EXECUTIVE SUMMARY

Dynamic Business Leader with 20+ years of experience driving business process transformation, operations and quality management, organizational change, strategic innovation, and process optimization. Proven ability to lead digital transformations (Power Automate, RPA + Gen AI/ML), enhance customer experience, and optimize operations for growth and profitability. Expert in data-driven decision-making, change management, and cross-functional collaboration to deliver transformational impact across industries. Trained and certified on Lean Six Sigma Black Belt, PMP, ISO 9000-2008, Agile and Scrum.

Professional Synopsis

- **Business Strategy:** Market analysis, long-term planning, competitive analysis, zero quartile business performance
- **Business Process Transformation:** Lean Six Sigma, process reengineering, continuous improvement, Operational efficiency, SLA/KPI compliance, Quality Management (defect/error reduction) with eye for detail, Risk Management, Failure Mode Effect Analysis (FMEA), Statistical Quality Controls (SQC), Gage R & R, hypothesis testing, Upstream-to-Downstream Value Stream Mapping (VSM). Process Maturity assessment against industry benchmarks.
- **Digital Transformation:** IT modernization, automation (RPA + AI/ML), enterprise systems (ERP, CRM, etc.), expertise in ServiceNow modules ITSM, ITOM, HRSD, CLM, iCAT, SAP, ECC, S4 Hana, Ariba, Coupa, Oracle (all Finance, Payroll, Procurement ERPs), adept at RPA and power automation, translating business needs to functional requirement specifications for technology, documentation of Business Requirement documents and Solution designing, support blue printing of process for migration to new technologies.
- **Leadership & Team Development:** Cross-functional team leadership, mentoring, talent development, stakeholder management across all levels of organization. Ability to work in a high-profile, high-pressure environment effectively. Exceptional influencing abilities and advanced communication skills to cut across the organizational levels and accomplish targets with inherent abilities to interact and maintain relations with Sr Business Leaders, all levels of leadership and cross functional teams, exercising independent judgment and initiative, Strong decision-making skills and effective at problem solving and negotiating resolutions.
- **Financial Management:** Budgeting, cost reduction, resource allocation, cost benefit analysis.
- **Data Analytics: Lean Six Sigma Black Belt Certified,** Predictive analytics, Business intelligence, performance metrics, predictive analytics. Power Point, Excel, SharePoint, Power BI, Tableau, QlikView and other visualization tools.
- **Change Management:** Stakeholder engagement, leadership alignment, communication strategies.
- **Project Management: PMP trained.** Strong organizational skills with work plan development, initiative to drive and deliver, addressing issues without prompting. Tools used Jira & Confluence, Agile, Waterfall, PMO Microsoft Office Suite, including high proficiency in using Excel, Word, PowerPoint, MS Project, Teams, Visio, and SharePoint. Excellent organizational, facilitation, and presentation skills.

Professional Experience

OSS Inc

Mar 2023 – till date

Project Manager, Client: United Airlines

- Led project teams to successful completions.
- Coordinated with various departments on multiple initiatives.
- Define and drive project strategy and execution, ensuring alignment with business objectives, stakeholder expectations, and cross-functional priorities.
- Lead full project lifecycle management, from initiation to delivery, overseeing scope, schedule, budget, and risk mitigation.
- Build and maintain strong stakeholder relationships, collaborating with executive leadership, engineering, product, and operations teams to drive alignment and execution.
- Oversee and optimize project governance, enforcing change control, issue resolution, and best practices to enhance efficiency and delivery outcomes.
- Manage and mentor cross-functional teams, fostering collaboration between program managers, analysts, and technical teams.
- Leverage industry-standard tools like Jira, Confluence, and ServiceNow to streamline workflows, track progress, and ensure operational efficiency.
- Drive continuous improvement, conducting post-implementation reviews and integrating lessons learned into future strategies.
- Ensure timely incident resolution, prioritizing backlog management and sprint planning to maintain efficiency.
- Define and drive project strategy and execution, ensuring alignment with business objectives, stakeholders.
- Developed and implemented process improvements resulting in a **25% increase in efficiency**.

- Managed project budgets, leading to a **15% reduction in overall project costs.**
- Develop high-level project plans and ensure that the scope and approach are fully understood by all stakeholders.
- Plan, direct and coordinate projects from initiation through to implementation.
- Monitor and communicate the progress of project delivery and ensure timely and effective communication of project status in terms of cost, forecast, schedule and assessment of risks/issues.
- Involve in various phases like Requirements, Analysis/Design
- Pro-actively anticipate project risks and issues and ensure adequate mitigation is put in place to ensure delivery is not compromised.
- Ensure effective change control procedures and processes are efficiently used to maintain control on scope, schedule and cost.
- Manage project costs, resources, change requests, risk, and issues to ensure that maximum business benefit maintained as well as provision of regular project status updates.
- Identify and monitor Project Dependencies.
- Identify and track key project milestones.
- Oversee quality assurance and ensure appropriate levels of end-to-end testing resources across the project are deployed.
- Facilitate Post Implementation Reviews and ensure lessons learned are carried forward appropriately.
- Maintain the budget Forecast working with the offshore PM.
- Lead cross-functional project teams and work with Business Analysts/partners to determine and translate business requirements into technology solutions.
- Utilized MS/Office Suite of MS/Project, MS/Word, MS/Excel, MS/PowerPoint, MS/Visio and SharePoint.
- Defined and managed scope, schedule, and cost for several projects.
- Working experience on Jira and ServiceNow tools.
- Served as a single point of contact (SPOC) for clients for issues related to change of scope, compliance to regulatory requirements.
- Participated in User acceptance testing to ensure all the business requirements is fulfilled.
- Conduct planning and operational readiness assessments to provide an effective transition into production.
- Facilitated sprint planning, daily scrums, retrospectives, stakeholder meetings, and website demonstrations.
- Utilized Agile Scrum practices to help the team increase their velocity within the first year of Agile adoption.
- Responsible for managing incidents, tickets and ensuring that they are resolved in timely manner by prioritizing them in the sprint backlog.
- Ensure that each story going into the sprint has a strong business case and proper Cost Benefit analysis is carried out before the story is picked up for the sprint so that candidates with maximum value are picked first.
- Responsible for designing of processes, baseline the process against the best practices and frameworks to identify areas for improvements, which eventually formed the business requirements.
- Involved in developing target Business Processes and aid the client with process design and development, process tracking, deployment and maintenance.
- Managed IT and business projects and contributed to PMO process improvements.
- User documentation for new implementation and presenting them to business.
- Authored user stories in detail, capturing - business requirements, display business rules, use case narrative, requirement scope, authoring approach.
- **Deliver measurable impact—accelerating project timelines by 2-4 weeks and achieving \$500K+ in cost savings.**

Accenture Technologies Limited

July 2017-Feb 2023

Business Process Transformation - Senior Manager

- Experienced progression from Assistant Manager to Senior Manager, overseeing a team of 12 Leads in Digital and Business Transformation.
- Led the feasibility study, solution design, development, and deployment of Robotic + Cognitive (GenAI, ML, OCR), power automate process automation.
- Spearheaded Lean and Six Sigma initiatives and projects. Identified and supported development & deployment of predictive analytical tools using python.
- Managed ERP/Platform migration projects in Service Now modules, CLM, SAP, ECC, Ariba, Coupa, Oracle, S4 Hana
- Managed assignments in Source to Pay, Procurement, P2P Helpdesk Contract Lifecycle Management, eSourcing, Signature Support on Contracts, PR to PO, Receipting, Invoice Processing & Payments, and advanced analytics using R & Python.
- Supported development and deployment of Gen AI chatbot for Procurement Helpdesk.
- Had conducted automation studies along with solution designing, development and deployment of RPA, AI , cognitive solutions across all platforms in Source to Pay domain for multiple clients in varied industries.
- Led Operational Excellence initiatives, ensuring proactive measures are implemented, tracked, and recorded to meet SLAs/KPIs through data analysis and operational maturity assessments. Identified Voice of the Customer (VOC) from various client reviews and translated them into measurable metrics to track progress effectively.
- Quality management through building quality framework and measuring quality, ensuring errors/defects in operations are reduced and the client agreed targets on quality are met.
- Risk management through creation of FMEA at process level to eliminate/mitigate identified risks.
- Led projects for process improvement and collaborated with clients on re-engineering efforts. Collaborated with clients and business units to conduct process diagnostics using Value Stream Mapping (VSM), Lean Six Sigma projects, automation, and gap analysis to identify and implement transformational projects.
- Developed a Digital Quality Framework to improve FPY and SPY percentages, conducted risk assessments, FMEA, and created and tested Business Continuity Plans. Provided sales support, including proposal development, RFP assistance, and SOW creation.
- Responsibilities include defining the project/program scope, resource requirements, budget, timeline, deliverables, dependencies, milestones, and plans
- Proactively identify and maintain program risks and interdependencies across the life cycle, making contingency plans to address issues that pose risk to budget, schedule, and scope

- Engage with cross-functional leaders across all business areas to determine effective Root Cause Analysis, short-and long-term solutions, and remediation. Drives results and resolve issues including the ability to assess and correct course as necessary.
- Facilitated internal and external client/vendor facing meetings ensuring clear, complete, thorough, and consistent documentation of status, issues, risks, budget, key decisions, root cause and final resolution.
- Oversee technology/vendor selection and facilitates vendor management
- Understands Business Architecture and Technical Solution Architecture, working with IT and external partners to evaluate and implement new technologies
- Prepare and presents presentations to key leadership and stakeholders
- **Key Results: Improved resource efficiency by 2000+ FTE, achieved \$1Bn+ in sourcing savings, and delivered cost optimizations of approximately \$2Mn.**

Cognizant Technologies Limited

April 2016 – July 2017

Process Excellence (PEX) - Manager

- Managed assignments in Procure to Pay, Order to Cash, Record to Report, Reconciliations, and Payroll. Fostered a culture of continuous improvement through training, coordination, and the implementation of Lean/Six Sigma principles in daily operations.
- Led and executed high-impact client transformation and improvement projects, ensuring timely completion and realization of benefits. These projects utilized standard process improvement methodologies such as Six Sigma and Lean, or were based on practical, analytical problem-solving to address pain points and identified improvements.
- Had conducted automation studies alongwith solution designing, development and deployment of RPA, AI , cognitive solutions across all platforms in Procure to Pay and Payroll domain for multiple clients in varied industries
- Spearheaded client projects to understand customer needs, business priorities, and goals, converting these into measurable metrics such as SLAs/KPIs, and consistently driving and achieving green metrics. Delivered Green Belt, Black Belt, and Lean training to operations teams.
- Quality management through error reduction in operational processes.
- Risk management through creation of FMEA at process level to eliminate/mitigate identified risks.
- Conducted data analysis on client business and process data, presenting findings along with improvement projects to clients. Collaborated closely with clients to drive Zero-Quartile performance, leveraging Hackett and other Best-In-Class (BIC) metrics, and working to exceed BIC standards.
- Provided sales support, including proposal creation, RFP assistance, and SOW development. Led process studies using lean tools and Value Stream Mapping (VSM) to identify opportunities for automation (RPA + AI/ML), guiding the solution design, development, and deployment.
- The role involved defining the automation project scope, resource requirements, budget, timeline, deliverables, dependencies, milestones, and plans, risk management
- Collaborated with leaders across business areas to negotiate and finalize automation/RPA projects, supported by data analysis and cost-benefit documentation. Prepared and presented progress updates to key leadership and stakeholders.
- **Key Results: Improved resource efficiency by 500+ FTE, achieving cost optimization of over \$500K.**

Intex Technologies India Limited, Delhi

Nov 2015 – Mar 2016

Manager - IT Services
