

Nicholas Silva

Senior Software Engineer

Boca Raton, FL • nicholas.work39@gmail.com • github.com/nico862

SUMMARY

Senior Software Engineer with over 12 years of experience in full stack development. Excellent at problem solving and troubleshooting with a passion for thorough documentation, maintaining custom reports, and automating tests to ensure full code coverage. Expert in defining user stories due to inquisitive nature, to elegantly design and build efficient, reusable, and reliable code. Excited and willing to learn and continuously grow in a cross-collaborative team environment across multiple disciplines.

TECHNICAL SKILLS

JavaScript | TypeScript | C# | Node.js | Express.js | NestJS | .NET 6 | .NET 7 | .NET 8 | .NET 9 | .NET Framework | ASP.NET Core | Blazor | Entity Framework | Dapper | React | Angular | Next.js | REST API | gRPC | GraphQL | SignalR | ASP.NET Identity | JWT | OAuth 2.0 | RBAC | MFA | LINQ | Responsive Design | Tailwind CSS | Bootstrap | SQL Server | PostgreSQL | MongoDB | Redis | Git | Azure DevOps | CI/CD | Docker | Kubernetes | Terraform | Azure | AWS | EC2 | S3 | Lambda | API Gateway | Swagger | Postman | Cypress | xUnit | NUnit | TDD | Agile | Scrum | Jira

WORK EXPERIENCE

PEEVA

Boca Raton, FL

Senior Software Engineer

August 2023 - February 2025

I led full-stack development of secure, high-performance SaaS solutions for Pet and Animal applications by crafting dynamic front-end interfaces with React, Angular, and TypeScript, and building robust, scalable back-end services using C#, .NET, ASP.NET Core, Node.js, and Express.js.

- Led the development of scalable PetTech and HealthTech web applications using React, Angular, TypeScript, C#, .NET, ASP.NET Core, Node.js and Express.js improving platform usability and veterinary workflows.
- Architected secure, high-performance SaaS solutions with .NET 8 & 9, Entity Framework Core, and SQL Server, enabling real-time integration of pet microchip data with veterinary systems.
- Designed and implemented HIPAA-compliant authentication and authorization using RBAC, JWT tokens, and ASP.NET Identity, ensuring data privacy and system integrity.
- Optimized front-end and back-end performance through lazy loading, AOT compilation, and asynchronous service handling, reducing load times by 30% and maintaining 99.9% uptime.
- Drove Agile delivery by managing feature priorities, collaborating in sprint planning, and automating deployments via Azure DevOps, CI/CD pipelines, and GitHub Actions.

FUSION92

Fort Lauderdale, FL

Senior Software Engineer

October 2018 – August 2023

I led web development for enterprise E-commerce and B2B SaaS projects using C#, .NET Core, Node.js, Express.js, Angular, React, and Azure to boost scalability, front-end speed, and mobile retention.

- Built and optimized high-performance web applications enhancing scalability and response time by 30%.

- Improved user experience through server-side rendering (SSR), lazy loading, and modular architecture, reducing load times by 35%.
- Developed mobile-first, cross-platform UIs using Tailwind CSS, CSS Grid, and Flexbox, increasing mobile retention by 20%.
- Applied modern state management with Zustand, RxJS, and React hooks to support real-time marketing dashboards and campaign interfaces.
- Reduced production issues by 40% with thorough unit and E2E testing using Jest, Cypress, and Angular Testing Library, enhancing product stability in client-facing environments.

BEELINE

Fort Lauderdale, FL

Senior Software Developer

May 2015 – October 2018

I drove the development of customer-facing retail and real estate platforms by creating dynamic UIs with Angular and React.js and architecting scalable, secure backend services with C#, .NET Core, and AWS Lambda.

- Architected scalable, secure backend services integrating Stripe and PayPal to reduce transaction failures by 40% and streamline payment processing.
- Developed interactive real estate search tools with Google Maps API, geolocation, and MS SQL, decreasing support tickets by 25% and enhancing user session times.
- Spearheaded security implementations ensuring FinTech compliance and reducing vulnerabilities by 30%.
- Collaborated with Agile teams—including product managers, UI/UX designers, and QA engineers—to conduct code reviews, align feature development with business goals, and ensure timely sprint deliveries.
- Employed TDD practices and managed CI/CD workflows via Jenkins and Git, achieving a 95% on-time release rate while reducing post-deployment bugs by 35%.

JAZWARES

Fort Lauderdale, FL

Software Developer

June 2013 – May 2015

I developed full-stack logistics and B2B SaaS applications using C#, ASP.NET MVC, .NET Framework, and AngularJS, enhancing operational efficiency and scalability through robust backend services and responsive front-end features.

- Built secure, high-performance RESTful APIs with .NET and integrated backend services using Entity Framework.
- Designed responsive front-end features with AngularJS, including dynamic dashboards and real-time data views.
- Optimized Microsoft SQL Server and MongoDB databases with stored procedures, indexing, and performance tuning for faster reporting and analytics.
- Integrated Redis caching and third-party services (e.g., Stripe, PayPal) for reliable, high-volume transaction handling.
- Applied test-driven development (TDD) and Agile best practices, collaborating across teams and maintaining clean codebases with Git.

EDUCATION

BARRY UNIVERSITY

Bachelor of Science, Major in Computer Science

Miami Shores, Florida

2009-2013
