### COLLEGE PROJECTS

---

**Research Methodology on Impact of Westernization on Indian Culture :**

For this project, my team and I researched and analyzed the influence of Westernization on various aspects of Indian culture, including social norms, values, traditions, and lifestyle. The focus was on understanding how globalization and cultural exchanges have shaped contemporary Indian society. Primary data was collected using Google Forms, social media, articles, and books. For the interpretation and visualization of secondary data, the chi-square test method was used for analysis.
