Cluster One Consulting, LLC

Project Management Consultant, Program Manager (2014 – Present)

Consistently executing and delivering solutions for amazing clients on Project Investments. Responsible for planning, executing, monitoring, and closing projects while ensuring they meet business objectives, stay on schedule, and remain within budget. Expert in Scope Management, Resource Planning, Risk and Issue Management, Partnership with Stakeholders, Task Management, Definition of Critical Path and ensuring Quality.

Client: UCare – Project Manager and Scrum Master (July 2024 – Present)

Leading Agile project delivery for a multi-year, multi-million dollar Digital Transformation program. Driving PI Planning sessions, build Miro boards, prioritize Epics, Features and Stories. Facilitating team collaboration during Agile and Scrum ceremonies, using the Azure DevOPS platform. Managing multiple critical deliverables as a hybrid Scrum Master, Product Owner, Project Manager, and IT Delivery Leader. Partnering with business stakeholders, track KPIs, identify and mitigate risk.

Client: Elevance Health – Program Manager (November 2017 – May 2024)

Led large teams as a Program Manager and Product Owner to deliver multi-million dollar solutions for Elevancehealth's Customer Experience Transformation, serving 40 million members. Consolidated multiple CRM Platforms, introduced new Mobile Apps, SMS member interaction, Data Quality increments Workflow optimization, improving customer interaction, claims processing, reducing complaints, reducing agent turnover, while adhering to FDA and HIPAA requirements. Integrated Customer Service Desktop platforms with Clinical Platforms (Epic RCM, Cerner, Facets, Athenahealth) through data exchange, API and other interfaces.

Introduced the first set of generative AI functionality into ELV's Call Center telephony and SMS tools to reduce reliance on human agents and enhance customer interactions (LivePerson AI-chatbots leveraging LLM, Genesys Cloud predictive engagement features, real-time conversation summaries and sentiment analysis).

Executed under a SAFe Agile framework, led PI Planning sessions, built Kanban boards, prioritized Epics, Features and Stories, identified and mitigated risk. Partnered with Subject Matter Expertise across Product Engineering, Technology, Consumer, Commercial, Government and Pharmacy divisions. Pega CRM, Compass, Sydney, IBM Watson chatbot, LivePerson, Genesys Cloud.

Client: US Bank – CRM Program Leader, Portfolio Manager & Group Manager (June 2016 – November 2017)

Program Manager, Product Owner and Portfolio Leader overseeing a \$90M+ CRM portfolio across Salesforce and MS Dynamics. Delivered multiple phases of the CRM Program Portfolio for Commercial and Wealth Management units to enhance the Customer Experience and respond to regulatory / KYC initiatives during a time of severe organizational ambiguity and chaos. Led and coached a team of Project Managers to plan, execute and deliver on time and under budget.

Built a trusting relationship with leaders from Branch Support, Strategy and Planning, Commercial / Consumer Banking, Wealth Management, Customer Service and Performance Analytics areas Successfully kept project performance under the bank's 1% financial expense variation tolerance. Platforms implemented: MS Dynamics CRM, Salesforce.com, Adobe Campaign Management, ServiceNow.

Client: Ameriprise Financial – Senior Project Manager (Jan – June 2016)

Short term contract to lead Digital Transformation data remediation efforts for Wealth Management's customer portals. Managed scope, budget, risk, and timeline performance using dashboards and reporting tools.

Client: Thrivent Financial – Project Manager (2014 – Dec 2015)

Led large teams to successfully implement a new Microsoft based CRM data integration and BI solution to track Financial Advisor performance and consolidate Customer Management into a unified platform.

Led HR teams to evaluate and set the foundation for the future Workday implementation of Core HCM and Recruiting (HR Transformation, Talent Management). Define the inventory of the existing HR applications, identified data sources, integration points and defined functional requirements for technical evaluation and estimations.

Defined timelines, aligned stakeholders, managed risk mitigation strategies, and optimized technical delivery.

Daugherty Business Solutions**Sr. Consultant & Team Manager (2012 – 2014)**
