Skills

ServiceNow Administration, ITSM Modules (Incident, Problem, Change, Request), CMDB, Service Catalog, Workflows, Business Rules, Client Scripts, JavaScript (ES6+), HTML5, CSS3, REST API, Reporting & Dashboard, Update Sets, ACLs, Data Import & Export, Performance Analytics, Git, GitHub, Troubleshooting & System Diagnostics, React, AWS (EC2, S3, DynamoDB, ECR, Fargate, IAM, Cloudwatch), PostgreSQL, Jira

Experience

Software Engineer | Skyscraper OSP | OS Labs → March 2024 – Present

- Developed approximately 20% of dynamic **React** components, including real-time instance trackers to display resource availability, and collaborated **Redux Toolkit** for centralized state management, dispatching state changes to update components like instance monitors and data charts based on real-time data
- Revamped the Virtual Machines Observability Dashboard utilizing **Typescript** with **Chart.js**, effectively creating a developer focused experience and UI for monitoring EC2 instances
- Created the EC2 Data Aggregation Platform, integrating with **AWS Cloudwatch** utilizing **Node.js / Express** and Typescript to gather observability metrics from EC2 instances in near real time for SRE teams
- Generated an **EC2** client controller to retrieve instance data and employed specific methods to fetch requested metrics, incorporating a global error handler and an unknown endpoint error handler for robust error management
- Applied the **AWS SDK/API** to programmatically launch and manage EC2 instances, facilitating the comprehensive collection and manipulation of performance and usage metrics
- Upgraded from **Amazon SDK v2 to v3**, enhancing both performance and security. This transition significantly the import size from roughly 10 MB to 733 KB
- Engineered and implemented a testing environment utilizing **Jest and React Testing Library**, improving code reliability and achieving close to 30% test coverage for React components
- Optimized performance by configuring **Webpack** for scalability, maintainability, and faster loading with HMR, ES6+ transpilation, and minification; Containerized with **Docker**, streamlining deployment and reducing errors by nearly 40%

Freelancing | Panama Aleksinac → Jan 2024 -March 2024

- Designed and constructed a custom static single-page application (SPA) tailored to meet the unique e-commerce requirements of a small business. Exercised modern web technologies, including **HTML5**, **CSS3**, and **JavaScript**, to create a responsive and user-friendly interface (UI)

Operations Manager | Total Truck Transport → 2021 - 2023

- **Utilized the ServiceNow platform** to log, track, and manage incidents, ensuring prompt and effective resolution in accordance with strict SLA requirements, and maintaining high service availability for business operations
- **Reviewed and analyzed ServiceNow reports and dashboards** on a regular basis to monitor key team performance indicators (KPI), identify trends, and uncover potential areas for improvement, contributing to optimized team productivity and faster resolution times
- **Collaborated closely with IT teams through ServiceNow** to resolve escalated operational issues, ensuring alignment with business needs, minimizing downtime, and facilitating smooth communication across departments to maintain service quality
- **Served as a primary point of contact** for team members navigating the ServiceNow platform, offering guidance and troubleshooting assistance for basic usage issues, enhancing user adoption and efficiency with the platform
- **Submitted and tracked change requests in ServiceNow**, working to implement operational improvements, identifying and addressing potential risks to business continuity, and ensuring minimal disruption during system or process changes

Other Experiences

- Goodwill Industries CFL: Transportation Leader - 2020 – 2021

Open Source

Software Engineer | Increment

- Defined secure authentication and account creation middleware for **Supabase SQL(PostgreSQL)** users while designing routes and schemas for authorized data management, ensuring robust security and efficient access control

Education

- BS Economics | University of Singidunum | Nis, Serbia |
- ServiceNow Systems Administrator Fundamental | Badge | Certified ServiceNow Systems Administrator - In Progress | Exam Scheduled |
- Certified Cloud Practitioner | CCP | AWS |
- Technical Certificate | TC | Valencia College | Orlando, Florida |

About Me

- I cherish the simple joys of life, from sliding down playground slides with my daughter to capturing her special moments through photography. My weekends often include outdoor adventures, indulging in homemade cappuccinos crafted from freshly ground beans, or diving into a good novel. I stay inspired and informed by reading daily updates on the latest technological advancements through Medium, IBM, and TLDR
