

Keval Makadiya

Northridge, CA | 747-254-2593 | [LinkedIn](#) | Kevalm777@gmail.com

Summary

Results-driven Software Engineer with 3+ years of experience designing and developing scalable applications using Java, Spring Boot, and microservices architecture. Skilled in full-stack development with Angular, React.js, and cloud-based solutions on AWS. Strong background in database optimization, DevOps, and CI/CD automation. Adept at collaborating in Agile environments and delivering high-performance solutions for enterprise applications.

SKILLS

Programming Languages: Java, JavaScript, TypeScript, C++, C#, Python (basic scripting), PHP (WordPress Development)

Backend Technologies: Spring Boot, RESTful APIs, Microservices, Spring Security, Hibernate, JPA, Node.js

Frontend Technologies: Angular, React.js, TypeScript, HTML, CSS, Bootstrap, jQuery

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL Server, Oracle

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, API Gateway, IAM, SQS, SNS), Terraform, Docker, Kubernetes, Jenkins, GitHub Actions, Argo CD, Nginx, Apache

Messaging & Streaming: Kafka, RabbitMQ

Testing Frameworks: JUnit, Mockito, Cypress, Selenium, Postman (API Testing)

Version Control & CI/CD: Git, GitHub, GitLab, Bitbucket, Jenkins, GitHub Actions, Azure DevOps

Web Development: WordPress (Gutenberg, ACF), Custom Gutenberg Blocks, WPML for multi-language support, SEO optimization (Yost SEO, Rank Math)

Performance Optimization: Caching strategies, Lazy loading, Image compression, Reducing HTTP requests

Security & Compliance: OAuth 2.0, OpenID Connect, JWT Authentication, WCAG 2.1 Accessibility Standards

Agile & Collaboration: Jira, Confluence, Scrum, Kanban

EXPERIENCE

Software Engineer, Optum

06/2024 – Present

- Developing and maintaining microservices-based backend systems using Java, Spring Boot, and Kubernetes to handle high-traffic healthcare applications.
- Implementing RESTful APIs and optimizing them for performance, security, and scalability.
- Deploying and managing cloud-based solutions using AWS (EC2, S3, Lambda, RDS, API Gateway, IAM, SQS, SNS) and leveraging Terraform for infrastructure as code.
- Enhancing CI/CD pipelines with Jenkins, GitHub Actions, and ArgoCD for seamless automated deployments.
- Working with PostgreSQL and MongoDB, designing efficient database schemas and optimizing queries for high availability.
- Integrating Kafka for real-time data streaming and event-driven architectures.
- Implementing OAuth 2.0, OpenID Connect, and JWT authentication for secure API access.
- Collaborating in an Agile environment with cross-functional teams to ensure high-quality deliverables.
- Leading architectural discussions, conducting performance optimizations, and troubleshooting complex issues.
- Adhering to WCAG 2.1 accessibility standards to ensure applications are inclusive and compliant.

Software Engineer, Code flash Infotech

01/2022 – 05/2024

- Designed and implemented full-stack applications using Java, Spring Boot, and Angular for enterprise solutions.
- Developed and optimized SQL queries and stored procedures for MySQL and PostgreSQL databases.
- Created scalable and reusable UI components using Angular and TypeScript, ensuring high performance and responsiveness.
- Deployed applications on Docker and Kubernetes, managing containerized workloads efficiently.
- Implemented authentication and authorization mechanisms using OAuth 2.0, JWT, and Spring Security.
- Designed and implemented Redis caching strategies to improve application response time and scalability.
- Integrated RabbitMQ for asynchronous task processing in distributed systems.
- Built multilingual web applications using i18n frameworks to support international users.
- Developed and optimized frontend experiences following SEO best practices to improve search visibility.
- Worked with REST and GraphQL APIs for seamless backend integration.
