

PRAVEENA SRIDHAR

Cybersecurity Manager and Subject Matter Expert

San Jose, CA | (669) 224-9662 | sridharpraveena1@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Technical leader with 25 years of experience in software engineering and cybersecurity; proficient in managing global teams and driving security assessments for organizations like Amazon and Cisco. Spearheaded penetration testing for over 600 devices at Amazon Lab126, enhancing compliance metrics; delivered over 30 product releases at Cisco in IoT, Smart and Connected Communities/Applications, overseeing a team of more than 120 PenTesters at Amazon. Experienced in penetration testing, and automation frameworks, with significant contributions to global organizations and critical projects.

SKILL SET

- **Technologies:** JSP, JDBC, ASP, Servlets, Data Warehousing, WebLogic, IoT platforms
 - **Languages:** C, C#, Java, Python, MDX, T-SQL, HTML, XML, JavaScript, VBScript
 - **Tools:** Selenium, TestNG, MS-OLAP, DTS, Rational Robot
 - **RDBMS:** Oracle 11g, PostgreSQL, SQL Server
 - **Security Tools:** Burp Suite, Metasploit, Nessus, AppScan, Checkmarx, Qualys, Rapid7, Threat Builder, IriusRisk
 - **Frameworks & Methodologies:** Agile, Scrum, Secure Development Lifecycle (CSDL)
 - **Cloud & Network Security:** AWS, SSL x.509, 5G Security
-

PROFESSIONAL EXPERIENCE

Verizon Consultant | Cyber Security IoT SME

Jun 2024 – Present

- Served as IoT Subject Matter Expert, leading the IoT Security SME Program and providing strategic guidance on IoT security best practices.
- Developed a comprehensive IoT Security Learning Path, establishing multi-level certification tracks for cybersecurity engineers, enabling the achievement of badges upon completion of each certification stage.
- Partnered with product teams as a Product Security Engineer, driving threat modeling and mitigation efforts for IoT applications, including Smart Family and Product Analytics Cloud projects.

Amazon Lab126, Sunnyvale, CA | TPM - Devices Services Trust and Security

Aug 2022 – Jun 2024

- Led penetration testing efforts for over 600 devices and services across Amazon Lab126.
- Directed triage meetings for penetration test (PenTest) requests from DSPT teams, ensuring compliance with ASR certification processes.
- Established robust vulnerability management systems, and reported metrics, contributing to monthly operational reviews.
- Supervised relationships with six external vendors housing a team of 120+ PenTesters; took charge of contract negotiations and ensured proper onboarding processes were in place for efficient project execution.
- Presided technical reviews for vendor deliverables and provided detailed feedback. • Interviewed and hired DSTS TPMs to enhance the team's capabilities.

Cisco Systems, San Jose, CA | Technical Leader Security (12 Years of Experience with Cisco)

Jul 2019 – Aug 2022

- Created 30 + threat models for all product releases in the business unit, worked with engineering managers and architects to get a closure on the threats mitigations and follow up on security compliance.
- Designed & implemented end-to-end security strategies for IoT products, including routers, gateways, and cloud platforms.
- Administered external SSL x.509 certificates for 15 global data centers, ensuring seamless operations.
- Coordinated with Cisco's Crypto team to address certificate chain updates and revocations.
- Led integration of third-party software and resolved critical vulnerabilities (CVEs), analyzing CVSS scores to prioritize fixes.
- Collaborated with cross-functional teams to resolve threats identified through comprehensive threat modeling. • Engaged with penetration testers to analyze issues and validate fixes in live data centers.

Technical Leader Security

Oct 2017 – Jul 2019

- Delivered 30+ product releases with a focus on static analysis automation and vulnerability management.
- Streamlined the procurement and renewal process for x.509 certificates across production environments.
- Led security compliance for cloud-based offerings, integrating best practices in threat modeling & secure development. • Scrutinized training sessions to ramp up teams on threat modeling and vulnerability analysis techniques.

Security Advocate, Technical Leader QA

Oct 2016 – Oct 2017

- Drove through audits leading to HIPAA and HITRUST certifications for healthcare IoT solutions; enhanced security posture while enabling seamless integration into existing operational frameworks without significant downtime.
- Accelerated cloud application security reviews for third-party service providers.
- Led security testing of AWS cloud-integrated products, focusing on end-to-end functionality.
- Analyzed and refined 10+ threat models, establishing robust security protocols that led to a significant reduction in vulnerabilities across integrated systems, safeguarding sensitive data from potential breaches.

Quality Champion/Security Advocate**Aug 2014 – Oct 2016**

- Led quality strategies for PaaS platforms, covering functional, automation, API, and performance testing.
- Formulated robust end-to-end testing methodologies to ensure seamless interactions within the application.
- Acted as a security advocate, coordinating with architects to implement secure development lifecycle practices.

Cisco Systems, India | Quality Champion/Security Advocate**Oct 2012 – Oct 2014**

- Delivered eight major releases for Cisco's Service Delivery Platform (SDP) using agile and waterfall methodologies.
- Mentored QA leads and introduced productivity improvements in automation frameworks.
- Conducted ISO audits and ensured compliance with Cisco's security baselines.

Engineer IV - QA**Mar 2010 – Mar 2012**

- Orchestrated 36 agile sprints focusing on functional, performance, and security testing across diverse products; enhanced team collaboration leading to a significant uptick in product delivery speed.
- Championed an initiative that led to the rapid execution of over 70,000 automated API tests; findings directly addressed critical stability issues contributing to application performance during high-demand periods.
- Led a team of 35, acting as a product owner to prioritize and resolve sprint blockers.

Intuit, India | Senior Software Engineer Lead**Sep 2008 – Mar 2010**

- Coordinated end-to-end testing for 52+ releases, ensuring quality across functional and performance metrics.
- Crafted reusable components within the automation framework enabling rapid deployment capabilities across teams, saving approximately eight hours weekly spent on repetitive coding tasks during project sprints.
- Resolved critical production issues and handled customer-facing escalations with efficiency.

BEA Systems, India | Staff Software Engineer QA**Mar 2007 – Sep 2008**

- Certified BEA ALUI products across secondary platforms and databases.
- Led a six-person team in developing Selenium-based automation frameworks.
- Executed cross-platform testing for AquaLogic SharePoint Console.

BMC Software, Sunnyvale, CA | Staff QA Engineer**Oct 2006 – Feb 2007**

- Automated three key modules in UI testing using a C# framework within one month.
- Completed AR System Administration certifications and contributed to workflow enhancements.

BEA Systems, San Francisco | Automation Lead**Apr 2005 – Oct 2006**

- Spearheaded testing operations on Aqua Logic SharePoint Console, directing efforts of 2 testers; achieved early completion of all required assessments while maintaining high-quality standards throughout the process.
- Managed a 4-person Automation team, developing front-end testing tools using C#

Microsoft (Wipro) | SQL Server Tester/Developer (Multiple Roles)**Sep 2000 – Mar 2005**

- Automated backend and performance testing for enterprise-scale applications.
- Conducted load testing and optimized SQL Server performance for high-traffic environments.
- Developed datawarehouse solutions using MS OLAP (Microsoft Online Analytical Processing) and SQL Server Analysis Services, Creating Business Analytics Reports

DAIWA-Japan (Wipro Technologies) | Java Programmer**May 2000 – Aug 2000**

- Cultivated Java-based solutions for financial analysis tools, optimizing system performance.

AMEX (Intelli Group Asia Private Limited) | Developer**Sep 1999 – Apr 2000**

- Designed reusable web components, enhancing code maintainability and project scalability.

EDUCATION

- **B.E. (Hons)**, BITS Pilani, Rajasthan, India (July 1999)
- **Certificate in Software Engineering**, Stanford University, Palo Alto (June 2006)
- **Certificate in Leading Effective Teams**, Stanford University, Palo Alto (August 2008)
- **Certificate in Advanced Computer Security**, Stanford University, Palo Alto (March 2016)
- **Certificate in ISB- Mastering Executive Presence**, ISB (Indian School of Business - online), Hyderabad (November 2024)

ACHIEVEMENTS & PUBLICATIONS

- Published "Connecting Drone Devices Using Different Cellular Technologies Across Geographies with Control Center" in TDS Commons through Cisco Patents Online.
- Speaker at conferences including WiCyS, OWASP Global AppSec DC, and Cisco SecCon.
- Presented research papers on API regression testing and mobile automation at UNICOM NextGen Testing Conference and International Conference on Software QA and Testing on Embedded Systems, Spain
- Developed the "4 Layered Mobile Automation Framework Using Selendroid," showcased at QA & Test 2014.
- Recipient of the CAP Award for performance excellence at Cisco.

CERTIFICATIONS

- 5G Security and Private 5G Networks
- Cisco Security Ninja (White & Green Belt)
- Scrum Master (Agile Development)
- Advanced Computer Security (Stanford)
 - "Exploiting and Protecting Web Applications" Certifications
 - "Using Cryptography Correctly" Certifications
 - "Writing Secure Code" Certifications
 - "Mobile Security" and "Emerging Threats and Defenses" Certifications
- SQL Server 2000 Design and Implementation
