Address: 1122 Autumn day dr, Morrisville, Raleigh, North Carolina-27560

INTRODUCTION:

With 8 years of extensive experience in Mobile Application Development (Android) using Kotlin and Java, and expertise in AGILE methodologies (SCRUM), Solid understanding of agile methodologies such as CI/CDI, have successfully published several applications on the Google Play Store and contributed to an infotainment project. Additionally, I hold a work permit for all companies in the USA.

HighLights:

- Proficient in design, data structures, problem-solving, and debugging
- Expert in the interaction between various devices and versions of Android
- Known for writing efficient, maintainable, and reusable code
- Fixed bugs and improved application performance.
- Hands-on experience using 3rd party libraries (Retrofit, Volley, Glide, Picasso, ltext, zxing, nearbyApi).
- Hands-on Experience with Kotlin Coroutines, Jetpack Compose, Dagger 2.
- Hands on experience of RX Android(used in my current project)
- Design screens using new layouts like coordinator, constraint, and using Fragments.
- Ensure the best possible performance, quality, and responsiveness of the application
- Identify and correct bottlenecks and fix bugs.
- Hands-on experience with offline storage, threading, and performance tuning.
- Strong debugging and troubleshooting skills.

PROFESSIONAL EXPERIENCE:

Sears Holdings as Technical Lead

(Jan 2022 – Present)

- Working at Kenmore Client Project
- AGILE based approach used for project management
- Working on adding IOT devices as features.

DXC Technology as Professional 1 Android Developer

(June 2021 – Dec 2021)

- Working at United Airlines Client Project
- AGILE based approach used for project management
- Working on adding features in the payment module.

People Tech Group as Senior Android Developer

(Sep 2020 – May 2021)

- Specifying the technical feasibility and ensuring timely delivery of projects assigned
- AGILE based approach used for project management
- Specifying end-points of tasks and using SCRUM based approach during project life-cycle
- Creating meeting notes and specifying sub-tasks along with deliverables including conducting stand-ups to monitor daily progress
- Mentoring team of developers and providing every required input to ensure quality during development

Global Edge Software Ltd. as Senior Mobile Application Developer

(Dec 2016 – August 2020)

- Designing functional specifications for the UPI based custom solution to be consumed by partners
- Through the entire product lifecycle, working closely with partners and clients from conception to roll-out
- Highlighting & mitigating risks against top-notch customer experiences and meeting release timelines
- Requirement Analysis
- Responsible for delivery

- Code Development, Deployment and Unit Testing (Android)
- Maintaining standard UI for different screen resolutions
- Identify and fix bugs
- Help maintain code quality, organization, and version controlling

ACADEMIC QUALIFICATION:

STANDARD BOARD/UNIVERSITY YEAR(SESSION) AGGREGATE B.Tech ECE
WBUT 2011-15 78%

SOFTWARE SKILLS:

LANGUAGES: JAVA, Kotlin

DATABASE SERVER: SQLite

TOOLS/IDE: Android Studio, GIT, JIRA, Logcat, ADB

SKILLSET: - Project management over JIRA

- Google APIs Integration (google nearby API)
- Connectivity with Bluetooth

PROJECTS:

1. Kenmore Smart: This app Connectivity Transforms your relationship with your home. Link, control and monitor your Kenmore Smart products all from one app. The Kenmore Smart app allows you to personalize the way your Kenmore smart appliances operate based on your schedule and daily routines, making life easier and providing greater peace of mind..

Role: Technical lead consisting of 2 fellow Android Developers

Skills: Kotlin, Integration with REST API and JSON, Clean MVVM Architecture, Retrofit, Coroutines for Asynchronous api call, interacting with Aya afero cloud.

App Link:

https://play.google.com/store/apps/details?id=com.searshc.kscontrol&hl=en_US&pli=1

1. United Airlines: This app is all-in one travel partner for United Airlines, Inc. is a major American airline headquartered at Wills Tower in Chicago, Illinois. United operates a large domestic and international route network spanning cities large and small across the United States and all six continents.

Role: Senior Android Application Developer consisting of 6 fellow

Android Developers

Skills: Kotlin, Integration with REST API and JSON, Clean MVVM Architecture, Retrofit, Coroutines for Asynchronous api call.

App Link: <https://play.google.com/store/apps/details?id=com.united.mobile.android>

2. In-vehicle Infotainment: The project(Tips) is recently started to develop for GM Motors for providing the digital solution on cars while using Car application. This Project will give suggestions if a driver wants to know about the unknown feature on Car. It is in the development stage and will be added in the coming future.

Role: Senior Android Application Developer consisting of 2 fellow Android Developers

Skills: Kotlin, Integration with REST API and JSON, Clean MVVM Architecture, Retrofit

3. Samvit App: This is an app that will bring the required coordination and updates from Samvit Co-ordinators and Samvit Teachers. This App is in the development stage(need to check on google)

Role: Senior Android Application Developer

Skills: Integration with REST API and JSON, Retrofit, MVVM Architecture, Live data, and mutable live data.

App Link: <https://play.google.com/store/apps/details?id=com.gesl.samvit>

4. Bixby Search App(AT client Place - Samsung R&D): It's a system app which acts like a one destination to query for any content present in the mobile device with NLU and high frequency results. Which other system apps can make use by querying the content provider of Our Bixby Service. This App helps to search all the data like Contacts, Settings, Images, Files, Notes, Call Log and more. Converts natural language query to Machine understandable query, phonetic search and auto typo corrector and more. Features Used: Lucene, Content Provider, SQL, Fastest Search algorithm, Job Services, NLU, Transliteration, Instrumentation Test and more.

5. Android IoT Home Control: It is an Enterprise App for Client(Qualcomm). This Android Application will connect to the IoT Boards via BLE. The Application sends Commands to the IoT board via BLE to Control the smart end Devices(Smart bulb, Smart Lock and Smoke Sensor) connected to the board.

Role: Development and deployment of the complete app as per the design specifications by the client.

Skills: Integrated my own BLE Library and Used MVP design Pattern

Link: <https://developer.qualcomm.com/project/qca402x-home-control-app>

6. A2A Casting App: This is an Android Application that will act as an interface between one device to multiple devices and help the primary user to cast images from one device to another connected device.

Role: Mobile Application Developer

Skills: Added NearBy Connection Api for advertising, discovering, connecting, and sending images via payload, Used MVP design pattern, Written JUnit test cases.
