

PRECIOUS DARAMOLA

(469) 546-5710 | preciousdaramola01@gmail.com | Dallas, TX

OBJECTIVE

Dedicated and skilled Security Operations Center (SOC) professional with several years of experience in combating IT security problems. Equipped with top-notch experience in network and cybersecurity techniques with an extensive IT technical background. I enjoy troubleshooting to finding solutions to technical and security issues. Critical and analytical thinker who addresses client's security issues quickly and consistently exceeds performance standards.

SKILLS & TECHNOLOGIES

• Security Information and Event Management (SIEM) tools (e.g., Splunk, ELK) • Intrusion Detection Systems (IDS) and Intrusion Prevention Systems (IPS) • Incident response and digital forensics • Network security and monitoring • Security policy development and enforcement • Threat intelligence analysis • Strong knowledge of cybersecurity frameworks and standards (e.g., NIST, ISO 27001) • Active directory • Advertising • Analysis • APT • Citrix • Content management • Customer Relations • Email • Event Management

EXPERIENCE

Barclays Bank

SOC Analyst | Dallas, TX

March 2022 - Present

- Monitoring the local threat ops channels/SIEM/AV/DLP Policy violation consoles and notifying the client/ stakeholders of any suspicious/malicious activity within agreed SLA timelines.
- Utilized Security Information and Event Management (SIEM), Intrusion Detection and prevention (IDS / IPS), Data Leakage Prevention (DLP), sniffers, and malware analysis tools to investigate and analyze potential threats.
- Utilizing Endpoint Detection and Response tools such as 365 Defender, and Cortex to detect malicious processes and lateral movement in the network.
- Analyzing network perimeter data, flow, packet filtering, proxy firewalls, and IPS/IDS to create and implement a concrete plan of action to harden the defensive posture.
- Monitoring open source and commercial threat intelligence for IOCs, new vulnerabilities, software weaknesses, and other attacker TTPs.
- Performing security operations, abuse detection, incident management, reverse engineering, security analysis and testing.
- Investigating security breaches and other cybersecurity incidents.
- Managing virtual firewalls, access control lists, and network security zones.
- Quickly acquiring, utilizing, and communicating knowledge on new technologies and solutions, emerging threats, and vulnerabilities to the team and upper management.

Kohl's

Cyber Security Analyst | Milwaukee, WI

January 2020 – February 2022

- Conducted security vulnerability and risk assessments using social engineering to identify system liabilities and develop remediation plans and security procedures.
- Monitor and analyze security events using SIEM tools to identify and respond to potential threats promptly.
- Investigate and mitigate security incidents, providing detailed reports on findings and recommended actions.
- Collaborate with cross-functional teams to develop and implement security policies and procedures.
- Conduct regular security assessments and audits to identify vulnerabilities and recommend remediation measures.
- Participate in the development and improvement of incident response playbooks and procedures.
- Stay updated on the latest security trends, vulnerabilities, and threat intelligence to enhance the organization security posture.
- Followed the investigation, track, and analyze advanced persistent threat (APT) groups, cyber threats, and security reporting and open source intelligence (OSINT).
- Recommended security standards to management.
- Created and updated security event investigation notes, conduct shift change reports on open cases, and maintain case data in the Incident Response Management platform.
- Captured suspicious emails going to external senders from our internal users whose email was flagged for ethical red flags or certain words configured to be.
- Utilized Symantec endpoint tools to determine if embedded links within incoming emails are malicious.

Royal Caribbean

Technical Support Specialist | Dallas, TX

September 2018 – December 2019

- Resolved customer issues related to operating systems, network connectivity, and hardware.
- Installed and configured hardware, software, and peripheral components.
- Monitored computer networks for performance issues and security breaches.
- Troubleshoot system errors and identified potential solutions.
- Created user accounts with appropriate permissions.
- Alerting and assisting customers when incidents occur.
- Responded to service tickets, documented case notes, and provided user training.

EDUCATION & CERTIFICATION

Bachelor's of Science in Accounting, Bowen University

CISA
