

NAVEEN D

SQL/BI DEVELOPER

About me

SQL/BI Developer with 4+ years of experience in MS SQL Server, T-SQL, SSIS, SSRS, and Power BI, specializing in ETL development, performance tuning, and interactive dashboards. Skilled in delivering data-driven insights to support strategic decision-making.

Technical Skills

- Azure SQL
- MS SQL Server (2016/2019)
- Oracle (11g, 12c)
- MySQL
- Apache Hadoop
- Azure Data Factory
- SSIS / SSRS / SSAS / DTS
- Power BI
- Tableau
- Python
- Informatica
- T-SQL / PL SQL
- Erwin Data Modeler
- Star/Snowflake Schema
- ETL Pipelines
- OS Tools (Windows, Unix)
- MS Azure
- AWS
- Git/GitHub
- Jenkins
- Visual Studio
- Talend

Professional Summary

- With over 4+ years of experience in database design, development, and administration using MS SQL Server, I possess strong expertise in ETL processes using SSIS.
- I am proficient in advanced T-SQL for developing complex stored procedures, triggers, tables, and user-defined functions while optimizing relational database models to ensure data integrity and efficiency.
- My extensive experience includes performance tuning using SQL Profiler and Windows Performance Monitor to analyze and improve SQL Server performance.
- I have expertise in designing and developing interactive dashboards and visualizations in Power BI and Tableau, with a strong focus on report performance tuning and troubleshooting.
- I am well-versed in the complete SDLC process, from system analysis and design to development, testing, and deployment, and can effectively work both independently and as part of a collaborative team.
- My advanced knowledge of ETL processes with SSIS allows me to efficiently integrate, transform, and schedule data across multiple environments, including production, staging, and development.
- Skilled in writing advanced SQL queries, including dynamic SQL, sub-queries, and complex joins, I focus on developing efficient stored procedures, functions, views, and indexes.

Education

University of North Texas, Denton, TX

Master's Degree in Computer Science
2023 - 2024

Professional Experience

CorroHealth, Plano, TX

SQL/BI Developer

May 2023 - Present

Responsibilities

- Designed and developed a HIPAA-compliant database for storing sensitive healthcare records.
- Created SSIS packages to import data from EDI 837 claim files into SQL Server for analysis.
- Built SSRS reports to monitor patient outcomes, billing trends, and operational performance.
- Tuned large, complex SQL queries for processing high volumes of healthcare data efficiently.
- Proficient in automating processes with SQL Server Agent jobs, error handling in SSIS, and scripting using VB.NET, C#, or Python.
- Delivered comprehensive BI solutions by integrating Power BI, SSIS, and SSRS to enhance data analysis, reporting, and visualization, driving informed enterprise decision-making.

Certifications

- AWS Certified Cloud Practitioner
- Career Essentials in Generative AI by Microsoft and LinkedIn
- Google IT Support Professional Certificate
- Responsive Web Design - Developer Certification from freeCodeCamp.org

Strengths

Database Design & Development

- Expertise in designing scalable database models using MS SQL Server, Oracle, and PostgreSQL to handle large volumes of data across industries like retail, finance, and healthcare.

ETL Expertise

- Advanced knowledge of ETL processes using SSIS, Azure Data Factory, and Informatica for seamless data integration, migration, and transformation.

Business Intelligence (BI) Tools

- Advanced experience in developing interactive and parameterized reports using Power BI, SSRS, Tableau, and QlikView with complex visualizations and KPIs.

Cloud Technologies

- Hands-on experience with cloud platforms like Azure (SQL Database, Data Factory) and AWS for data storage and analytics.

Data Modeling Tools

- Proficient in Erwin Data Modeler, Star Schema, and Snowflake Schema for logical and physical data modeling.

Data Visualization

- Skilled in creating real-time dashboards with DAX measures, calculated columns, and advanced Power BI visuals for actionable insights.

- Designed and developed SSIS packages to extract, transform, and load (ETL) data from various sources such as flat files, Excel, SAP BW/BI, and SQL Server, enabling seamless data integration and migration, including upgrades from SQL Server 2008 to 2012.
- Created advanced reports, including Drill Down, Drill Through, and Cross-Tabbed formats, using SQL Server Reporting Services (SSRS) to meet diverse business requirements.
- Implemented responsive web interfaces using Bootstrap and jQuery.
- Utilized SSRS for creating detailed patient and billing reports.
- Implemented error logging and tracking using ELMAH and Application Insights.
- Developed complex workflows using Windows Workflow Foundation .
- Automated deployment using Jenkins pipelines for staging and production environments.
- Integrated with third-party EHR systems using SOAP and REST APIs.
- Collaborated with QA teams to perform load testing and improve system performance.
- Configured and automated critical tasks such as data loads, backups, and monitoring through SQL Server Agent job scheduling.

Environment: MS SQL Server 2014, Micro Soft Visual Studio, SQL Server, SSIS, SSRS, SSAS, Azure Data Factory, Azure Data Lake Analytics, Azure Databricks, Azure Machine Learning, Azure Synapse Analytics, ASP.Net and C#.

American Express (Remote) SQL Developer

Jun 2020 - Nov 2022

Responsibilities:

- Designed and developed scalable SSIS packages for ETL processes, including data extraction from flat files, Excel, and third-party APIs.
- Created parameterized SSRS reports for financial performance, risk assessment, and compliance metrics.
- Developed DAX measures and calculated columns in Power BI to create financial dashboards.
- Implemented role-based security in Power BI and SSRS to restrict sensitive financial data access.
- Monitored and improved database performance using SQL Profiler, DMVs, and performance tuning techniques.
- Automated ETL processes and scheduled them using SQL Server Agent jobs for seamless operations.
- Designed and developed efficient database models using SQL Server to support a high-volume retail analytics platform.
- Built complex T-SQL queries, stored procedures, functions, and triggers to handle dynamic business requirements.
- Created and optimized ETL workflows using SSIS to extract data from multiple sources, transform data, and load it into a centralized data warehouse.
- Collaborated closely with stakeholders to deliver customized SSRS and Power BI reports aligned with business objectives.
- Delivered end-to-end data solutions by integrating SQL Server, SSIS, and Power BI for enterprise reporting.
- Agile in adopting and working with the latest tools and frameworks, including Databricks, Apache Spark, Kafka, and Git-based version control systems.

Environment: T-SQL, PL/SQL, MS SQL Server, SSAS, SSAS, SSIS, Azure Synapse Analytics, Azure Data Factory, Azure Databricks, Azure Data Lake Storage, Power Pivot, Erwin r4, Oracle 9i, DB2, Visual Source Safe (VSS), Tableau, Windows XP, VB script.
