

Manish Dharmadhikari

Certified Lead Auditor ISO 9001, AS9100, ISO 14001 | Six Sigma Black Belt | Scrum Master | SAP HANA Certified

manish.dharmadhikari2@gmail.com | Dallas, TX | 9725896809

Summary

Dynamic Quality Manager with extensive-experience leading quality initiatives in manufacturing environments. Proven record in the development and implementation of Quality Management Systems (QMS) including ISO 9001, ISO 13485, IATF 16949, and AS9100. Expert in Lean Six Sigma transformation and executing comprehensive business strategies for quality improvements across manufacturing, supplier, design, and process quality. Recognized for achieving high customer retention and driving revenue growth.

Proud alumni of **The University of Texas Dallas** with **Master of Science** in Systems Engineering and Management. Served as a member of **top management** by reporting to President of the company in the role as **Quality Head for the plant**.

Core Competencies

- | | | |
|--------------------------------|----------------------------------|-----------------------------------|
| ▪ Management Representative | ▪ DeFOA, QN, NCMR Management | ▪ Team Leadership and Performance |
| ▪ Manufacturing Quality Leader | ▪ CAPA Coach | ▪ AS9100, IATF 16949 |
| ▪ Stakeholder Management | ▪ ISO 9001, ISO 14001, ISO 13485 | ▪ Lean Six Sigma Methodology |
| ▪ Excel, Power BI, Power Apps | ▪ Windchill, QCM TrackWise | ▪ MES, DHR, BR, DMR Management |

Academic Qualification

Master of Science - Systems Engineering and Management	Distinction
<i>The University of Texas at Dallas, USA</i>	<i>(Tier 1 University)</i>

Bachelor of Technology - Mechanical Engineering	Distinction
<i>Maharashtra Institute of Technology, Aurangabad, India</i>	<i>(NAAC Grade 'A')</i>

Industry Experience

Consultant – Aadiya Consulting LLC (Plano, TX)	Aug 2024 – Present
---	---------------------------

- **CAPA Process Management:** Developed, implemented, and managed Corrective and Preventive Action (CAPA) processes, ensuring timely and effective resolution of quality issues to minimize impact on operations.
- **Root Cause Analysis:** Comprehensive investigations conducted to identify root causes of non-conformities, deviations, and customer complaints, leading to actionable insights and effective solutions.
- **Strategic Planning:** Executed SWOT analyses and developed business plans utilizing a risk-based approach to inform decision-making and prioritize quality initiatives.
- **Continuous Improvement Leadership:** Championed continuous improvement initiatives focused on enhancing product quality and operational efficiency, driving measurable results across the organization.

Manufacturing Quality Specialist – Philips (Pune, MH)	May 2024 – Aug 2024
--	----------------------------

- **FDA Site Readiness Project:** Led the implementation of the FDA Site Readiness Project, known as Project Sunrise, ensuring compliance with regulatory standards and readiness for inspections.
- **Cross-Functional Collaboration:** Drove corrective and preventive actions (CAPAs) by collaborating with all levels of the organization and cross-functional teams, fostering a culture of quality and accountability.
- **Defect Analysis Integration:** Integrated Defects on Arrival and Service Defects analyses into the production process, enabling continuous improvements and enhancing product reliability.
- **CAPA Management:** Oversaw CAPA tracking, coordination, and closure, along with managing change controls and deviations to ensure effective resolution and compliance.
- **Batch Release Support:** Assisted in the timely release and disposition of batches, as well as supporting post-execution activities to maintain operational efficiency.

Manufacturing Quality Consultant – PwC (Bangalore, KA)	Dec 2021 – Nov 2023
---	----------------------------

- **QMS Strategy Advisory:** Advised clients in the Automotive, Aerospace, and Medical Device sectors on Quality Management System (QMS) strategies for effective program management, including creation of SOPs, WI, Process Maps, and SWOT.
- **eQMS and DQMS Implementations:** Successfully implemented eQMS and DQMS systems for clients.
- **Comprehensive Advisory Services:** Provided expert advisory services in key areas such as manufacturing planning, strategic initiatives, lean manufacturing, warehouse and materials management, product lifecycle management, and plant operations.
- **Business Development Support:** Developed compelling business development presentations on Operations Excellence and Manufacturing, aiding in the proposal process for new client engagements and collective savings of \$138 Million.

Quality Manufacturing Engineer - GKN Aerospace (Pune, MH)

Aug 2021 – Dec 2021

- **Time Registration Framework Implementation:** Implemented a time registration framework for the production lines of Airbus, Boeing, and Collins, effectively managing over 200 operators to enhance tracking and efficiency.
- **Policy and Procedure Design:** Developed and implemented policies and procedures utilizing Kanban principles for production and warehouse areas, optimizing workflow and inventory management.
- **Productivity Improvement Leadership:** Led a team of six team leaders to achieve a 20% increase in productivity while significantly enhancing the employee learning curve through targeted training and development initiatives.
- **Aerospace Product Classification Roadmap:** Assisted the Plant Head and senior management in creating a comprehensive roadmap for the Scmet 5 classification of aerospace products, ensuring alignment with industry standards.
- **Regulatory Compliance Review:** Conducted thorough reviews of ITAR and EAR regulatory compliance during AS9100 audits, providing detailed reporting on compliance status and identifying areas for improvement.
- **AS9100 Conformance Planning:** Developed a strategic plan for AS9100 conformance at the plant level, overseeing internal auditors to ensure adherence to scope, schedule, and budget constraints.

Plant Quality Manager – dbSpectra (Dallas, TX)

July 2017 – July 2021

- **CAPA Program Development:** Designed, implemented, and monitored the end-to-end execution of a CAPA program, including process maps, SOPs, work instructions, and SIPOC diagrams. Conducted weekly, monthly, quarterly, and annual reviews to foster a culture of continuous improvement.
- **Quality and Environmental Management Systems Implementation:** Successfully designed and implemented Quality Management (ISO 9001:2015) and Environmental Management Systems (ISO 14001:2015), achieving certification for both standards.
- **CAPA Leadership Roles:** Served in multiple capacities including CAPA Owner, CAPA Coach, CAPA Approver, and Chair of the Change Review Board (CRB), facilitating cross-functional team reviews for CAPA approvals.
- **KPI Reporting to Management:** Reported CAPA key performance indicators (KPIs) to top management, including the CTO and CEO, to enhance visibility and drive accountability in quality initiatives.
- **Regulatory Compliance Planning:** Developed a comprehensive compliance plan by reviewing and implementing local, state, and federal regulations regarding the purchase, storage, use, removal, and recycling of materials, in collaboration with external consultants and subject matter experts.
- **Quality and Environmental Policy Creation:** Created the company's Quality and Environmental Policy, obtained sign-off from the president, and trained all employees on policy implementation tailored to their specific job roles.
- **SWOT Analysis Facilitation:** Conducted SWOT analyses with top management to identify strengths for business development, growth opportunities in new markets, potential threats to mitigate risks, and weaknesses to prioritize focus areas for business planning.
- **Risk Management Documentation:** Documented risk management plans in a risk register, utilizing Risk Priority Number (RPN) methodology to quantify and prioritize risks effectively.
- **Stakeholder Liaison and Project Management:** Prioritized initiatives based on business needs, serving as a liaison between stakeholders and users. Managed competing resources and priorities while monitoring deliverables to ensure timely project completion.
- **Work Instruction Development:** Developed over 20 detailed work instructions for critical product lines, resulting in a 50% reduction in on-the-job training time, a 15% improvement in production throughput, and effective resolution of project challenges to minimize delays.
- **Traceability Implementation:** Implemented traceability processes across the organization from order picking to shipping, achieving a 10% year-over-year reduction in returned material authorizations, and presented findings to senior management.
- **Vendor Category Development:** Established a dedicated category for plating process vendors, implementing enhanced controls such as plating thickness measurements and material certifications for processes including silver plating, anodizing, tri-metal plating, and bright finish.
- **Vendor Qualification and Evaluation:** Qualified vendors based on historical performance data and documented improvements, updating the Approved Vendors List to ensure compliance with quality standards.
- **Inbound Inspection of Aluminum Alloys:** Inspected various grades of aluminum alloys for inbound warehouse parts, assessing surface finish values to ensure adherence to quality specifications.
- **Vendor Performance Management:** Maintained and reported on vendor performance metrics, assigning classifications and tracking corrective action statuses to drive continuous improvement in vendor relationships.
- **Time Studies and Lean Implementation:** Conducted time studies on low-profit margin product lines, focusing on MUDA

(waste) reduction through Value Stream Mapping, 5S, Spaghetti Analysis, SMED, and Shadow Board tool management. Led Lean Daily Standups and utilized Visual Boards and Leader Standard Work techniques, resulting in a 20% reduction in non-value-added activities, in alignment with senior management recommendations.

- **Failure Mode and Effects Analysis (FMEA):** Performed FMEAs and design reviews to identify potential failure modes, initiating engineering change notifications and facilitating effective hand-offs from engineering to production through a risk management approach.
- **Audit Reporting and Follow-Up:** Created comprehensive reports for audits and presented findings to ensure accountability, assisting key area owners in enhancing their planning, organizational, and time management capabilities.
- **Employee Training and Development:** Trained over 70 employees, from supervisors to senior management, in analytical and conceptual thinking skills, design documentation, and Lean Six Sigma principles to enhance project execution and operational efficiency.

Internship - Southwest Airlines (DAL Airport, TX)

Jan 2017 – May 2017

Internship – Lufthansa Technik (Los Angeles, CA)

May 2016 – Oct 2016

Certifications

Certified Lead Auditor – AS9100:D (Aerospace Quality Management System)

Probitas Authentication

Certified Lead Auditor – ISO 14001:2015 (Environmental Management System)
