Luckyomike2@gmail.com 

(469)645-8230

SUMMARY

- A motivated and proactive individual with 7 years' experience in Business Intelligence with focus on designing, developing, testing, and maintaining BI solutions.

CORE QUALIFICATIONS

- SQL, T-SQL, SSIS, SSRS, Power BI, Azure, Snowflake, Azure Data Factory, Power Automate, Power App

EDUCATION

BS IN INFORMATION TECHNOLOGY
University Of Ilorin

2008

CERTIFICATION

- MICROSOFT CERTIFIED: POWER BI DATA ANALYST ASSOCIATE – PL 300

WORK HISTORY

2022 - PRESENT DATA ANALYTICS CONSULTANT

ANALYTICS8

REMOTE

- Collaborate with the organization by making strategic data-related decisions by analyzing, manipulating, tracking, internally managing and reporting data.
- Analyze reporting requirements using SQL Datasets and develop various Dashboards.
- Create and utilize SQL queries to pull and create a dataset used by various departments.
- Enhance performance using optimization techniques-normalization and indexing.
- Perform tuning of Queries and Stored Procedures as well as ETL packages.
- Involved in creating new stored procedures and optimizing existing queries and stored procedures.
- Use SSIS tool to create packages to extract data from different sources, transform data and load data to data warehouse databases.
- Work with development team in the creating and modification of coding standards for the team to ensure consistency, efficiency, improvement, and accuracy in reporting and data analysis.
- Involve in extraction, transformation and loading of data directly from different database and source systems like Flat files, Excel, Oracle, SQL Server.
- Migrating data from Azure data lake into Azure Synapse using Azure Data Factory.
- Develop PowerApps canvas and model driven applications. Develop PowerApps list-based applications as well as Power Automate flows designed to run based on events in SharePoint Online or from PowerApps application.
- Create Power BI Dashboards, Custom reports, Scorecards & KPI Reports using data from different sources like SQL Server, Excel, CSV.
- Develop analysis reports and visualization using DAX functions like table function, aggregation function and iteration functions.

- Use Power BI Gateways to keep the dashboards and reports up to date.
- Publish reports and dashboards using Power BI.
- Involved in creating database objects like tables, views, procedures, triggers, and other functions using T-SQL to provide definition, structure and to maintain data efficiently.
- Design and implement a BI solution for users in collaboration with a team of developers.
- Use JIRA tool to create updates track project progress.
- Translate data into visual representation of information and present it to appropriate department.
- Strong problem solving and analytical skills.

2020 - 2022

NESTLE

SENIOR REPORT DEVELOPER

REMOTE

- Participated in delivery of a broad range of Data, Analytics, Advanced Analytics, Visualization and Data Engineering
- Conducted detailed analyses to understand and explain client problems and utilize standard consulting management skills such as facilitation, interviewing etc.
- Actively contribute to the creation of client proposals for consulting and/or transformation engagements focused on Data Analytics
- Monitored technology trends and raise awareness of capabilities and innovations in selected domains of expertise and contribute towards industry specific offerings.
- Designed and built ETL packages in SSIS to load data to data warehouse for dashboard reporting.
- Scheduled for ETL package to run automatically using SQL Server job agent.
- Developed queries such as CTE, stored procedures and views for reporting purpose.
- Conducted code review based on companies' standard.
- Designed, developed, and established KPIs to monitor analysis and provide strategic insights to drive growth and performance.
- Ability to Identify and evaluate opportunities to enhance the business through cross-group collaboration.
- Created and rendered reports in different formats like pdf, excel etc. to be executed automatically on weekly or monthly basis and managed subscriptions.
- Generated Sub-Reports, Drilldown reports, Drill through reports and Parameterized reports using SSRS.
- Developed visual reports, dashboards and KPI scorecards using Power BI desktop
- Created paginated reports using Power BI Builder and SSRS
- Connecting to data sources, importing data, and transforming data for Business Intelligence
- Experience in user request collection and fulfillment, creation, enhancement, and maintenance of Power BI reports.
- Requirements gathering and analysis; design methodology, testing, documentation, and deploying report solutions.
- Power BI development and administration such as scheduling refresh, granting users access to report and workspace and subscribing users to report.

2018 - 2020

DELOITTE

DATA ANALYTICS CONSULTANT

DALLAS, TX

- Ability to work directly with the business to define and drive initiatives, using data analytics to tell stories and lead decisions.
- Design, build, launch, and maintain reliable business intelligence solutions that provide insights across organization and cross-functional global teams.
- Gathering and writing business requirement document
- Writing/documenting user reference guide

- SQL Development - Writing SQL queries like CTE (Common Table Expression), Views and Stored Procedure
- Used SSIS to create ETL packages to validate, extract, transform and load data to data warehouse databases.
- Configured packages with checkpoints, package logging, error logging and event handling to redirect error rows and fix the errors in SSIS.
- Providing reports through Power BI applications to improve business processes.
- Analyzing business requirements, processes and recommending solutions to the management and executives for implementation
- Creating and maintaining documentation that includes the design, requirements, and user manuals for the organization.
- Developing visual reports, dashboards and KPI scorecards using Power BI desktop.
- Connecting SSRS and Power BI to data sources such as excel, SQL, Azure, SharePoint, for Business Intelligence development.
- Proficient in creating DAX queries in Power BI desktop.
- Adept in developing, publishing, and scheduling Power BI reports, per business requirements.
- Able to properly understand the business requirements and develop data models or work with the Data warehouse team on data modeling.
- Should have knowledge and experience in prototyping, designing, and requirement analysis.
- Develop dashboards through business intelligence tools for analysis and providing insight to our teams.

2017 - 2018

AMERICOLLECT

BUSINESS INTELLIGENCE DEVELOPER

DALLAS, TX

- Experience with SQL Server 2017 and 2019
- Experience with developing, implementing, and optimizing stored procedures and functions using T-SQL
- Experience reviewing and interpreting ongoing business report requirements.
- Experience building appropriate and useful reporting deliverables.
- Experience analyzing existing SQL queries for performance improvements.
- Ability to suggest new queries.
- Experience developing procedures and scripts for data migration.
- providing timely scheduled management reporting
- Build ETL (Extract, Transform and Load) tools from diverse databases and dynamic reports to further enhance the data insights for stakeholders.
- Apply expertise in data visualization and visual storytelling to build business intelligence solutions that deliver actionable insights with high-performance and usability.
- Intelligently design data visualizations that focus on usability and ease of interpretation.
- Monitor, track, and communicate the project progress, risks, and completion of projects to stakeholders and cross-team members.
- Implement inclusive data quality checks to ensure high quality and build trust in the dashboards and analytics.
- Collaborate with Data Analysts, cross-team engineers to identify data sources, build scalable data models, and operationalize the data analytic.
- Lead peers in scoping problems by identifying key issues, inputs, stakeholders, and outcomes.
- Manage security and privacy standards for the BI solutions through administrative responsibilities.
