

Koushik Reddy Ramidi | SAP ANALYST

Location: TX, USA | **Phone:** (989) 513-1166 | **Email:** koushikramidi357@gmail.com | [LinkedIn](#)

SUMMARY:

A highly skilled SAP Analyst with over 4 years of experience in delivering successful integration, development, and transformation projects across SAP S/4HANA, SAP Fiori/UI5, SAP Analytics Cloud (SAC), and SAP HANA. Known for leading cross-functional teams to streamline processes, enhance operational efficiency, and enable data-driven decision-making through cutting-edge technologies like SAP Cloud Platform, SAP Integration Suite, and SAP BW/4HANA. Adept in data migration, API integrations, and business process optimization, with hands-on expertise in SAP SD/MM and advanced data analytics. Proven ability to foster strong collaboration among business units, delivering on-time, high-quality solutions while reducing system downtime and improving overall user experience. Passionate about CI/CD automation, driving process improvements, and optimizing business workflows through close teamwork and stakeholder engagement.

EDUCATION:

Master in Information Systems

Central Michigan University, MI

May 2024

Bachelor of Science in Computer Science & Engineering

GITAM University, India

May 2019

EXPERIENCE:

Cisco Systems, USA

July 2024 – Present

SAP Analyst

- Led multiple integration projects using SAP Cloud Platform and SAP Integration Suite, reducing data silos and enhancing process efficiency across business functions.
- Deployed custom extensions on SAP BTP to ensure seamless integration with core SAP systems, minimizing downtime during updates and maintaining business continuity.
- Developed custom applications using SAP Fiori/UI5 and SAP Cloud Application Programming Model (CAP), improving user experience and operational efficiency in various departments.
- Directed data migration and transformation projects leveraging SAP HANA and SAP BW/4HANA, ensuring data integrity and consistency while consolidating legacy systems and optimizing data storage.
- Implemented APIs (REST, SOAP, OData) to enable seamless data exchange between SAP and non-SAP systems, improving system interoperability and data flow.
- Created interactive dashboards and reports in SAP Analytics Cloud (SAC), providing real-time insights to stakeholders and enabling data-driven decision-making. Conducted complex data modeling and visualization to identify trends and support business planning.
- Established CI/CD pipelines using Jenkins and GitLab, automating testing and deployment processes to reduce release times by 30% and enhance software quality.
- Facilitated workshops with business users to gather requirements, map SAP S/4HANA processes, and optimize workflows, improving operational efficiency across business units.

Accenture, India

July 2019 – Dec 2022

SAP SD/MM Consultant

- Managed and resolved SAP SD-related incidents and service requests, ensuring timely issue resolution and efficient system performance.
- Led supplier onboarding and enablement on SAP SD, optimizing procurement and order fulfillment processes to enhance vendor collaboration.
- Configured and customized SAP SD/MM modules, including master data management, pricing procedures, and order-to-cash (O2C) processes to align with evolving business needs.
- Acted as the primary liaison for vendors, addressing queries, troubleshooting concerns, and ensuring seamless SAP SD operations.
- Expertise in intercompany postings and SAP SD integration with other modules, improving end-to-end business process efficiency.
- Conducted root cause analysis and troubleshooting of SAP SCM service failures, ensuring smooth production and supply chain operations.
- Provided training to suppliers and internal stakeholders on SAP SD functionalities, while maintaining detailed documentation for process standardization and best practices.
- Hands-on experience in SAP SD, MM, and PP modules, supporting seamless cross-functional operations.
- Proficient in SAP SD Idoc monitoring, ensuring smooth EDI (Electronic Data Interchange) communication between systems.
- Debugged and resolved technical issues within SAP SD/MM integrations, minimizing disruptions and improving overall system reliability.

TECHNICAL SKILLS:

SAP Components:	SAP S/4HANA, SAP Integration Suite, SAP Fiori/UI5
Programming Languages:	ABAP, JavaScript, HTML, CSS
Data Management:	SAP HANA, SAP BW/4HANA, Data Analytics, Data Migration & Transformation
ETL Processes Development:	SAP Fiori/UI5, SAP Cloud Application Programming Model (CAP), SAP Analytics Cloud (SAC)
Integration:	REST, SOAP, OData, API Management, SAP SD/MM Integration
Analytics:	SAP Analytics Cloud (SAC), Reporting and Visualization, Data Modeling
Cloud Platforms:	AWS, Azure
DevOps:	CI/CD Tools and Processes, Jenkins, GitLab
Business Process Management:	SAP S/4HANA, BPM Knowledge, SAP SD/MM Configuration

PROJECTS:

SAP System Configuration and SAP Plant Maintenance

Jan 2023 – Jul 2023

- Configured and customized SAP system as part of hands-on training, aligning business processes to optimize Plant Maintenance workflows.
- Independently extended business processes to SAP Plant Maintenance, focusing on equipment maintenance notifications and repair orders.
- Developed a streamlined process for generating and managing maintenance request notifications, improving issue resolution efficiency.
- Implemented the workflow for tracking and creating repair orders, ensuring timely maintenance and minimizing downtime.
- Integrated material and labor cost postings into repair orders, enabling accurate financial tracking and seamless SAP reporting.

Varsity Vault (Central Michigan University)

- Designed and developed an intuitive user interface using Tkinter, replicating the functionality of Facebook Marketplace with key features such as navigation menus, search bars, and item details.
- Integrated an SQLite backend database to manage product listings, user profiles, and transactions, utilizing SQL queries for efficient data handling and updates.
- Enhanced user experience by adding interactive elements such as buttons for posting items, messaging, and advanced search filters for category or price-based browsing.
- Leveraged Tkinter widgets like Listbox, Entry, and Button to enable a seamless interface, enhancing functionality for both buyers and sellers.

CERTIFICATIONS:

- RPA Business Analyst Foundation
- RPA Citizen Developer Foundation
- Celonis Academic process fundamentals
- SAP Certified Associate - Business Process Integration with SAP S/4HANA
