SUMMARY

Full Stack Engineer with 5+ years of experience building scalable web applications using AWS, React, and SQL databases. Proven expertise in developing secure backend services and responsive front-end interfaces in Agile environments. Demonstrates a strong ability to optimize database performance and deploy cloud-based solutions while ensuring clean, tested code and effective team collaboration.

TECHNICAL SKILLS

- **Programming Languages:** Java 8/11/17, SQL, Node.js, C#, Python, Groovy, Shell
- **Software/Tools:** Git, Visual Studio, Jira Ticketing Tool, Splunk, IntelliJ IDEA 2018/2020/2022, GitHub, Maven 3.6/3.8/4.0
- **Cloud & DevOps:** AWS 2020/2021/2023 (Lambda, IAM, S3, ECS), GCP 2018/2021, Terraform, CI/CD, GitHub Actions 2020/2021/2022, Jenkins 2.x, Docker 18/19/20/21, Kubernetes 1.16/1.18/1.21
- **Frameworks & Technologies:** Spring Boot 2.1/2.4/2.7, Hibernate 5.4/5.6/6.0, Spring Data JPA 2.0/2.3/2.5, Spring MVC 5.0/5.2/5.3, React JS 17/18, RESTful APIs 2018/2020/2022, Microservices (Spring Cloud 2018/2020/2022)
- **Web Development:** HTML5, CSS3, JavaScript ES6/ES7/ES8/ES9/ES10, Bootstrap 4/5, TypeScript 3.7/4.0/4.5
- **Database Technologies:** MySQL 5.7/8.0, PostgreSQL 11/12/13, MongoDB 4.2/4.4/5.0, Oracle 11g/12c/19c
- **Web Services:** SOAP 1.1/1.2, RESTful Web Services 2018/2020/2022
- **Libraries & Tools:** Apache Kafka 2.2/2.3/2.5, Redis 5/6/7, Elasticsearch 7.2/7.10/7.16, JUnit 4/5, Apache Camel 3.0/3.6, Gradle 5/6/7
- **API Services:** RESTful API 2018/2020/2022, JSON Web Services (JSON) 2018/2021
- **Analytics & BI:** Power BI, Snowflake
- **Industry Knowledge:** Reinsurance Knowledge

WORK EXPERIENCE

United Wholesale Mortgage

Jan 2023 - Present

Full Stack Developer

Directed the full SDLC, ensuring timely delivery across planning, development (with TDD principles), testing, and deployment phases while adhering to Agile best practices.

- Engineered secure and scalable backend services using Spring Boot, RESTful APIs, and integrated Node.js components to enhance system robustness.
- Authored efficient Java 11 code leveraging streams and lambda expressions to improve performance and maintainability.
- Utilized Maven for build automation and dependency management, streamlining the development workflow in IntelliJ IDEA.
- Designed and managed robust SQL database schemas with MySQL, ensuring optimal data integrity and performance.
- Developed responsive front-end applications with React JS, JavaScript, HTML5, CSS3, and Bootstrap to create modern, user-friendly interfaces.
- Managed code versioning and collaboration via GitHub while supporting CI/CD processes through Jenkins integration.
- Deployed applications on AWS using Lambda, IAM, S3, and ECS to build scalable, cloud-based solutions.
- Implemented a Microservices architecture with Spring Cloud and RESTful APIs to construct modular and resilient systems.
- Engaged in daily Agile practices, collaborating with cross-functional teams and mentoring junior developers.

Indian Servers

Jun 2020 - Jul 2022

Full Stack Developer

Developed scalable web applications using Java 8 and functional programming techniques to optimize data processing.

- Integrated Spring Data JPA to streamline backend database interactions and improve data access efficiency.
- Created and maintained RESTful APIs with JSON, enabling efficient communication across microservices.
- Collaborated on CI/CD pipelines using Git and GitHub Actions to reinforce continuous integration practices and smooth deployments.
- Maintained legacy systems with rigorous unit testing following TDD principles to ensure code reliability.
- Architected robust applications using Spring Boot, Hibernate, and Kafka to ensure scalable and efficient system design.
- Enhanced front-end development with Angular, HTML, CSS, and Bootstrap, significantly improving user experience.
- Orchestrated Docker-based deployments and managed AWS cloud infrastructure with Terraform support to maintain consistent performance.
- Facilitated effective communication within cross-functional teams to achieve high-quality project outcomes and mentor peers.

EDUCATION

Central Michigan University

MASTERS, Information Systems

Mt Pleasant, MI

- **GPA:** 3.7
- **Coursework:** System Analysis and Design, Business Decision Modeling, Project Management and Principles, Python Application Development, Database Management Systems, Information Systems, Communications in Professional Context, Data Visualization (Tableau)

COURSE PROJECTS

CMU Dining Payroll Management

Central Michigan University

- Developed a Windows application to streamline the management of payroll for CMU Dining employees.
- Created a web application using .NET and SQL to handle payroll operations, ensuring that stakeholders received clear, actionable insights.
- Led the development of project plans, schedules, budgets, and resources to ensure the project was delivered on time and within budget.

Case Study: Issues with Hiring and Management in an Expanding Corporation

Central Michigan University

- Conducted research and documentation on current hiring practices, focusing on improving operational efficiency.
- Developed an Entity Relationship Diagram (ERD) for a new hiring structure, facilitating streamlined onboarding for new employees.
- Leveraged Excel for data analysis and Tableau for creating data visualizations, comparing new and old practices for better decision-making.
