

Mounika Nookala

(+1) 708-808-0469 | nookalamonika9699@gmail.com | <https://www.linkedin.com/in/mounika-nookala->

PROFESSIONAL SUMMARY:

- Experienced Professional with over 6+ years of experience as an IT Security Professional in IT Infrastructure, Information Security, and Cyber Security.
- Experienced working in enterprise networking, server infrastructure, database technologies, system security, authentication, and security protocols, applied cryptography, and application security.
- Strong understanding of risk management and computer forensic tools, technologies, and methods.
- Expertise in Cyber Security & Information Assurance with deep Knowledge of Identity and Access Management security.
- Experienced in IT security design and implementation with a solid understanding of disaster recovery, intrusion detection systems (IDS), intrusion protection systems (IPS), and web application firewalls (WAF).
- Managed Endpoint Encryption for McAfee Network DLP, McAfee DLP Endpoint, McAfee SIEM.
- Deep understanding of vulnerabilities, malware, and EPS technologies with experience working on SolarWinds SIEM Security Information and Event Management Tools like IBM Qradar, Splunk, and RSA Archer
- Experienced in managing Symantec Endpoint Protection 12.1 for workstation clients in an enterprise environment, with expertise in analyzing IDS/IPS for threat detection and prevention.
- Excellent written and verbal communication skills, Analytical and problem-solving skills, highly motivated, fast learner, lead/work within a team environment.
- Enhanced and supported the Security Assessment Plan (SAP) and Plan of Action & Milestones (POAM) within eMASS for all Site-Owned ATO packages.
- Managed compliance and remediation for ACAS and HBSS configurations, while performing system configuration and maintenance for ACAS RHEL, HBSS Windows, and HBSS SQL database servers.
- Evaluate information systems for compliance with Defense Information Security Agency (DISA) Security Technical Implementation Guideline (STIG) and review measures needed to bring systems into compliance.

EDUCATION:

- **Bachelor of Engineering**, Computer Science and Engineering
- **MS Cybersecurity**, Cumberland University

CERTIFICATIONS:

- CompTIA CYSA+
- Cyber Security Fundamentals
- MS Azure Fundamentals
- Threat Hunting using Workstation

TECHNICAL SKILLS:

Event Management	Azure Sentinel, RSA Archer, Blue Coat Proxy, Norse, Splunk, NTT Security, LogRhythm
Security Technologies	CrowdStrike, Whitehat Web Security, NTT Security, McAfee, Endpoint Protection Suite
SIEM Tools	QRadar, ArcSight, Splunk, Azure Sentinel, Securonix
Endpoint /EDR	Symantec Endpoint Protection, Symantec ATP, CrowdStrike Falcon, Sentinel One, MS Defender
Firewalls	Fortigate, Checkpoint, Palo Alto
Ticketing and SOAR	ServiceNow, Jira and IBM Resilient, Palo Alto XSOAR, ArcSight SOAR, IBM SOAR, Fresh Service
Vulnerability Scanner	Rapid7, Nessus Security Center (Tenable), Qualys Guard Enterprise, Open VAS, Veracode, Burp Suite
Forensics Tools	Pestudio, Wireshark, VM fusion sandbox, ProcMon, AnyRun
Frameworks	NIST SP 800-171, ISO 27001/31000, HIPPA, HITRUST CSF, PCI DSS

PROFESSIONAL EXPERIENCE:

Security Analyst, LCPTracker INC, CA

Jan 2025 - Present

- Monitored Security Management Console for Security Operation Centre (SOC) Security vulnerabilities.
- Maintained the risk management framework, vulnerability, and risk assessment, while identifying and prioritizing critical risks and recommending security enhancements that reduced overall risk by around 25%.
- Developed cybersecurity standards on NIST frameworks and ensured their effective implementation to mitigate risks.
- Played a pivotal role in managing and transitioning of third-party/vendor risk assessment for data protection and retention mechanism leading to a 25% reduction in operational costs and a 20% improvement in data retrieval times.
- Demonstrated ability to analyze and respond to security incidents, leveraging insights from Microsoft Defender threat intelligence.
- Investigating Azure Intune for comprehensive vulnerability remediation concerning endpoints and applications, including features such as automated patch management, threat detection, and compliance monitoring.

Tools & Environment: Microsoft O365, Veracode, Forta, Azure Sentinel, Azure Intune, Burp suite, FreshService, Code42, Zscaler, Azure DevOps, Tenable

Information Security Analyst, United Healthcare, MN**Jan 2024- Dec 2024**

- Proficient in utilizing Azure Sentinel for advanced security analytics, including real-time threat detection and incident response.
 - Experienced in configuring and managing Azure Sentinel Workbooks, creating custom queries using KQL (Kusto Query Language), and setting up alerting mechanisms.
 - Conducted and monitored regular security training sessions for employees, raising awareness and reducing the likelihood of security incidents caused by human error by 20%.
 - Followed compliance for NIST800-53 moderate and high environments and ensured the team adhered to the compliance guidelines during development, implementation as well as assessment of relevant security controls.
 - Skilled in implementing and optimizing Microsoft Defender solutions for endpoint protection, identity security.
 - Adept at integrating Microsoft Defender with Azure Sentinel to enhance threat visibility and streamline security operations.
 - Conducted vulnerability scans on the network and coordinate the remediation of vulnerabilities with IT Administrators.
- Tools & Environment:** XSOAR, Palo alto URL filtering, Azure Sentinel, Proofpoint, Microsoft O365, Rapid7, CrowdStrike, Virtual Machines, Service now, Sandbox (Hybrid analysis and Virus Total, IP void, MX toolbox)

Information Security Analyst, Providence Global Centre, India**Jan 2021 – Dec 2022**

- Led the architecture and implementation of security solutions using Qualys and SIEM tools like Splunk, and Solutionary.
 - Managed third-party/vendor risk assessment for data security protection and retention mechanism, application authentication, access control, incident response, regulatory, and compliance.
 - Worked extensively on Identity and Access Management (IAM) compliance on account management, web access management, password management, and user provisioning systems using LANDesk, CyberArk, and Active Directory.
 - Responsible for the administration and configuration of critical enterprise security systems and software, including McAfee ePO, McAfee DLP, McAfee Complete Endpoint Protection-Enterprise, and Proofpoint.
 - Maintained Veterans Affairs Information system and Network, HIPPA Confidentiality, and Integrity via vulnerability.
 - Managed cybersecurity threats via Computer Security Incident Response Team (CSIRT), with responsibilities that included SIEM management, context filtering, web security, incident tracking, IPS/IDS, and malware analysis.
 - Provide expertise with incident response, security event monitoring, vulnerability management, asset security compliance and data loss prevention utilizing McAfee Nitro (SIEM), McAfee ePO, McAfee DLP.
 - Developed the architecture for DLP systems and created comprehensive documentation for DLP administration, including scanning, reporting, and remediation workflows.
 - Performed network and application penetration tests, combining manual testing, analysis, and exploitation with automated vulnerability scanning tools, including Nmap, Nessus, Metasploit/Metasploit Pro, and Burp Suite Professional.
- Tools & Environment:** CrowdStrike, Nmap, Burp Suite, VMware, GitHub, Python, Nmap, Service now, Azure Sentinel

SOC Analyst, Copart India Private Limited, India**Jan 2020 - Jan 2021**

- Configured and managed security tools and systems, leading to a 25% improvement in system reliability and availability.
 - Configured, upgraded, and fine-tuned DLP policies to meet evolving security needs and improve security metrics.
 - Developed and implemented processes for information security risk identification, classification, triaging, and mitigation.
 - Installed, patched, and maintained McAfee ePO 5.X and DLP, utilizing McAfee Orchestrator for deployment, reporting, and working with ENS configuration.
 - Managed and maintained McAfee VirusScan 8.8 and McAfee Anti-Virus across the enterprise.
 - Monitored networks with McAfee Threat Analyzer for security breaches and investigated violations using Tripwire IP 360 for vulnerability scanning, ensuring data integrity and accuracy.
 - Performed log management using Tripwire Console and Tripwire Enterprise file integrity solutions, conducting network troubleshooting and root cause analysis through archived logs.
 - Tested and maintained security tools (ForeScout, McAfee ePO, IP 360, Splunk) across all environments.
- Tools & Environment:** IBM QRadar SIEM, Graylog, Trend Micro EPS, CrowdStrike, Cisco Umbrella, Trend Micro Antivirus/Deep Security/Deep Discovery Inspector, ArkAngel SIEM, Proofpoint Email Security

Security Operations Center Analyst, Hitachi Systems Micro Clinic, India**Jan 2019 - Jan 2020**

- Detected and investigated security incidents, including malware infections, data breaches, and unauthorized access attempts to determine their scope, root causes, and potential impact.
- Managed essential security tools and systems, such as SIEM platforms, IDS/IPS, and endpoint security solutions.
- Correlation and contextualization of security events to identify patterns and potential risks.
- Analyzed system and network logs to detect suspicious activities, while developing and maintaining rules and use cases to optimize log analysis.
- Ensured the enforcement of security policies, procedures, regulations, and standards, such as GDPR, HIPAA, and NIST.
- Collaborated with the SOC team to provide 24/7 security monitoring and efficient incident response.
