

Peter Lasode

Vacaville, CA

(682)333-9744 | olumuyiwalasode@gmail.com

DevOps Engineer | Cloud Engineer | Infrastructure Engineer

Skilled DevOps Engineer with 9+ years total progressive IT experience with hands-on experience supporting, automating, and optimizing mission critical processes deployments in AWS, leveraging configuration management, CI/CD, Scripting and DevOps. Key skills include:

- **Operating Systems:** Ubuntu, Red Hat Linux
- **Monitoring Tool:** Datadog, AWS CloudWatch
- **IaC Tools:** Ansible, Terraform
- **Cloud platforms:** AWS, Pivotal Cloud Foundry (PCF)
- **Cloud migration tools:** AWS Server Migration Service
- **Networking:** TCP/IP, VPC, Endpoint, SSH, DNS
- **Version Control:** Git, GitHub Enterprise, Bitbucket
- **Project management tools:** Jira, Microsoft Teams
- **Containers:** Docker, ECS, ECR, EKS, Dockerfile
- **CICD tool and Build Tools:** Maven, Jenkins, AWS Code build, AWS Code Pipeline
- **Scripting & Other Tools:** Shell Scripting, Bash, Python
- **Database:** RDS, DynamoDB, MySQL, PostgreSQL, MongoDB, Redis
- **Data Visualization Tools:** Tableau
- **RedHat Linux distribution:** RHEL, Yum
- **Hashi Corp tools:** Vault, Consul
- **Cloud/DevOps Security tools:** AWS CloudTrail, SonarQube, AWS IAM, AWS WAF, GuardDuty, KMS, etc.

- **AWS tools:** EC2, Kafka brokers, ALB, Lambda, S3, Route 53, ElasticCache
- **Interpersonal Skills:** Good communication skills | excellent collaboration skills | Great team player | problem-solving.
- **Virtualization:** Oracle VM
- **Open Source:** Open-source contributions and usage
- **System Development Lifecycle:** Understanding and the application of SDLC processes
- **SQL Query:** Knowledge of writing and optimizing SQL queries

Experience

MasterCard Inc.,

January 2023 – Present

Systems Platform Architect

Leverage on Java-based framework like spring boot to create pipeline yaml files. Use NodeJS to create and deploy applications on-Prem. Provide support for updating containers and pods for PROD deployment. Install and configure of three-node HA tableau server in cloud and on VM.

- Creation of terraform jobs for EKS Cluster deployment via GitHub Enterprise.
- Creation of terraform jobs for Kubernetes Service and Deployment yaml files.
- Automation of LB and Target Groups to expose multiple Kubernetes services using a single network load balancer.
- Reconfigure of Load balancer and API gateway to switch from ECS to EKS.
- Creation of Customer Success Jenkins Job to Flush database in Redis Enterprise.
- Creation of CICD Pipeline using Jenkins to create and deploy pods.
- Using Terraform to provision and automate infrastructure.
- Setup Dynatrace on EKS Clusters for monitoring.
- Setup AWS Code pipeline to build images, push to ECR, and deploy to EKS Cluster.

KBI Biopharma**May 2022 – September 2022****Cloud DevOps Engineer**

Created pipeline templates to be reused across multiple projects. Automated build process and deployment to Elastic Kubernetes Cluster. Managed distributed version control environments such as GitHub, GitLab.

- Leveraged on API Gateway and AWS Lambda to create a serverless Application to improve deployment speed and reduce operational costs.
- Created CICD pipeline using Jenkins for deployment of Micro-service to Kubernetes Cluster.
- Assisted in scaling infrastructure using DevOps best practices.
- Automated deployment to dev environment and trigger deployment to QA for functional testing.
- Monitored servers using Datadog that ensure no downtime in Application.
- Automated ec2 instances and encrypt elastic block store volumes (AWS EBS) using python boto3.
- Set up CI/CD pipeline for microservices and integrated tools like SonarQube, Nexus Artifactory and Docker.

Waya MultiLinks Technology Limited**August 2018 – October 2020****Infrastructure Engineer**

Enhanced and managed the release of a client application to enable end-users obtain loan services using microservices. Maintained and configured Jenkins for continuous integration. Built Jenkins pipeline using Jenkinsfile. Created AWS accounts for teams, managing IAM roles and permission. Used Terraform to configure and deploy resources on AWS platform.

- Set up web servers with NGINX using Ansible.
- CICD pipeline deployment with docker through ansible playbook automation.
- Implemented Agile and DevOps culture across organization to improve velocity.
- Set up CI/CD pipeline for microservices using an integrated tool like SonarQube, Microsoft Teams, Docker, and Slack.
- Implemented DevOps best practices and cultural shift within the Teams.

- Scaled up EC2 instances on AWS platform using Autoscaling.
- Maintained high availability of infrastructure to improve web service.
- Deployed and configured application on servers using ansible playbook.

Redtech Limited**September 2015 – August 2018****DevOps Engineer**

Ensured High availability on all running servers Troubleshooting, maintaining, and continuously improving application infrastructure.

- Setting up VPC and creating subnets for different departments in the organization.
- Used cloud watch to monitor infrastructure and provide root cause analysis.

Education and Certifications

Master of Science in Physics, The University of Texas at El Paso

Bachelor of Science in Physics, Federal University of Agriculture, Abeokuta

- AWS Cloud Solutions Architect Associate
- Oracle Cloud Infrastructure Cloud Operations Certified Associate
- Oracle Autonomous Database Cloud Specialist
- Oracle Cloud Infrastructure Developer Certified Associate
- Oracle Cloud Infrastructure Foundations Certified Associate
