Summary

Results-driven Product Owner with 8+ years of experience leading cross-functional teams to deliver high-performing technology products. Passionate about delivering innovative solutions that drive revenue and user engagement. Skilled in refining product requirements, product backlog management, agile methodologies, creating & executing product roadmaps, defining product Key performance indicators (KPIs) and stakeholder collaboration. Proven track record of saving over \$2.3M through product innovation and improving product operational efficiency by 90%.

Skill Set

Methodologies	SAFe, Agile/Scrum, Waterfall
Requirements Tools	Jira, Confluence, Rally, Rational Team Doors
UML Tools	Visio, Creately, Argo
Programming Language	Java, JavaScript, HTML5, CSS3
Databases	MySQL, SQL Server
Product Management	Product Backlog Management, Feature/User Story Writing and Refinement, Stakeholder Management, Product Road mapping, Cross functional Team Leadership, UI/UX Collaboration.

Experience

Lumen Technologies, Inc.
Product Owner
Public Sector - Billing (EIS Portal)

01/2020 – 04/2024

Led IT billing development team focused on product development and delivery. Successfully led a team of 10 developers in designing, developing, and delivering multiple projects such as re-engineering invoice generation, voice & data usage processing, user-based permissions, product-based permissions, large invoice data processing, refactoring codebase, etc.

Responsibilities:

- Led agile team to successfully deliver **product vision**.
- Developed and executed **product roadmap**.
- **Collaborated with key stakeholders** to define product requirements.
- Created features, user stories, spikes, and tasks to deliver user needs.
- **Collaborated with UI/UX, Engineering Team, and business users** to refine user stories.
- Managed requirement dependencies with **cross-functional collaboration**.
- Performed **product demos** to all the stakeholders and leadership.
- Owned and managed the **product backlog**, ensuring alignment with the company's strategic vision.
- Collaborated with engineering managers to define API end points and functions.
- Supported **End-to-End testing** and **UAT**.
- Hosted all the **sprint ceremonies**, such as daily scrum calls, sprint planning, sprint retro, sprint demos, and grooming sessions.
- Worked on **SQL queries** for data validation and data analysis.

Accomplishments:

- Saved \$2.3 million by leading the development of a high-performance automated invoice generator, streamlining invoicing processes and reducing manual effort.
- Led the successful launch of a large-scale data processing system, enabling the processing of millions of usage data records and boosting **user adoption** by 80% through improved performance and reliability.
- Successfully executed a mitigation plan that reduced production issues by 90%, enhancing system stability and improving overall user experience.

Environment: SAFe, JIRA, Confluence, Oracle SQL Developer Tool, AWS, MS Excel, MS Visio, MS Teams, MS SharePoint.

CenturyLink
Business Analyst

08/2017 – 01/2020

Project 1: ICOE (International Center of Excellence)

Worked on various in-house off-network costing applications to enhance existing functionalities for better user experience.

Responsibilities:

- Worked as a liaison between the business users and engineering teams.
- Defined **product requirements** with business users.
- Created **features** and **user stories**.
- Defined and prioritized requirements during the **Pre- and Post-PI Planning**.
- Collaborated with other agile delivery teams to successfully implement end-to-end solutions.
- Performed **UAT** for business users.
- Worked with Tableau developers to provide status-tracking reports to leadership.

Accomplishments:

- Achieved approximately 30% rise in efficiency with three major products.
- Engaged and worked with global business users for multiple products to enhance product quality.

Environment: SAFe, Salesforce, Rally, JIRA, Tableau, MS Excel, MS Visio, Eclipse, MS Teams, MS SharePoint.

Project 2: ASRI (Adaptive Service Resource Inventory)

Worked on building an application that orchestrates product orders. Primarily worked with the BPI (Business process innovation) team and GAT (Global Architecture Team) to manage the business needs of ASRI.

Responsibilities:

- Worked on gathering business requirements by eliciting information from business users and potential stakeholders.
- Assisted the QA team in creating test plans and test cases, performed UAT, and logged defects into Rally.
- Actively participated in prioritizing business requirements. Created features and user stories.

Accomplishments:

- Successfully reduced E2E and UAT defects by 80%, resulting in timely product delivery.

Environment: Waterfall, Salesforce, Rally, MS Excel, Visio, Eclipse, Creately (UML)

University of Houston - Clear Lake
Department of Computer Science Engineering
Teaching Assistant - Software Architecture

09/2016 – 05/2017

Responsibilities:

- Assisted the professor with designing the coursework and provided feedback from students to improve the course structure.
- Assisted the professor in preparing test materials and exam structure.
- Lectured software architecture topics to master's students.

Environment: Eclipse, IntelliJ, MS Visio, PowerPoint, Excel, Word, Creately (UML)

University of Houston - Clear Lake
Technical Student Assistant - Student Tech 2

01/2016 – 08/2016

Responsibilities:

- Prepared PowerPoint presentations and organized events for the provost office staff.
- Assisted the Provost in creating documentation for new staff members.

Environment: MS Excel, PowerPoint, Word

Google
IT Analyst
YouTube

02/2015 – 07/2015

Worked on a video hosting service with users across the world. Proactively identified new feature needs based on feedback from customers and acted on opportunities to improve system performance and availability.

Responsibilities:

- Conducted in-depth product analysis based on user needs, driving the introduction of new features that led to a significant increase in **user adoption and engagement**.
- Proposed and implemented a new process that enhanced the customer experience for YouTube users, leading to **improved satisfaction and engagement**.
- Coordinate with the team to simplify the process of maintaining product quality.
- Validated user-reported bugs to improve product quality.

Accomplishments:

- Consistently delivered 100% SLA for several weeks.
- Successfully delivered new product enhancements with a focus on quality and performance, resulting in **improved user experience and system efficiency**.

Environment: Google internal tools, Chrome OS

Certification

Google Project Management Certification
05/2023

Education

University of Houston - Clear Lake
Master of Science in Software Engineering
08/2015-05/2017 – CGPA: 3.8/4
