Summary

Full Stack Developer with **4+ years of experience** in designing, developing, and deploying high-performance applications. Expertise in **Python** and **JavaScript**, with comprehensive experience across both **front-end** and **back-end development**. Strong proficiency in **Agile methodologies**, **microservices architecture**, and **cloud technologies**. Proven ability to optimize **application performance**, enhance **user experience**, and improve **system reliability** using modern technologies such as **FastAPI**, **React**, **AWS**, **Docker**, and **Kubernetes**.

Education

University of North Texas

Aug 2022 – May 2024

Master of Science, Computer and Information Science

Vignan's Institute of Information Technology

Jul 2017 – Jul 2021

Bachelor of Technology, Computer Science and Engineering

Technical Skills

Programming Languages: Python, JavaScript (ES6+), SQL, TypeScript

Web Frameworks: Django, Flask, FastAPI, Node.js, AngularJS, React, Redux

Web Technologies: HTML5, CSS3, SASS, Bootstrap, jQuery, AJAX, RESTful APIs, WebSockets

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Redis

Cloud Platforms: AWS (EC2, S3, Lambda, RDS, SQS), Google Cloud Platform (GCE, GCS)

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Bamboo, Terraform

Version Control: Git, GitHub, GitLab, Git Flow

Operating Systems: Linux (Ubuntu, CentOS), Windows

Additional Tools: Nginx, Redis, Elasticsearch, RabbitMQ

Work Experience

Intuit

Dec 2023 – Present

Full Stack Developer

USA

- Developed high-performance **microservices** using **FastAPI**, reducing API response times by **30%** and improving scalability.
- Designed and maintained **RESTful APIs** with **Django** and **Flask**, optimizing backend logic for a **25% performance improvement**.
- Led the cloud deployment of microservices using **AWS**, configuring **EC2 instances**, **RDS**, and **S3** for scalable database management and storage.
- Implemented front-end features with **React** and **Redux**, ensuring dynamic and responsive user experiences across devices.
- Introduced **CI/CD pipelines** using **Jenkins** and **GitLab**, reducing deployment errors and cycle time by **40%**.
- Achieved **99.9% uptime** for deployed services through a robust **Docker-based microservices architecture** and **AWS monitoring tools**.

Cognizant

Nov 2019 – Sep 2022

Full Stack Developer

India

- Developed and optimized **RESTful APIs** using **Django REST Framework** and **Flask**, ensuring high performance under heavy traffic.
- Optimized backend performance by enhancing query efficiency and improving **server response times**, reducing page load times by **40%**.
- Integrated **Docker** for application deployment, streamlining the development-to-production process and minimizing configuration inconsistencies.
- Implemented **OAuth 2.0 authentication** for secure and scalable user access management.
- Migrated on-premises infrastructure to **AWS**, reducing costs by **20%** while improving **scalability**, **reliability**, and **fault tolerance**.
- Deployed services on **AWS**, leveraging **auto-scaling** for resource optimization and **SQS** for asynchronous message queuing.
