

Prabhakar Yadav

(201) 920-9928 | yadav.prabhakar2147@gmail.com | github.com/Prabhu13 | Harrison, NJ

Summary — A software developer with 6 years of experience in building scalable, high-performance applications and distributed systems. Expertise in database systems, full-stack development, cloud computing, and DevOps practices. Experienced in writing clean and efficient code. Industry knowledge of Retail and Finance.

Skills

Languages	C, Java, Python, TypeScript, Bash, SQL, HTML5, CSS3, JavaScript, PHP	Prometheus, PagerDuty, Papertrail, Figma, Docker, Kubernetes, Jenkins, Jira, Vagrant
Frameworks	Node.js, Spring Boot, ReactJS, Redux, Next.js, Django, JQuery, Bootstrap, WordPress, Ajax, Tailwind CSS	Databases MongoDB, Redis, PostgreSQL, MySQL, Redis, DynamoDB
Tools	Git, GitHub, Bitbucket, Jira, Splunk,	Cloud AWS, GCP
		Other Agile, CI/CD, Apache Solr, Apache Kafka, Apache Spark

Experience

SkyIT Services

May 2024 – Aug 2024

Frontend Developer Intern (Remote)

- Redesigned web pages using Tailwind CSS, ReactJS, and TypeScript, improving load times by 20%.
- Created a dashboard for a learning platform, enhancing UI/UX and smooth navigation.
- Integrated AWS S3 for scalable media storage using Python Boto3 SDK, optimizing storage and retrieval efficiency.
- Applied DRY and SOLID principles for clean and maintainable code.

Workzona LLC [Workzona](#)

Dec 2023 – Apr 2024

Software Developer Intern (Remote)

- Developed web pages using Storybook, Tailwind CSS, and Next.js.
- Built token-based authentication using JSON Web Tokens.
- Ensured optimized performance and data integrity for relational and NoSQL databases based on structured and unstructured data, optimizing storage and a scalable design.

CMA CGM

Mar 2022 – Aug 2023

Software Engineer

- Built a Python-based log management system using MongoDB, saving \$8,000 annually in operational costs.
- Integrated Elasticsearch for real-time order search, significantly reducing loading delay.
- Developed tools for the Support Team, reducing task times by 70%
- Engineered an automated server management solution leveraging Python, socketserver.
- Mentored new team members, enhancing team productivity and knowledge-sharing.

Ingram Micro

Jul 2018 – Mar 2022

Software Engineer

- Developed a web application using Python's Django, SQLAlchemy with MySQL, React.js, and Redux, reducing engineering support tasks by 40% through optimized workflows and an improved UI.
- Developed a POC using Apache Kafka with Python integration on AWS MSK (Managed Streaming for Kafka), ensuring zero order loss during peak demand.
- Ensured PCI DSS compliance by implementing secure encryption, access controls, and continuous monitoring for payment systems, safeguarding sensitive customer data.
- Created warehouse integration web app to connect new warehouse with the system using Django

Projects

Property Selling Website [Github](#)

- Built a full-stack property listing platform using Python, Django, and Postgres.

AWS Image Recognition Pipeline [Github](#)

- Developed a distributed image recognition pipeline with Core Java, Maven, AWS EC2, S3, SQS, and Rekognition.

PixelPrompt Game [DevPost](#)

- Created an interactive game for prompt engineering using Terraform for AWS, Next.js, PostgreSQL, and FastAPI.

Distributed ML on AWS [Github](#)

- Developed a Spark-based machine learning application for wine quality prediction across AWS EC2 instances.
- Automated Docker deployment to efficiently scale ML models on distributed systems.

Certifications

- AWS Certified Solutions Architect – Associate [Certification URL](#)
- Scrum Fundamentals Certified (SFC) [Certification URL](#)

Education

New Jersey Institute of Technology

Sept 2023 – Dec 2024

Master of Computer Science: GPA – 3.90

- Relevant Courses: Data Structures, Algorithms, Cloud Computing, Data Management Systems Design, Adv Database System Design, Network Protocol Security, Data Mining
