🧠 SKILLS

- React, Vue, Angular, React Native
- Node.js, Express, Next.js, Django
- HTML, CSS, jQuery
- JavaScript, TypeScript, Python
- Material UI, Tailwind CSS, SCSS
- PostgreSQL, MySQL, MongoDB
- Git, Docker, Kubernetes
- RESTful APIs, GraphQL
- Webpack, Barbel
- Jest, Cypress, Playwright
- AWS, GCP, Azure

🎓 EDUCATION

Bachelor's degree, Computer Science,
University of Central Florida
2011 – 2015

👤 PROFILE

Dedicated Senior Software Engineer with 10 years of hands-on experience in the design and development of web applications using React and Node.js. Expert in creating scalable, responsive and efficient software solutions across various industries. Proficient in deploying robust cloud architectures on AWS to enhance application performance and cost efficiency. Experienced with leading teams through the agile development lifecycle and delivering complex projects on time. Equipped with a comprehensive skill set covering frontend and backend development, DevOps practices, and modern development tools and methodologies.

🏢 PROFESSIONAL EXPERIENCE

Otter.ai, Senior software engineer

04/2021 – present

- Pioneered the development of an AI-driven transcription feature using React, Node.js and AWS, intelligently categorizing conversations by context, directly enhancing user productivity and increasing user engagement by 27%.
- Architected a custom dashboard interface with React, Material UI, and Tailwind CSS, praised for its intuitive design and functionality, contributing to an increase in positive customer feedback scored through NPS surveys.
- Led a critical infrastructure overhaul in collaboration with a team of 12 engineers, transitioning from a monolithic architecture to a microservices-based system on AWS, enhancing system reliability and scalability by 37%.
- Played an integral role in developing a proprietary algorithm for speech recognition optimization using Python and AWS Lambda, reducing transcript error rates by 28% and setting a new benchmark for platform accuracy.
- Designed and implemented a seamless integration feature with third-party cloud services (GCP, Azure), enabling a significant increase in user adoption of the enterprise package.
- Established a technical mentorship program promoting best practices in TypeScript, Jest, and Docker, improving team-wide coding standards and boosting junior developer productivity.
- Engaged with cross-functional teams using GraphQL APIs to spearhead new product development, contributing to strategic international expansion.

Burger King, Full stack engineer

08/2017 – 03/2021

- Developed and optimized customer-facing applications using React, Next.js, and Tailwind CSS, improving user interaction by 38%.
- Reduced server response times by 22% by optimizing SQL database queries and employing advanced caching techniques with Redis and Docker.
- Integrated AWS services such as S3 and CloudFront to enhance platform stability and security, notably reducing downtime by 17%.
- Conducted regular A/B testing on Material UI components with Cypress, helping increase conversion rates on promotional offers.
- Automated the deployment process using Docker, Jenkins, and Git, cutting the release cycle and improving deployment reliability.

Velvetechn, Software engineer

09/2015 – 07/2017

- Developed and executed a client-specific CRM platform using Vue.js, Django, and MongoDB, boosting sales team efficiency by 42% due to improved data visibility and automation features.
- Initiated the adoption of cloud infrastructure on AWS with EC2 and RDS.
- Collaborated with stakeholders and utilized RESTful APIs and Webpack to define project requirements and deliverables, improving satisfaction ratings by 33%.
