

Kalan Brinkley

Senior Software Engineer

Results-driven Senior Software Engineer with 10 years of experience in developing scalable, high-performance eCommerce and enterprise solutions. Expertise in **ASP.NET Core**, **.NET Framework**, **React**, **Angular**, **Azure**, **AWS**, and database technologies. Adept at collaborating with cross-functional teams to deliver user-centric, innovative solutions that enhance business efficiency and customer satisfaction. Proficient in Agile methodologies and DevOps practices, ensuring seamless development and deployment pipelines.

SKILLS

- Programming Languages: C#, JavaScript, TypeScript, Python, SQL
- Frameworks & Libraries: ASP.NET Core, .NET MVC, Angular, React, Vue.js, Entity Framework, Redux
- Cloud Platforms: Azure (DevOps, AKS), AWS (EKS, Lambda, S3, RDS)
- Databases: SQL Server, MySQL, DynamoDB, ElasticSearch
- DevOps Tools: Jenkins, Azure DevOps, Docker, Kubernetes
- Testing Tools: NUnit, xUnit, Jest, Mocha
- Other Tools: Jira, Confluence, GitHub, Telerik Kendo UI, Leaflet.js, Highcharts

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Etsy Inc

March 2022 - Present

Etsy is an online marketplace that connects buyers and sellers of handmade and vintage goods.

- Engineered and maintained enterprise resource planning (ERP) systems by employing **.NET Core**, **React**, and **SQL Server**, delivering reliable and efficient business solutions.
- Enhanced inventory management systems, resulting in a 15% improvement in operational efficiency by redesigning data workflows and implementing advanced features.
- Developed and deployed mobile applications using **.NET MAUI**, enabling seamless functionality across multiple platforms and devices.
- Designed and implemented observability solutions using **Grafana Loki** and **Open Telemetry SDKs**, improving system monitoring and issue resolution.
- Led the migration of core features from legacy systems to **Angular**-based modern web applications, ensuring enhanced functionality and user experience.
- Built and maintained REST APIs for seamless integration with third-party systems, facilitating advanced capabilities and interoperability.
- Orchestrated application deployments using **Azure DevOps**, performing thorough code reviews and ensuring adherence to coding standards.
- Optimized data querying by incorporating advanced **ElasticSearch** configurations, enabling faster and more efficient data retrieval.

Senior Full Stack Engineer

Wayfair

March 2018 - March 2022

Wayfair is a retail store that offers a wide range of home products such as outdoor, bedding, lighting, and appliances with online services.

- Spearheaded the end-to-end development of eCommerce platforms, leveraging **.NET Core** and **SQL Server** to deliver robust and scalable solutions tailored to business needs.

- Architected and implemented secure authentication systems using Identity Server 4, increasing user trust and reducing security vulnerabilities.
- Analyzed and restructured order fulfillment workflows, significantly reducing operational errors and enhancing process efficiency.
- Designed and developed modular microservices to improve system maintainability and reduce development time for future enhancements.
- Streamlined CI/CD pipelines using **Jenkins** and **Azure DevOps**, ensuring seamless code integration and automated deployment.
- Integrated **ElasticSearch** to enhance search capabilities and enable detailed analytics for business decision-making.
- Conducted technical training sessions to upskill junior developers, ensuring continuous improvement of the development team.
- Optimized cloud infrastructure, resulting in a 20% reduction in operational costs while maintaining high performance.

Senior Full Stack Developer

BigCommerce

April 2017 - March 2018

BigCommerce is a SaaS provider for merchants running online businesses.

- Designed, developed, and deployed scalable web applications using **ASP.NET Core**, integrating **Azure DevOps** pipelines to automate the build and release process.
- Created dynamic and highly responsive user interfaces utilizing modern frameworks such as **React**, **Angular**, and **Bootstrap**, enhancing the user experience.
- Led the migration of critical features from legacy systems to modern frameworks, ensuring alignment with evolving business and technology needs.
- Implemented Dockerized applications and deployed them on **Azure Kubernetes Services** (AKS) to achieve efficient scalability and fault tolerance.
- Optimized database performance by analyzing and refining complex queries, stored procedures, and indexing strategies.
- Conducted rigorous code reviews and implemented robust unit testing frameworks such as **xUnit** and **Moq**, ensuring code reliability and adherence to quality standards.
- Developed and maintained comprehensive RESTful APIs to support internal operations and third-party integrations, enabling seamless functionality.
- Actively participated in Agile sprint planning, daily stand-ups, and retrospectives, collaborating closely with cross-functional teams to ensure successful project delivery.

Full Stack Developer

Shopify

June 2014 - April 2017

Shopify is a cloud-based, multi-channel commerce platform designed for small and medium-sized businesses.

- Played a key role in designing, developing, and maintaining modules for asset inventory tracking, library inventory, and administrative dashboards utilizing **ASP.NET MVC** and **SQL Server**, ensuring streamlined operations across teams.
- Conducted comprehensive requirements analysis and translated them into module designs using Visio, enabling optimized and efficient development workflows.
- Collaborated with quality assurance teams to perform functional and performance testing, ensuring high-quality software deliverables.
- Enhanced application performance by implementing optimization techniques and scalable architectural designs, resulting in a 30% performance improvement.
- Successfully migrated legacy systems to modern frameworks, improving the scalability, maintainability, and reliability of critical business systems.
- Designed and implemented APIs to facilitate seamless data exchange between multiple internal and external systems, improving integration efficiency.
- Streamlined development processes by adhering to Agile methodologies, promoting iterative delivery, and maintaining alignment with business goals.

EDUCATION

Bachelor of Science in Computer Science

University of South Florida

August 2010 - May 2014
