USA

SUMMARY

Solution-focused data professional with experience in **data engineering, business intelligence, data warehousing**, and data science. Skilled in **Data Governance, Data Stewardship, stakeholder communication**, Experienced in collaborating with cross-functional groups to **optimize data processes** and drive data-driven decisions in healthcare, life sciences, supply chain, insurance, and finance.

PROFESSIONAL EXPERIENCE

Data Analyst Volunteer Sep 2024 - present
Felidae Wildlife Remote, USA

- Working on a reporting solution to use **Power BI** dataflows and migrating data from **SQL Server** to Azure blob storage with flexible schemas accommodating evolving data sources (schema evolution).

Business Intelligence Intern Jan 2024 - May 2024
David J Joseph – Nucor Ohio, USA

- Developed interactive **Power BI** dashboards for supply chain analytics, enabling vendors to explore inventory levels across yard locations, while optimizing data retrieval and reducing load time by 70% with parameterized SQL, and performed Power BI report migration from legacy tools.
- Performed data modeling to support scalable **reporting**, ETL pipeline for data ingestions for **Snowflake** integration, **dbt** for transformations and visualization with BI and SSRS. Enabled schema evolution and CDC on RAW layer tables.
- Created **documentation** and established reporting to ensure BI consistency and adherence to best practices.
- Collaborate with business and technical teams to define and manage data **visualization**, data definitions, **data quality** standards, and data classifications

Associate , Data Engineering & Business Intelligence Mar 2021 – Aug 2022
Cognizant Technology Solutions Bangalore, India

- Led dashboard development and design to streamline data, optimized data pipelines and ETL, reducing processing costs by 10% and enabling on-demand analytics for faster insights utilized for BI reporting purposes.
- Coached clients on data modeling and **ad hoc analysis** in Spotfire enterprises, implementing custom BI features for high-level project visibility, reducing manual analysis development time by 75% and shareable among stakeholders.
- Formulated solution to export stored procedures, reducing manual work by 97% to be applied in for version control.
- Assist in the implementation and monitoring of data governance policies, including data access, data privacy, and security protocols.

Sr Process Associate, Business Intelligence & Data Engineering Jan 2019 – Mar 2021
Tata Consultancy Services Mumbai, India

- Implemented data load and dashboard for executive oversight, enabling real-time analytics on project KPIs and improving data-driven decision-making while enhancing report delivery timelines by 50% with reduced manual work.
- Implemented BI solutions for real-time performance monitoring, reducing report load times by 93% and increasing stakeholder engagement.
- Developed scripted clinical query distribution for multiple data managers, reducing allocation time, effort by 75%.
- Support compliance with regulatory requirements and internal data governance frameworks.

Programmer, Business Intelligence & Data Engineering Feb 2016 – Jan 2019
IQVIA Bangalore, India

- Built dashboards for trial metrics, used python to improve data quality, resulting in a 40% reduction in build time.
- Created IR documentation for ICH GCP compliance, reducing testing issues by 90% and ensuring audit readiness.
- Conducted RCA and resolved discrepancies and client production issues and reduced data problems by 25%.

PROJECTS

- Auto Loan Approval Prediction:** Developed a Random Forest classifier to predict loan approval status with 91% accuracy. Engineered features, optimizing model performance through encoding and scaling.

- **Azure Data Factory, Databricks, PySpark:** Developed and deployed an end-to-end data pipeline using Azure Data Factory, Azure Data Lake Gen2, Azure Databricks, and Azure Synapse Analytics to transform and analyze retail sales data, integrated with Power BI for reporting, and implemented CI/CD pipeline for automated deployment.
- **Data Pipeline with S3, Glue, and Lambda:** Loaded retail related analytics data from S3 bucket, transformed & triggered the pipeline using AWS Glue and lambda services.
- **Price Classification with AWS SageMaker:** Developed and deployed a Random Forest classifier using AWS CLI to classify gadget prices. Utilized boto3, storing train-test split data in S3, & implemented price range predictions.
- **Streamlit with Snowflake for Stock Price:** Interactive stock analysis tool with Streamlit, Snowflake, and Pandas, featuring dynamic visualizations and real-time trend analysis with user-selectable options.

EDUCATION

Master's in computer science (M.S.), Illinois Institute of Technology	Aug 2022 – May 2024
Bachelor's in computer science (M.S.), Dehradun Institute of Technology	Aug 2011 – May 2015

SKILLS

- **Language & Database:** Python, R, SQL Server (SSMS, SSRS, SSIS), Oracle, PostgreSQL
- **Framework & Libraries:** PySpark, Pandas, Scikit-Learn, Keras, PyTorch, Hadoop, TensorFlow, Flask, Hive, Kafka
- **Cloud & Analytics Platforms:** AWS (S3, RedShift, Glue, Lambda, SNS, SQS), Azure (Data Factory, Databricks, Data Lake, Synapse), ETL, Power BI, DAX, Spotfire, Tableau, Snowflake, Excel, GCP, SAS, MS Visio, CI/CD, streamlit.
- **Other:** IaC, Machine Learning, data science, Agile development, Docker, GitHub, JIRA, Unix, Shell, ServiceNow.
