineer

Modesto, CA | Tel: 510 372 7704 | E: ogunibeoluwagbenga@gmail.com

PROFESSIONAL SUMMARY:

- An accomplished individual with over 6+ years of hands - on experience in the arena of Network and Security, AWS Cloud computing.
- Knowledge of puppet as Configuration management tool, to automate repetitive tasks, quickly deploy critical applications, and proactively manage change.
- Experience in Building, Continuous Deployment, Continuous Integration, Requirement Analysis, Planning, Design, Development, Testing, and Release of various Enterprise-Wide Software Applications for business areas like retail, banking, telecom, financial industries in environment using Subversion, GIT, TFS, CVS, Jenkins, Bamboo, Maven, Nexus Artifactory, AWS, ANT, Chef, Ansible, Puppet, Docker, Nagios, Bitbucket.
- Familiar with Amazon AWS Cloud Administration which includes services like: EC2, S3, EBS, VPC, ELB, AMI, SNS, RDS, IAM, Route 53, Auto scaling, Cloud Front, Cloud Watch, Cloud Trail, Cloud Formation, OPS Work, Security Groups.
- Ability to build deployment, build scripts and automated solutions using scripting languages such as Shell scripting(ksh, Bash).
- Extensive experience with software Build automation and standardization tools like ANT, Maven.
- Good knowledge in Continuous Integration and Continuous Deployment methodologies.
- Extensive knowledge of container services such as ECS & Docker.
- Worked on virtualization of servers via AWS Lambda, AWSElastic Beanstalk.
- Automated AWS resources (EC2, VPC, SG, EMR, Redshift, S3) by using terraform.
- Experience in Running web apps in containers on Docker and Docker Swarm.
- Installed and Managed Jenkins and Nexus for CI and Sharing Artifacts respectively within the company.
- Scheduled, deployed and managed container replicas onto a node cluster using Kubernetes.
- Team player with excellent interpersonal skills, self-motivated, dedicated and understanding the demands of 24/7 system maintenance and has good customer support experience.

TECHNICALSKILLS:

- **Cloud Technologies:** Amazon Web Services, Open stack
- **Operating Systems:** RedHat Linux, CentOS, Ubuntu, UNIX, AIX, Windows
- **CI & Provisioning Tools:** Hudson, Jenkins, Puppet, Chef, Ansible, uDeploy, Docker, Kubernetes, Terraform, kubernetes, vagrant
- **LAN Technologies Workgroup:** Domain, HSRP, DHCP, Static, VLAN, STP, VTP, Ether Channel, Trunks.
- **WAN Technologies Leased Line:** Frame Relay, ISDN, PPP, HDLC, ATM, SONET, And Metro Ethernet.
- **CISCO Routers:** 1700, 1800, 2500, 2600, 2800. CISCO High End Router 3600, 3800, 7200, 12010.
- **CISCO Switches:** 1900, 2950, 2960. CISCO Campus switches 3550XL, 3548, 4984 Core Catalyst 4503, 4507 RE, Catalyst F5 load balancer, Juniper ISG/SRX.
- **Security & VPN:** PIX 500 Firewall, ASA 5505 Firewall, AIP SSM, CSC SSM, FWSM, Fort iGATE, CISCO CSM, ACL- Access Control List, IPS/IDS, NAT, PAT, CISCO ACS, Check point, pfSense, Palo Alto.
- **Layer 2 technology:** VLAN, VTP, VMPS, ISL, dot1q, DTP, Spanning-tree, PVST
- **Layer 3 Switching:** CEF, MLS, Ether Channel
- **SCM Tools:** Subversion, GIT, CVS, Puppet, TFS, Chef, AWS
- **Web/App servers:** WebLogic, WebSphere, Apache Tomcat, JBOSS
- **Scripting Language:** Bash, Shell, Perl, Python, Ruby
- **Build Tools:** Ant, Maven, Gradle
- **Databases:** Oracle, SQL Server, MySQL, Dynamo DB, MS-Sql.
- **Software/Tools:** Microsoft Office, Oracle, My SQL, SAPbyDesign, PagerDuty, GitHub, NetBeans, Amazon Web Services, ANT, Nagios, Jenkins, Chef, Tableau.

PROFESSIONAL EXPERIENCE:

Liberty Mutual Finance:

Nov 2020 - Current

AWS Cloud Engineer/AWS Network Engineer

- Responsible for Networking Architecture across Public clouds and legacy networking
- Managing Company Wide firewalls
- Used AWS Cloud platform with features EC2, VPC, ELB, Auto-Scaling, Load Balancing, Security Groups, IAM, EBS, AMI, RDS, S3, SNS, SQS, Cloud Watch, Cloud Formation.
- Experience building VPC's for specific environment, and subnetting for private or public needs.
- Developed an AWS security roadmap which included the AWS Services and 3rd party tools to be utilized in the AWS Cloud for Security monitoring.
- Implemented continuous integration automated build pipelines using Jenkins.
- Deployed Chef Dashboard for configuration management to existing infrastructure.

- Developed an AWS Security Group strategy. Determined naming conventions, owners, and approval process for Security Group change requests in a promote-to-production environment.
- Enabled and configured CloudTrail logs for 26 AWS accounts. Created and managed an encrypted S3 Bucket for all CloudTrail logs and adjusted bucket policy for each accounts CloudTrail to access.
- Installed and configured Amazon's Inspector. Created Targets and Templates and scheduled Assessment runs on all EC2 instances in the AWS account.
- Modify pilot ISE environment for production scaling and performance.
- Provide ISE deployment services for migration of users from Cisco NAC to Cisco ISE platform for the following locations.
- Well versed Knowledge of IP networking and network security as well as good knowledge in Peripheral Component Interconnect PCI.
- Hands-on experience with Perl, Python and Java.
- Adaptive to cloud strategies based on AWS (Amazon Web Service).
- Familiar with network traffic captures and network mapping tool like Wireshark.
- Vendor coordination for all network Security and Wireless services.
- Under general direction, responsible for the acquisition, installation, maintenance and usage of the wide and local area network. Managed network performance and maintained network security.
- Establishes and implements network policies, procedures and standards and ensures their conformance with information systems and company's objectives, trains users on network operation.

Hartford Financial Service Group

Feb 2018 – Oct 2020

AWS Cloud Engineer/AWS Network Engineer

- Initial Design and deployment for Hybrid cloud involving AWS Direct Connects Route and Google Cloud interconnect to connect on-prem networks and certain locations to VPCS and VNETs
- Architecting with devops teams for Azure Webapps
- Architecting for Data Factories and Data warehouses
- Assisted with migration of applications/VMs into cloud environments (AWS, Azure, GCP)
- Using VLAN and VRF Segmentation on edge routers to segregate traffic between AWS, Azure and Google Cloud
- Assisting Data team with integrating data pipelines including dataprep with exports to big query for analysis and in certain scenarios google cloud storage
- Managing communication with different VPCs using concepts like VPC peering between organisations and firewall rules within google cloud
- Using flexible environments for VPC access for app engine working with developer teams
- Creating and managing Palo alto firewall policies for both cloud and internet perimeter firewalls
- Creating and managing VPCs and VNETs withing AWS and Azure accounts. This also includes monitoring expressroute and transit gateways through equinix cloud exchange fabric
- Assigning user permissions adhering to least privilege based on job functions using AWS IAM and Azure Active Directory.
- Working with Devops teams to set up an GCP environment for apps using Google Kubernetes Engine Clusters in east and west regions respectively sitting behind a HTTPs Load balancer. This also includes GCP networking within the clusters
- Troubleshooting cloud related issues
- Ensuring Resources within cloud environments are monitored and appropriate parties are set up to receive notifications using alert groups and notification hubs
- Ensuring security controls on required services within the cloud

EDUCATION

- **Bachelor of Architecture**
College of Technology, Lagos Nigeria.

ACHIEVEMENTS

- Online classes@ Udemy, Learn.Cantril.io
- AWS classes on Zoom meetings.
- AWS summit
- AWS Re-In force
- AWS Re-Invent
- AWS free online conferences.
- Google Developer group events- virtual training, workshops on Webinar.
- Community Volunteers
