---

## Summary

---

Recent graduate with a Bachelor of Science in Interdisciplinary Studies, specializing in (GIS) Geographic Information Systems, Industrial Technology, and Education. Skilled in (GIS) mapping, and mechanical systems with a proven ability to apply technical knowledge to solve real-world problems. Experienced in fieldwork, environmental research, and system troubleshooting, focusing on safety and efficiency. Dedicated to using diverse skills to contribute to innovative and impactful projects. I will be available for full-time employment.

---

## Education

---

**Mississippi State University** | Bachelor of Science Starkville, MS | **08.2023 – 12.2024**

- Emphasis Areas: Geographic Information Systems, Industrial Technology, and Education
- Relevant Coursework: Water Resources, Conservation of Natural Resources, Maps and Remote Sensing, Maintenance and Management, Motion and Time Study, and Industrial Safety.

**East Mississippi Community College** | Associate Degree of Art Mayhew, Ms | **08.2020 – 05.2021**

- Completed foundational coursework that helped me enhance my critical thinking.
- Developed strong communication and problem-solving abilities applicable to multidisciplinary fields.

---

## Experience

---

**Mississippi State University** | *Undergraduate Research Assistant* *Starkville, MS* | **01.2024 – 12.2024**

- Conducted data analysis using (GIS) software and Python to support climate resilience research.
- Created detailed maps and reports to identify social vulnerability and flood risk.

**Student Conservation Association** | *Intern* *Winona, MS* | **05.2024 – 08.2024**

- Collaborated with small farmers to perform diverse agricultural tasks, ensuring project success.
- Collected and analyzed field data to contribute to environmental studies.

---

## Skills

---

| Documentation and Record Management                                                               | (GIS) and Data Management                                                                                                                                                                        | Technical Proficiency                                                                                                                                                                                     |
|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skilled in maintain and organizing documents, ensuring accessibility and proper document control. | Proficient in GIS software (ArcGIS Pro, ArcGIS Online) for data visualization and operational alignment. Conducted detailed research and data analysis to support project and operational needs. | Skilled in Microsoft Office Suite (Excel, Word, Power Point) for data analysis, reporting documentation. Familiar with technical systems and troubleshooting processes to resolve operational challenges. |
