SUMMARY

I am a highly experienced and proficient QA Professional with client/server applications and subsurface software for the oil and gas industry. I have extensive knowledge of QA methodologies and test automation tools in my 16 years of experience as a Senior QA Consultant/Lead and Automation Lead Engineer. With a strong blend of technical, leadership, and coaching skills, I am recognized as a key contributor who drives testing and process improvements.

WORK EXPERIENCE

Senior QA Consultant/Lead | Bluware Inc. (Client: Shell) | Oct 2016 – Dec 2024 | Houston, USA

- Developed and maintained test strategy and test plan documents for different projects.
- Developed, documented, and maintained functional test suites, test cases, test data and implemented QA standards and procedures, reducing software defects by 25%.
- Worked closely with different stakeholders involved in the project including the development team, product owners and product managers to ensure quality standards are met.
- Built test automation framework with POM design pattern using Selenium with Java and hybrid framework with shared object repository and function libraries using UFT, increasing test automation efficiency by 30%.
- Executed build verification, functional, non-functional, SIT, regression, UAT, and documented test execution results using Azure DevOps, resulting in a 40% improvement in software reliability.
- Contributed to release readiness signoffs by executing key quality test suites, documenting bugs and preparing test execution result reports.
- Managed onsite and offshore QA teams for 6 years including onboarding, training and mentoring new team members, ensuring adherence to quality standards and project timelines.
- Automated smoke tests and regression test suite using Ranorex, Selenium and UFT tools with Java, VBScript, C# using OOPS concepts and TestNG as testing framework.
- Developed automated tests for RESTful API/web services testing using RestAssured to validate API responses including status codes, headers and authentication.
- Integrated UI and API test automation suites into build validation and continuous integration/deployment (CI/CD) processes using Azure DevOps, Jenkins for quick validation.
- Conducted and participated in daily standup, PBI grooming, sprint planning and review, retrospective, program increment planning meetings.
- Maintained test automation artifacts on version control systems like Git and Azure Devops.
- Generated test reports and metrics and verified test coverage using various matrices.
- Initiated QA Community of Practice across ART teams to build community and share best practices related to application quality and testing methodologies which led to 50% reduction in test planning and execution efforts.

Technical Test Lead | Infosys Ltd. (Client: Baker Hughes) | July 2014 – Sep 2016 | Houston, USA

- Determined test objectives for user stories (PBIs) in the sprint backlog and identified test scenarios.
- Prepared test estimates and test strategies for test automation effort in the projects.
- Developed detailed test plans and test cases based on functional and technical requirements, improving test efficiency and accuracy.
- Performed functional, performance, Load, System, Regression and UAT test execution and bug reporting using MTM and ALM.
- Collaborated closely with cross-functional teams including development, product management, and support to deliver high-quality software release.
- Created a hybrid test automation framework combining data-driven, modular frameworks and developed reusable functions.
- Automated regression test suite using Test Complete and QTP tools with VBScript.
- Utilized key features of Test Complete to access data context level information of the UI to achieve 50% savings of test automation efforts.
- Monitored and reported on QA metrics such as defect density, test coverage, and test execution progress, providing actionable insights to stakeholders.
- Stayed up to date with the latest QA methodologies and tools to continuously improve testing capabilities and best practices.
- Prepared Test Closure and Release Reports.
- Trained and mentored 6 team members on test automation using Test Complete and UFT, enhancing team productivity by 20% and reducing onboarding time by 15%.

QA Test Analyst | Infosys Ltd. (Client: Baker Hughes) | Oct 2011 – June 2014 | Houston, USA

- Analyzed Use Cases and ER diagrams using Enterprise Architect to identify test scenarios.
- Developed and reviewed test cases/scripts for both positive and negative scenarios, conducted baseline testing, and generated detailed reports.
- Executed functional tests, tracked bugs, and managed test activities using HP QC and TFS.
- Performed automation Proof of Concepts using UFT, Coded UI and presenting Feasibility analysis reports to Platform managers, product owners.
- Executed functional tests, tracked bugs, and managed test activities using HP QC and TFS.
- Automated basic smoke tests and complex end-to-end workflows using HP UFT.
- Created Test Metrics Dashboard for client and business status reporting utilizing MS Excel Macros.
- Developed a TFS-QC bug synchronizer tool to import bugs from TFS to QC for streamlined issue tracking.

QA Test Engineer | Infosys Ltd. (Client: Baker Hughes) | July 2008 – Sep 2011 | Hyderabad, India

- Reviewed requirements, specifications, and technical designs using FRD and BRD.
- Participated in walkthroughs of testing procedures.
- Identified test scenarios and created detailed, well-structured test cases.
- Performed functional, database, Data Warehouse and ETL testing, with bug tracking.
- Identified, isolated, and tracked defects throughout the testing lifecycle.
- Automated possible regression tests using QTP.
- Generated test result metrics, defect reports, and requirement traceability matrices using QC.

PROFESSIONAL SKILLS

- **Test Management tools:** HP ALM (QC), MTM, TFS, Azure Devops
- **Test Automation tools:** HP UFT, Test Complete, Ranorex, Selenium, Playwright, RestAssured
- **QA/QC:** Smoke, API, Functional, Non-functional, Integration, System, Regression, UAT
- **Continuous Integration tools:** VSTS, Azure Devops, Electric Commander, Jenkins
- **Programming Languages:** VBScript, C, C#, Core Java, Python
- **Databases:** MS SQL Server 2012, Oracle, DynamoDB, MongoDB
- **Operating Systems:** Windows XP/7/10/11, Linux (Red hat 6.8/7.4/8.10)
- **Methodologies:** Agile (Scrum), SAFe, Waterfall
- **Domain:** Oil and Gas (Drilling and Upstream: E&P)

EDUCATION

- **Master of Computer Applications (M.C.A)** - University college of Engineering, Osmania University, Hyderabad, India, May'2008.
- **Bachelor of Science (Electronics)** – Nizam College, Hyderabad, India, May' 2004.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner** from AWS
- **ISTQB Certified Tester Foundation Level (CTFL)** from ASTQB
- **Professional Scrum Developer (PSD-I)** from Scrum.Org
- **Certified SAFe Practitioner (SP)** and **Agile Software Engineer (ASE)** from ScaledAgile.com

WHITE PAPERS

- Key techniques for successful automation in Agile projects.
- Progressive Automation.
