

LEO STANY M

SOFTWARE – SENIOR DATA ENGINEER

PROFESSIONAL SUMMARY

A seasoned technology professional with 10+ years of experience, currently specializing in Data Engineering with AI, encompassing the design and implementation of robust data pipelines and scalable data solutions. Possesses a strong foundation in Full Stack development, leveraging expertise in Java, Spring Boot, and Angular to facilitate end-to-end data product delivery. Demonstrated proficiency in Azure Cloud Data services, Big Data technologies (Hive, Spark, Hadoop), and data warehousing principles. Adept at optimizing data processing workflows and translating intricate business requirements into actionable, data-driven strategies. Skilled in Agile methodologies with a steadfast commitment to continuous technological advancement and the delivery of high-impact data solutions.

WORK EXPERIENCE (10+ YEARS)

DATA ENGINEER 3

DEC 2022 - PRESENT

Hewlett-Packard Inc

- Engineered and deployed robust ETL data pipelines on on-premises Hadoop (Hive, Spark, Talend) and Azure Cloud (ADF, ADLS, Azure Databricks, ASA), reducing data processing time by 20% and optimizing resource utilization, resulting in an estimated \$35,000 annual cost savings.
- Implemented optimized data storage solutions using ORC, Parquet, and Delta formats on ADLS and Databricks Delta tables, improving data retrieval efficiency by 15% and reducing storage footprint by 10%.
- Designed and developed scalable staging, historical, and point-in-time tables following Medallion architecture, achieving a 25% improvement in data query performance through SQL performance tuning, and automated deployments via GitHub.
- Collaborated cross-functionally with IT DevOps, platform, business units, and support teams, streamlining Agile (Scrum) development processes, delivering projects 10% under budget and 5% ahead of schedule, enhancing team productivity by 15%.
- Served as a key Subject Matter Expert (SME) for critical data domains including Supply Chain (Orders & Shipments, Procurement sourcing), Finance (Royalties and Rebates, General Ledger Journal Entry), providing strategic guidance and ensuring data integrity, minimizing data discrepancies by 12%.

KEY TECHNICAL SKILLS

Data Engineering & Cloud:

- Azure Databricks
- Azure Data Factory (ADF)
- Azure Data Warehouse & Database
- PySpark, Spark SQL
- Hadoop Ecosystem (Hive, Sqoop)
- RDBMS (Microsoft SQL Server, SAP HANA)
- Streaming Sources (S4IDH, Kafka, Solace Pub-Sub+)
- Talend
- Power BI

Software Development & Web:

- Java (7, 8, 11), J2EE
- Spring Boot, Spring MVC
- Angular (JS), HTML, CSS
- Linux, Shell Scripting
- Redis

Version Control & Tools:

- GitHub (Enterprise)
- SVN
- MS Excel
- Informatica (ETL)

DATA INTEGRATION ENGINEER

OCT 2017 - NOV 2022

Hewlett-Packard Inc

- Delivered Finance applications (Payroll/Tax), reducing processing time by 15% and ensuring 100% tax compliance.
- Led data center migrations, improving system uptime 20% and minimizing support requests 25% via knowledge transfer.
- Provided SME guidance for critical Finance applications, reducing errors by 10%.

IT DEVELOPER/ENGINEER I b

DEC 2014 - SEP 2017

DXC. TECHNOLOGY (EIT SERVICES)

- Developed E-commerce web applications (Java/Spring/Angular), improving load times by 18%.
- Engineered Java applications for efficient BMI data streaming, reducing latency by 22%.
- Migrated JSP application to Angular/Spring, enhancing maintainability by 30% and accelerating deployments by 15% (Agile).

PROJECTS

ODYSSEY – SPEND ANALYTICS, ICERTIS-CLM, SUPPLIER HIERARCHY

ROLE: DATA ENGINEER

JAN 2024 – PRESENT

- Spearheaded a 10-person team in developing ADF and DLT pipelines via SAP Data Intelligence and ODW to ingest data from databases, APIs, and BLOB storage, implementing data transformations, and generating Delta tables for PowerBI consumption
- Engineered fact and dimension extracts for Jaggaer and Icertis systems, enhancing procurement visibility by 15% and optimizing spend management, resulting in \$35M annual savings

TOOLS/TECHNOLOGIES

HP ABCR 2.0, SAPDI, ADLS Gen2, ADF, Azure Databricks, Spark SQL GitHub, SAP HANA, S4IDH

PHYSICAL AND MATERIAL MOVEMENTS – SUPPLY CHAIN

ROLE: DATA ENGINEER

OCT 2023 – DEC 2023

- Integrated data from SAP ODW P1 and S4IDH streaming sources, successfully decommissioning a legacy system and streamlining data workflows.
- Engineered data pipelines to develop certified tables and an Analytical Data Warehouse (ADW), including designing necessary tables, artifacts, and transformation logic.

TOOLS/TECHNOLOGIES

HP ABCR 2.0, ADLS Gen2, ADF, Azure Databricks, Spark SQL, PYSPARK, GitHub, SAP HANA, S4IDH and AZURE ADW

DATA MIGRATION FROM ENTERPRISE DATA LAKEHOUSE TO FEDERATED DATA LAKEHOUSE

ROLE: DATA ENGINEER

MAY 2023 – SEP 2023

- Directed an 8-person team in developing an Azure Data Factory (ADF) framework for real-time streaming data, ensuring certified data delivery.
- Orchestrated the migration of historical data from EDL to FDL and contributed to the decommissioning of legacy systems, achieving \$50,000 in annual cost savings.

CERTIFICATION/BADGES

- AZ900 - Azure Fundamentals
- DP900 - Azure Data Fundamentals
- Lakehouse Fundamentals

LEARNING/INTEREST

- Generative AI in Databricks
- DP700 – Microsoft Fabric Data Engineer Associate

TOOLS/TECHNOLOGIES

HP ABCR 2.0, ADLS Gen2, ADF, ASA, Azure Databricks, GitHub, hive, SAP HANA, MSSQL-Azure Data Warehouse and Database

SMALL INVESTMENT PROJECTS – CCA, CSC PRODUCTS

ROLE: DATA ENGINEER

DEC 2022 – APR 2023

- Directed a 2-person team to engineer the data ingestion layer, developing landing, loading, reject, and history processes.
- Optimized distillation and consumption layer queries and devised a strategic plan to load 5 billion historical records (5 years), ensuring data integrity and performance.

TOOLS/TECHNOLOGIES

HP ABCR 1.0, Hive, SAP HANA, SLT HTPDI, Talend EDL, GitHub, MSSQL-Azure Data Warehouse and Database and Power BI

HRDD SHARED FOLDERS (UI AND API)

ROLE: FULL STACK DEVELOPER

MAR 2022 – NOV 2022

- Engineered front-end components and services for file management, including shared folder and file listing, custom preview, download, archive/unarchive, and upload functionalities, enhancing user productivity by 15%.
- Architected back-end controllers, services, repositories, and data models to efficiently process data from SQL databases.

TOOLS/TECHNOLOGIES

Angular 12, Typescript, HTML, CSS, Spring Boot, JAVA 11, JPA, GitHub and SQL

PROJECT SIMPLIFY – ESPP AND PEOPLEHUB PROCESS AUTOMATION

ROLE: DATA INTEGRATION ENGINEER

FEB 2021 – FEB 2022

- Engineered a generic Informatica workflow, consolidating 29 country-specific workflows, reducing maintenance overhead by 90% and accelerating data processing by 25%.
- Developed optimized Data Manipulation Language (DML) queries to extract data from core tables for efficient Informatica workflow processing.
- Architected a standalone application to consume Solace Pub-Sub+ queue messages and generate files, implementing subscribe, count, and delete queue functionalities for enhanced data management.
- Automated file preprocessing and Informatica workflow execution using shell scripts, streamlining data ingestion and database loading processes.
- Designed and implemented hierarchical data structures (tables, stored procedures) to efficiently load core application tables, improving data retrieval speed by 18%.

TOOLS/TECHNOLOGIES

Informatica, Spring Boot, Java, Solace Pub-Sub+, Oracle SQL, Shell Scripts, SVN and Tidal

EDUCATION

GOVERNMENT COLLEGE OF ENGINEERING, ERODE

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE

AUG 2010 – APR 2014
