PROFESSIONAL EXPERIENCE

Summary:

Results-driven Sr. Cybersecurity Analyst with extensive experience in incident response, digital forensics, network, and email security. Adept at leveraging advanced Cybersecurity tools, including Splunk, Carbon Black, Source Fire, FireEye, QRadar, Proofpoint, RSA, ATA, and Menlo, to detect and mitigate security threats. Skilled in identifying indicators of compromise and root cause analysis to protect sensitive data and ensure organizational security. Proven ability to lead incident response efforts, collaborate cross-functionally, and communicate effectively with stakeholders. Committed to maintaining the highest levels of security for mission-critical systems and data.

US Citizen (Y); Army Service: 2002-2016 (Disabled Vet)

Clearance: Top Secret/ Sensitive Compartmental Information (TS/SCI)

Education:

- **Master of Science in Cybersecurity;** Webster University; 2020
- **Bachelor of Science in Business and Information Technology;** Columbia Southern University; 2016

Certifications:

- | | |
|--|------------------------|
| • Certified Ethical Hacker (CEH) | Expires 7/2026 |
| • Certified Network Defense Architect (CNDA) | Expires 7/2026 |
| • CompTia Security + | Expires 10/2025 |
| • CompTia A + | Expires 10/2025 |
| • IT Infrastructure Library (ITIL) | Lifetime Certification |

Sr. Ops Watch Analyst

01-2023 – Present

Adapt Forward

- Proficient in utilizing a wide range of Cybersecurity tool sets (Splunk, EnCase, Menlo, ePO, Armis, Azure Sentinel, Microsoft Defender “MDE”) for Incident detection, root cause analysis, and threat mitigation.
- Conducted diligent network and host based forensics using tools such as Splunk, EnCase to investigate critical incidents across the customers network.
- Mentored junior analysts, fostering their proficiency with an ever growing Cybersecurity tool set. Reducing dwell time between alerts and improved SLA productivity through enhanced incident response processes and proactive threat detection.
- Meticulously handled a variety of ServiceNow (SNOW) requests, including unblocks, email phishing incidents, and decryption bypasses, with approval or denial determined on a case by case basis.
- Provided guidance on ways to improve indicator logic, reducing the amount of false positives impacting the Security Incident Event Management (SIEM) platform.

Cybersecurity Engineer Tier III (Lead)

09/2020 – 12/2022

CACI

- Oversaw a team of eight personnel to ensure continuous monitoring of network and systems logs were analyzed for potential security risks and vulnerabilities via advanced security tools (ArcSight, Splunk, Carbon Black, Elastic).
- Trained analysts on security tools which improved service level agreement (SLA) times by decreasing dwell times in the logging queue's. Leading to faster response on indicators that could pose security concerns in the environment.
- Collaborated with a multi-faceted teams to ensure Cyber threat intelligence findings were written as indicators of compromise (IoC) to ensure vulnerabilities across the agency were covered.
- Spearheaded the coordination, execution of containment procedures on positive security incidents observed impacting the enterprise.

Cyber Incident Response (CIRT)

11/2018 – 09/2020

ManTech

- Leveraged Endpoint Detection tools (MDE, Carbon Black) to identify, track, and mitigate insider threats ensuring proactive defense and minimizing security concerns against the agency.
- Proficient in conducting root cause analysis on Cybersecurity tasks and events, driving effective incident response procedures that minimized the impact to business operations and ensured operational continuity.
- Generated post incident reports, with detailed time frames of correlated security event data which spearheaded remediation steps and recommendations to improve response times across the security operations center (SOC).
- Conducted dynamic and static malware analysis using FireEye sandbox and other forensic tools to identify malicious threats, develop indicators of compromise which provided actionable intelligence to the content creation team.

Cyber Defense Analyst

11/2017 – 11/2018

ManTech

- Responsible for monitoring and analyzing real-time security events across the agency networks using ArcSight to identify potential threats and vulnerabilities in log data.
- Further amplified endpoint detection response through Microsoft Defender, Carbon Black, and ePO swiftly identifying, responding and mitigating host based incidents to reinforce network security.
- Extremely proficient in analyzing network data, extracting packet captures (pcap) and leveraging wireshark to dissect and reconstruct the communication for further analysis.
- Expertly handled the "Fire Eye" suite to detect, analyze and respond to threats, conducting in-depth investigations on malicious behavior, emails, and network activity.

Cyber Security Analyst

11/2016 – 10/2017

Apex

- Became proficient in utilizing security tools such as ArcSight, Sourcefire, FireEye, McAfee and Splunk to analyze and mitigate threats to the Department of Defense Information network (DoDIN).
- Performed in-depth kill chain analysis of malicious traffic and security events to determine their root cause, identifying sources and threat potential of reoccurring events.
- Monitored, analyzed, and responded to network traffic from over 100 global military and defense assets, ensuring prompt detection and mitigation of emerging security threats.
- Handled Cyber tasking from JFHQ-DODIN, ensuring effective analysis and response to network security incidents in support of national defense operations.
