

MAHABOOBA SULTANA BEGUM SYED

Phone: +1-9733173780

Email: mahaboobasultana@gmail.com

Parsippany, NJ 07054

Education

BE, COMPUTER SCIENCE & ENGINEERING, LBCE, MYLAVARAM, IN, 2007

Key Skills

Domain Expertise: Banking and Telecom

Certifications: Microsoft Azure Fundamentals | Certified SAFe® 5 Practitioner

Cloud Platforms: Microsoft Azure (App Insights, Key Vaults, Cosmos DB, SQL Database, Service Principals, Managed Identities, Storage Accounts)

Automation & Testing: Selenium, TestNG, Rest Assured, Postman, Maven and JMeter for performance testing

Programming & Scripting: C++, Java, Shell Scripting, JavaScript

Databases: DB2, Oracle, SQL Server

Test Management & DevOps Tools: HP ALM, JIRA, Azure DevOps (ADO) Boards, VersionOne, GitHub

Web Services Testing: REST APIs, Postman, SoapUI

Application Servers: IBM WebSphere (Testing and Validation of Server Configurations and Application Deployments)

Operating Systems: Windows, Linux, AIX

Tools:

Profile

Test Lead with 15 years of experience delivering high-quality software solutions for enterprise clients at IBM. Adept in Test Automation, Azure Cloud Services, modernization of Legacy applications, migration projects and manual testing with a proven ability to lead cross-functional QA teams in Agile environments. Recognized for optimizing testing processes, ensuring compliance with data privacy standards, and fostering customer satisfaction. Certified in Microsoft Azure Fundamentals and SAFe® Agile practices.

Experience

Test Lead | 06/2009 - Current

Key Achievements & Responsibilities:

- **Testing Leadership:** Led comprehensive QA efforts for greenfield product development and maintenance within the FinTech domain, ensuring high-quality code deployments and product stability. Managed QA activities for mission-critical financial applications, ensuring the delivery of high-quality, fully tested solutions aligned with client requirements.
- **Client Engagement:** Acted as the primary QA liaison between project teams and clients, translating business requirements into test strategies and ensuring seamless communication.
- **Cloud Testing Expertise:** Extensively worked in the Azure Cloud environment, performing testing for App Services developed in Azure and configuring services such as App Insights, Key Vaults, Service Principals, Cosmos DB, and Azure SQL Database.
- **Requirement Enhancement:** With expertise on Legacy products, identified gaps in requirements during the Migration process and collaborated with Product Owners to enhance requirement definitions, leading to 20% fewer requirement ambiguities during development.
- **Legacy Application Cloud Migration:** Successfully modernized legacy applications that interfaced with DB2 by migrating them to cloud-native applications leveraging Azure App Services and Azure Cosmos DB, ensuring seamless data integration, and robust end-to-end validation through comprehensive functional
- **Product Modernization:** Led the modernization of applications, transitioning them from C++ to Java technology with zero-defect releases, to ensure seamless functionality and improved performance.
- **Version control System:** Experience in using GitHub tools like GitHub Desktop to pull, push, merge, review code changes and many other actions.
- **WebSphere Application Server Network Deployment (WAS ND) to WebSphere Liberty:** Led the migration of enterprise applications from WebSphere Application Server ND to WebSphere Liberty, optimizing performance, reducing infrastructure costs, and ensuring seamless deployment through rigorous compatibility and regression testing.

- ✓ Microsoft SQL Server Management Studio (SSMS)
- ✓ MQ Explorer
- ✓ Ultra Edit
- ✓ X9Viewer
- ✓ Eclipse
- ✓ DB Visualizer
- ✓ SQL Developer
- ✓ IBM Content Management OnDemand (CMOD)
- ✓ IBM FileNet
- ✓ Snowbound
- ✓ WinSCP
- ✓ FileZilla
- ✓ MT putty
- ✓ ServiceNow

Languages

English – Professional

- **CI/CD & DevOps Integration:** Partnered with DevOps teams to implement CI/CD pipelines in Azure and Strong participation in implementing CI/CD using Azure DevOps to automate the deployment process.
- DevOps, reducing release deployment time from 2 weeks to 3 days
- **On-Premises Application Testing:** Provided expert testing and maintenance for client applications in an on-premises environment, including the storage and retrieval of checks and the National Settlement System.
- **Database Testing:** Performed complex backend testing and data validation tasks using SQL queries on DB2 and Oracle databases, ensuring data integrity and accurate reporting.
- **Operating Systems & Command Expertise:** Utilized AIX and Linux command-line expertise for testing and troubleshooting across multiple environments.
- **Automation & Test Case Optimization:** Developed robust automation frameworks using Selenium and TestNG, reducing the testing cycle time by 40% and increasing regression test coverage by 50% and experience in automation strategies using Maven, Rest Assured, and Postman, significantly reducing manual testing efforts.
- **Web Services and API Testing:** Conducted comprehensive Web Services testing and automated API testing with Postman, SoapUI and Rest Assured.
- **IBM Product Expertise:** Extensive experience with IBM Content Management OnDemand, IBM FileNet, and FileNet interfaces such as FileNet Enterprise Manager, FileNet Administrative console for Content Engine, and Workplace XT.
- **Technologies:** Experience as a C++ Developer and Shell Scripter. Developed a POC for test automation using Shell Scripting, optimizing testing workflows for key applications.
- **Test Strategy Development:** Created and maintained holistic test strategies covering scope, risks, dependencies, planning, execution, and quality metrics.
- **Iteration Planning & Test Management:** Managed scope, planning, tracking, and reporting for projects using VersionOne and Azure DevOps (ADO) Boards, tracking Features, Stories, Tasks, and test cases and expertise in using HP ALM for test case management and reporting.
- **Client-Focused Quality Assurance:** Proactively resolved customer-facing issues, contributing to high customer satisfaction rates and delivered high-quality releases.
- **Collaboration & Communication:** Partnered with developers to troubleshoot complex issues, reducing the defect turnaround time and maintained effective communication between project teams and clients, reporting progress, identifying risks, and resolving blockers to ensure timely deliveries.

Developer | 06/2007 – 06/2009

Key Achievements & Responsibilities:

- **Telecom Application Development:** Developed and enhanced Protel applications on the Advanced Telecommunication Architecture (ATCA) platform for GSM-HLR (Home Location Register) systems, which managed subscriber information for call validation and routing.
- **Defect Analysis & Resolution:** Identified, analyzed, and resolved software defects, contributing to improved system stability and performance.
- **Shell Scripting Integration:** Developed shell scripts to automate and streamline interactions with the applications, improving development efficiency.
- **Client Deliverables:** Delivered high-quality, maintainable code and detailed technical documentation for feature enhancements and bug fixes.
