

M. Rajesh Durbha

Dallas, TX | +1 (972) 813-9912 | rajesh.mrd22@gmail.com

PROFESSIONAL SUMMARY:

- **Full Stack Java/J2EE** Developer with around 7+ Years of experience in Enterprise, Client/Server Applications, developing, testing, and implementing application environments.
- Developed **Microservices** to provide Restful API utilizing **Spring Boot** with **Spring MVC**
- Expertise in **Spring IOC/core, Spring DAO support, Spring ORM, Spring AOP, Spring Security, Spring MVC, Spring Cache, and Spring Integration.**
- Strong experience in **Struts 2 MVC** framework utilizing Struts controllers (**Actions, Results, Forms**) and client server validators.
- Proficient in developing **JSP** and **Servlets**, to create web interfaces. Developing **Java Beans** and used custom tag libraries such as **Spring framework tag libraries and JSTL** for embedding dynamic into JSP pages.
- Good Exposure to **Service Oriented Architecture** (SOA) such as Web Services and hands on experience in developing and registering web services using **JAX-RPC, JAX-WS, SAAJ, JAX-RS, SOAP, RESTful using Jersey, WSDL, UDDI registry.**
- Experience in User Experience (UX) design and development, User Interactive (UI) Web Pages and visually appealing User Interfaces using **HTML 5, CSS3, Bootstrap, SASS, JavaScript, jQuery, AngularJS, and ReactJS.**
- Good Knowledge in implementing client - server business applications using **Micro-services.** Designed and developed Micro-services business components using Spring Boot.
- Experience in developing Single Page Applications (SPA's) using **AngularJS.**
- Hands on **XML** parsing technologies including **SAX, DOM, JAXB** and **XSLT.**
- Expertise in **Bootstrap, Angular JS and Node JS** (Express, Mongoose, Body-Parser, Sequelize, HTTP, File System, Browser Sync etc.) and used **Log 4j** for logging.
- Proficient in RDBMS concepts like writing **Oracle SQL Queries, Functions, Stored Procedures** and **PL/SQL Packages** and have knowledge on **NoSQL DB, MongoDB, and Couch DB.**
- Experience in creating business reports using **Jasper Reports, JFreeCharts** and **D3.js.**
- Proficient in application deployment on **JBoss, WebSphere MQ, ActiveMQ, WebLogic, Apache Tomcat Server, and Glassfish.**
- Proficient in developing Unit Testing Cases using **JUnit, Mockito, Jasmine, Firebug, Fire Poster, and SoapUI** and **JUnit** under **Test Driven Development (TDD) methodology.**
- Experience in using **Jenkins** for **Continuous Integration and Deployment (CI/CD)** for **Java spring boot based microservices** containerizations using **Kubernetes** and deploying in **Azure**
- Developed and Deployed microservice applications utilizing **AWS EC2, S3, EKS** and **Kinesis**
- Working knowledge on Cloud Platforms like **Azure, AWS, GCP**
- Experienced in developing **Micro Services** for rapid performance, inter module communication across the application
- Used **Docker** to containerize the services and deploy on Cloud.
- Hands on version control tool including **SVN, Surround SCM, Clear Case, CVS, and GIT** and bug tracking tool using **JIRA.**
- Have knowledge on **Kafka** messages and setting up the replication factors in **Kafka Cluster**
- Expertise in writing **SQL queries, Functions, Triggers,** and good knowledge of **Relational databases** (MySQL, Oracle, PostgreSQL, and DB2) and **NoSQL** (MongoDB, Cassandra).

TECHNICAL SKILLS:

Programming Languages	Java/J2EE, SQL, Python, Ruby, C++, R, GQL
Frameworks	Spring, Hibernate, Swing, Rails, Spring Boot, Collections, React, Angular
JAVA Technologies and Related Tools	Java SE 7/8/11/17, JSP2.2, 2.3, JDBC 4.x, EJB 3.x, Struts, Struts 2, spring 3.x, 4.x, AngularJS 8.0,9.0, JNDI, JMS and Servlet 3.0, 3.1, 4.0
Front end technologies	HTML5, CSS3, JavaScript, jQuery 1.7-3.1, JUnit, Mockito, Jasmine and QUnit.\AJAX, GWT and Bootstrap 2.x, 3.x
Web Technologies	HTML5, CSS, JavaScript, MVC, JSON, YAML, XML
Web Services	RESTful, SOAP, WSDL, CXF2, JAX-WS and JBoss 7.x, ActiveMQ, WebLogic, Apache Tomcat\ JAX-RS\ Server 6/7/8 and Glassfish 3, 4.
Database/ IDE tools	Hibernate 4.x, 5.x, MySQL 5.x, Azure SQL, PL/SQL and Eclipse, Net beans, Visual Studio, IntelliJ, Spring Tool Suite 4, Redis, Kafka
Version control tools/ Operating Systems	SVN, GIT/Windows, UNIX, and Linux
Cloud Technologies, DevOps Tools & Other	AWS - EC2, S3, EKS, GCP, Docker, Kubernetes, JIRA, Azure, Jenkins
Report and visualization tools/ XML parsing technologies	Jasper Reports 4.6-5.6, D3.js 3.x-4.x/ SAX, DOM, JAXB and XSLT

EDUCATION DETAILS:

- Master of Science in Information Systems, Texas A&M University, College Station, TX, 2021.
- Bachelor of Technology in EEE, GITAM University, Visakhapatnam, India, 2015.

PROFESSIONAL EXPERIENCE:

Software Engineer at NATSOFT Corporation

Client: Walmart, Irving, TX

Dec 2023 to tilldate.

Project Description: Unified Scheduling Platform (EPIC/SDOH/VISION)

Handling the micro-service layers in Walmart Health between Walmart and EMRs. This platform enables the users to schedule appointments and access their status and records.

Responsibilities:

- Configured **REST-based Java Spring Boot** server and integration apps and deployed in **WCNP**, running all the services.
- Implemented **APIs** using the **Spring Framework** which includes **Spring MVC**, **Spring IOC**, **Spring Data JPA**, **Spring Data JDBC**, etc.
- Used **Kafka** by creating **topics** using **consumers** and **producers** to ingest data into the applications and tuned **Kafka brokers** to manage the data in the **partitions** within a **topic**

- Rendered **Angular** and **React** based mobile and web applications respectively, Onboarding in MyApps and testing them in **Android studio** Emulator.
- Created web services that fetch and update the data for the respective consumers as per the functional requirements
- Implemented the **Opentelemetry** in **java** (an Observability Framework) to collect telemetry data such as **traces**, metrics and logs
- Built and deployed the apps in Jenkins based **Looper** pipelines and monitoring with **Concord** workflow server
- Worked with **Graph Query Language (GQL)** API improving the performance, scalability, and maintainability of the REST Java micro services
- Built a full-stack application for student ticket management system using **React** Components, **Java**, and **MySQL**
- Implemented API calls to **Spring Boot** backend for user requests; utilized **Redux** for error state management
- Used **Hibernate**, **object relational-mapping (ORM)** solution, technique of mapping data representation from **MVC model to Oracle Relational data model** with **SQL-based scheme**.
- Developed an **AWS EC2** cloud-based application using **MariaDB** Galera cluster in **Python Flask API** indexing the data in **Apache Solr**
- Improved performance of application by migrating the database to **MongoDB** and visualized results in **Google Charts JS**
- Executed queries in **SQL (MariaDB)** and **Mongo Query Language (NoSQL)** databases to answer business questions

Environment: Java 11/17, Python, GraphQL, Spring, Spring Boot, Restful Web Services, React, Redux, YML, GCP, Redis, MongoDB, Kafka, Kubernetes, GIT, XML, JSON, Junit, Ubuntu, Azure SQL, Tomcat, STS, IntelliJ

PROFESSIONAL EXPERIENCE:

Software Engineer at NATSOFT Corporation

Client: Fidelity Investments, Westlake, TX

Dec 2022 to Nov 2023.

Project Description: EC2 to EKS Migration

Migration of java Spring boot apps/services from EC2 to EKS environments for better resource utilization and making the services cost effective. This project reduces the wait time of the transactions and avoids the failures with the improved and effective load management.

Responsibilities:

- Worked on diverse set of distributed application development and middleware technologies using **REST/SOAP Web Services**, **Java**, **SQL**, **PLSQL**, **Messaging**, **Kafka**, **JavaScript**, **Test Driven Development**.
- Developed applications in **Java/JEE** and **Spring Framework**, **Tomcat** and **Spring Boot**.
- Wrote **Python** scripts to generate the template files in **JSON**.
- Monitored automation systems and log files using **Datadog** and **Splunk**
- Utilized **REST Client** in **Insomnia** to test the **REST** based web services calls and make sure the health checks are up.
- Developed **REST** controllers using **Spring Data REST** to serve the UI with required **JSON** data.
- Modified **Oracle PL/SQL** Stored procedures, triggers, and views
- Created **CICD** process using **GIT**, **Nexus**, **Jenkins** job creation, **Maven** build Create **Docker** image and deployment in **AWS** environment.
- Used **Chef** to configure and manage infrastructure. Created cookbooks to automate the setups.
- Used **Maven** as a build and configuration tool and **Bamboo** for a continuous integration tool.
- Took part in setting up the application with **Jenkins**, **AWS** and **OpenStack** and is involved in

builds and deployments to **Tomcat server**.

- Used **Docker** to containerize the services and deploy on Cloud.
- Used **Angular JS** as frameworks to create **single page applications (SPA)** which can bind data to specific views and synchronize data with server using **Sass, Less, Bootstrap, Angular JS**.
- Developed Mean Stack from scratch including **Mongo DB server** (Mongoose Connector) setup and **Express JS** server development.
- Supported a web-based application to search for matching profiles based on their job needs
- Created the application using **Ruby on Rails** framework, **JavaScript**, and deploying on **Heroku**

Environment: Java 11/17, JavaScript, Spring MVC, Spring Boot, Restful Web Services, Python, YML, CSS3, HTML5, JavaScript, jQuery, Kubernetes, GIT Bash, XML, AJAX, JSON, Junit, Chef, UNIX, AWS, Kinesis, OpenStack, MySQL, Tomcat, Ruby, Visual Code, Cloud9, PHP, CSS, Power Shell.

PROFESSIONAL EXPERIENCE:

Software Engineer 2

Dell Boomi Inc., Dallas, TX

June 2021 to Nov 2022

Project Description: B2B EDI Integration

Worked in B2B processing building the iPaaS/Application integration based on EDI standards X12, EDIFACT, RNET etc., connecting applications, data, and devices across various hybrid multi-cloud landscape with speed and ease. This project enables the customers to transform the way they do business and communication with trading partner networks.

Responsibilities:

- Used complete annotation driven approach to develop the application using **Spring Boot** and was also involved in setting up the **spring bean profiling**.
- Consumed **SOAP/ JAX-WS** based web services using **spring framework** and used **SOAP UI** for testing these services.
- Used **Hibernate** in the persistence layer and implemented **DAO's** to access data from database.
- Developed **REST** controllers using **Spring Data REST** to serve the UI with required **JSON** data.
- Developed **REST exception handling controller** advice to respond to bad requests and server-side exceptions.
- Written **Microservices** to export/import data and task scheduling using Spring Boot, Spring and Hibernate. Also Used Swagger API tools while developing **microservices**.
- Used **REST Client** and **POSTMAN** to test the REST based services and used **JUnit and Mockito** to test the middleware services.
- Used **Ansible** Playbooks to setup the Continuous Delivery Pipeline and environment, including provisioning **GCP**.
- Designed the front-end screens using **AngularJS, HTML5, CSS3, JavaScript, jQuery, and Bootstrap**
- Developed **Angular services** using resource service to perform **REST API** calls to the backend.
- Build **REST** web service by building **Node.js** Server in the back end to handle requests sent from the front-end **jQuery Ajax** calls.
- Designed and developed REST based **Microservices** using the Spring Boot.
- Made the integration of data in several applications in favor **JSON** documents with dynamic schemas using **MongoDB (NOSQL)** database.
- Experience in Installation and configuring **JBoss** Application servers 5.1.x and **Tomcat 6.x**.

Environment: Java 8, Gulp, Tomcat 7, Microservices, Spring Tool Suite, Spring, Spring Boot, SAS/SQL, MongoDB, Restful Web Service, MySQL, HTML5, CSS3, jQuery, AngularJS, NodeJS, JavaScript, GIT, JMS, Jenkins, Agile, Maven, JIRA tool, Docker, Ansible, Log4j, Azure, GCP.

PROFESSIONAL EXPERIENCE:

Software Engineer at Amdocs Development Centre India

Client: Telstra Corporation Ltd. - Pune, India

July 2017 to June 2019

Project Description: Order Management Module

The project - Service Orchestration manages and monitors sales order service fulfilment - executing manual and automatic activities, while integrating with service and resource inventories. Capabilities include service modelling, decomposing products into services, updating service & inventories, model-driven workflows, automated escalations, project order scheduling, and performing proactive system actions.

Responsibilities:

- Worked on the **REST Web Services** and used **Spring Framework** and developed the Spring Features like **Spring Core, Spring IOC, Spring AOP, Spring Data Access, spring web test, Spring MVC, Spring DAO, Spring Boot, Spring Batch, Spring Security, Spring Integration**.
- Building **Restful services** using Micro-services architecture with tools such as **Spring-boot**.
- Developing **Intranet Web Application** using **J2EE architecture**, using **JSP** to design the **UI** and **Hibernate** for database connectivity.
- Development of **Hibernate** objects for data fetching for batch and front-end processing.
- GUI design and development using **Java Swing, JFC** Used for open-source web testing.
- Implemented different **Design patterns** like **DAO, Singleton Pattern** and **MVC architectural design pattern** of **spring framework**.
- Used the **Java Collections API** extensively in the application as security protection for **XML, SOAP, REST and JSON** to make a secure Web Deployment.
- Built backend **REST API** with **Node JS** and **Express JS**
- Leveraged **AWS cloud services** such as **EC2**; auto-scaling; and **VPC** (Virtual Private Cloud) to build secure, highly scalable and flexible systems.
- **AWS** is used to coordinate and manage the delivery of messages to subscribers. **Client-side validations** and server-side validations are done according to the business needs.
- Designed dynamic and browser compatible **pages** using **HTML5, DHTML, CSS3, BOOTSTRAP** and **JavaScript**.
- Developed **jQuery** callback functions to implement asynchronous communication using **AJAX**.
- Wrote **JUNIT** test cases for web servers.
- Used Business Process and deployment using **JBoss JBPM** and **JBoss Drools Rules Engine**.
- Used **D3.js** and Angular to construct data visualization.
- Written test cases and done Unit testing execution with **JASMINE** and **KARMA**.
- Involved in **CICD** process using **GIT, Nexus, Jenkins** job creation, **Maven** build Create **Docker** image and deployment in **AWS** environment.
- Used **Jenkins** and **Docker** to run automation tests and deploy it to Development
- Used **Log4J API** for logging and debugging.

Environment: Spring Core, Spring IOC, Spring MVC, JavaScript, JQuery, JSON, Spring DAO, Spring Boot, Spring Batch, spring Security, Spring Integration, Hibernate, JSP, Oracle, PL/ SQL, XML, AWS (EC2, VPC), spring web flow, Maven, JUnit, REST, HTML, CSS, AJAX, Jira, Angular JS, NPM/BOWER, Docker.

PROFESSIONAL EXPERIENCE:

Software Engineer at Wipro Limited

Client: Ericsson Inc., Bengaluru, Karnataka

Oct 2015 to June 2017

Project Description: Inter-Radio Access Technology Handover Management (IRATHOM)

IRATHOM is used to synchronize the data between a Global System for Mobile Communication (GSM) Radio Access Network (RAN) and Ericsson UMTS Terrestrial Radio Access Network (UTRAN) to support Inter-Radio Access Technology Handover (IRATHO).

Responsibilities:

- Used **Jenkins** and **Docker** to run automation tests and deploy it to Development
- Used **Log4J API** for logging and debugging.
- Designed the system based on **Spring MVC** architecture. Developed a business logic layer using **Spring Framework** and integrated **Hibernate**.
- Used **spring Object relational mapping (ORM)** and **hibernate** for persistence in database, created DAO's. Implemented **ORM Hibernate** framework, for interacting with Data Base.
- Worked on Service Oriented Architecture **SOA** and **RESTful** web services.
- Responsible for creating efficient design and developing User Interaction screens using **HTML5**, **CSS3**, Java Server Faces 2.0 (**JSF 2.0**), **JSP**, **JSTL**, **JavaScript**, **jQuery**, **AJAX** and **JSON**.
- Interacted with **Java controllers (JSON** to write/read data from back-end systems).
- Created **AngularJS** controllers, services and used **AngularJS** filters.
- Involved in integrations using **Maven** and **Jenkins**.

Environment: Java/JDK 1.7, Spring MVC, Restful Web Services, Hibernate, JSP, CSS3, HTML5, JavaScript, jQuery, AngularJS, XML, AJAX, JSON, Bootstrap, Junit, UNIX, MySQL, Maven.
