

RENUKADEVI JAGANATHAN

SUMMARY

- Overall 11 years of IT experience as **JAVA FULL STACK Developer** with key expertise in **Java(8 - 17), SpringBoot(3.0), Angular(till 17),AWS, React, NextJS, NodeJS,PostgreSQL, MongoDB, Selenium.**
- Experience in both Development and production support.
- Recent experience with Healthcare domain knowledge and sensitive to handling of PHI
- Good domain knowledge in Banking and Finance
- Faster learner, would prefer to stay focused on completing development on time and ensure the requirement/DoR is understood and expectation is set with business
- Team player dedicated to analyzing procedures, planning and organizing experiments, redacting information and maintaining assigned equipment.
- Do not required sponsorship for employment visa status, nor will I require it in the future.

EXPERIENCE

Java Developer, 08/2024 - Current **Capital One**

- Developed and implemented Java applications using Spring, Hibernate and Struts frameworks.
- Created web services for data exchange between client-server applications using SOAP and RESTful web services.
- Configured application servers such as Apache Tomcat to deploy Java 17 applications.
- Involved in debugging issues related to memory leaks, threading model in production environment.
- Managed the development and implementation of infrastructure automation solutions using AWS technologies such as EC2, S3, ECS, EKS, Lambda.
- Performed analysis of existing cloud environment and developed strategies for migrating workloads to AWS Cloud.
- Configured backup plans for data stored in Amazon S3 buckets by scheduling regular backups and establishing retention periods.
- Integrated third-party services with the help of APIs into the existing architecture running on AWS Cloud Platforms.

Angular Developer, 02/2024 - 08/2024

CONTACT

Address: Houston TX

Phone: +1 7135300894

Email: renukajava149@gmail.com

TECHNICAL SKILLS

Operating Systems:

- Windows 7/8/10, UNIX/Linux, and Mac OS X

JAVA Technologies:

- Core Java 1.8, Java 8, Java 17,J2EE, JSP, Servlets, JDBC, Struts, Spring MVC, Hibernate, Java Reflection API, Java Persistence API (JPA), JSON, Web Services (RESTful & SOAP)

Web Technologies:

- HTML5, CSS3, XML, JavaScript, JQuery, Typescript, NodeJS, Next JS, **AngularJS**, AJAX, SOAP, JSON, JSTL, **Angular 16**

Programming Languages:

- Node JS, Java/J2EE (expert), SQL, PL/SQL, C/C++, MPI

Web/Application Servers:

- IBM WebSphere, WebLogic, Apache Tomcat, JBOSS, Glass Fish, IBM Liberty

IDE's:

- Eclipse, My Eclipse, WebStorm, IntelliJ Idea, NetBeans, Microsoft Visual Studio

HCSC, Blue Cross Blue Shield of Texas - Texas

- Rewriting **CARE PATH PORTAL** into Angular Application
- We inherited the **CARE PATH PORTAL** applications and there are several issues with the existing functionality..
- Migrated legacy code from older versions of **JSP to newer ones Angular.**
- Developed and maintained multiple Angular applications with TypeScript, HTML, CSS and JavaScript.
- Created custom directives to extend the functionality of existing components.
- Collaborated with backend developers to integrate RESTful APIs into the application.
- Integrated UI elements such as charts, tables, forms and other interactive features into the application using Angular Material.
- Built reusable components that could be used across different projects or applications.
- Followed coding standards set forth by industry best practices.
- Participated in sprint planning meetings to discuss upcoming tasks and deadlines.
- Completed continuous project and team reviews to maintain optimal productivity and quality of work.
- Delivered code to meet functional or technical specifications.
- Reviewed and modified unit and integration tests to improve software quality and reliability.
- Designed user-friendly software interfaces to simplify overall management.
- Integrated **third party APIs into the backend system** for additional features and functionality.
- Developed and maintained back-end applications using **Java, Spring Boot and Hibernate.**

Full Stack Developer for BCBSMN, 08/2023 - 01/2024

Cognizant - Houston, TX

- Developed React applications using **Redux state management** and RESTful APIs..
- Continuously researched and adopted new technologies and methodologies to remain competitive in Java 8 development.
- Created web services for data exchange between client-server applications using SOAP and RESTful web services.
- Integrated third-party libraries into existing React applications.
- Built reusable UI components that can be used across multiple projects with React.
- Deployed production versions of react applications to cloud services such as AWS.
- Handled Medical, Pharmacy, Vision and dental claims in the member portal (deductible, copay, out-of-pockets, Amount billed, who pays, claims processing - Approved, Denied and partial).

Modeling Tools:

- IBM Rational Rose, Microsoft Visio

Databases:

- MySQL, PostgreSQL, Oracle (version -11g, 10g, 9i, 8i), SQL Server, Cassandra, MongoDB

Cloud Computing:

- Amazon EC2, Amazon S3, Amazon RDS, AWS Lambda, Amazon SQS, AWS Identity and access management, AWS Cloud Watch

Other Tools:

- Log4J, JUnit, TestNG, Maven, ANT, Jenkins, Cucumber, Splunk, Jira, Putty

Frameworks:

- NextJS, Struts, Spring MVC, EJB, Tiles, Hibernate, JSF, Play, Grails, Cucumber

XML Technologies:

- XML, SAX, DOM, XSL, XSLT, XPath, WSDL, SOAP
- Log4J, JUnit, TestNG, Maven, ANT, Jenkins, Cucumber, Splunk, Jira, Putty
- Log4J, JUnit, TestNG, Maven, ANT, Jenkins, Cucumber, Splunk, Jira, Putty
- Frameworks:
 - NextJS, Struts, Spring MVC, EJB, Tiles, Hibernate, JSF, Play, Grails, Cucumber
- XML Technologies:
 - XML, SAX, DOM, XSL, XSLT, XPath, WSDL, SOAP
- Log4J, JUnit, TestNG, Maven, ANT, Jenkins, Cucumber, Splunk, Jira, Putty
- Frameworks:
 - NextJS, Struts, Spring MVC, EJB, Tiles, Hibernate, JSF, Play, Grails, Cucumber
- XML Technologies:
 - XML, SAX, DOM, XSL, XSLT, XPath, WSDL, SOAP
- Bachelor :- Computer and information sciences (Periyar University 2009)

- This is not an Adjudication system. Its online member portal for ordering idCards , and claim enquires.
- Developed and maintained scalable web applications using React.js, ensuring high performance and responsiveness.
- Integrated third-party APIs and services to enhance application functionality.
- Maintained version control repositories using GitLab. Modified existing software systems to enhance performance and add new features.
- Migrated legacy code from older versions of Angular to newer ones.
- Implemented authentication and authorization using JSON Web Tokens.
- Created custom directives to extend the functionality of existing components.
- Debugged and resolved issues related to React components. Integrated third-party libraries into existing React applications.
- Collaborated closely with UX and UI designers to ensure the best possible user experience while developing React applications.
- Utilized unit testing and other methods to enhance quality.
- Implemented custom UI components using React Native.
- Optimized performance of existing React Native applications.
- Integrated third-party libraries into the application using npm package manager.
- Built efficient, reusable, and reliable code by utilizing best practices in software development.
- Performed unit testing of code modules written in React 2, 4, 5, 6, 7.

Backend API Developer for BCBSMN - Next.js, 01/2023 - 03/2023

Cognizant - Houston, TX

- Developed stored procedures, functions, and triggers to support application requirements.
- Demonstrated strong problem-solving skills, resolving issues efficiently and effectively.
- Collaborated closely with project managers, designers, and other developers in order to complete tasks efficiently and effectively.
- Fetch and manage data from APIs using Next.js server-side rendering (SSR), and static site generation (SSG) features. Secure sensitive healthcare data during API communication.
- Secure coding practices and knowledge of healthcare data standards, like HL7 or FHIR.

Nodejs/Full Stack Backend Developer, 05/2022 - 12/2022

BCBSMN - Cognizant - Houston, TX

- Participated in Agile (Scrum) methodology and Involved in Design, development, System testing and User Acceptance Testing
- Completed 4 projects/end points for Project engage - Member routing, IDP routing, Forget password, Legacy Auth
- Implemented **Node JS** as a server-side proxy for an observing various response time

- Masters :- Computer and information sciences (Anna University 2011)
- Environment:
- Java - JDK, JEE, Spring framework, Spring Model View Controller (MVC), Spring IOC, Apache CXF, J2EE, JAX-RS, Java Server Pages (JSP), Servlets JDBC, AJAX, Web services (SOAP & Restful, WSDL), JSON, Java Beans, JQuery, JavaScript, Oracle 10g, WebSphere, Agile Methodology, SVN, Maven, JUnit, HTML,CSS, XML, XSLT, HTML/DHTML, Eclipse, Mongo DB.
- Log4J, JUnit, TestNG, Maven, ANT, Jenkins, Cucumber, Splunk, Jira, Putty
- Frameworks:
- NextJS, Struts, Spring MVC, EJB, Tiles, Hibernate, JSF, Play, Grails, Cucumber
- XML Technologies:
- XML, SAX, DOM, XSL, XSLT, XPath, WSDL, SOAP
- Bachelor :- Computer and information sciences (Periyar University 2009)
- Masters :- Computer and information sciences (Anna University 2011)
- Environment:
- Java - JDK, JEE, Spring framework, Spring Model View Controller (MVC), Spring IOC, Apache CXF, J2EE, JAX-RS, Java Server Pages (JSP), Servlets JDBC, AJAX, Web services (SOAP & Restful, WSDL), JSON, Java Beans, JQuery, JavaScript, Oracle 10g, WebSphere, Agile Methodology, SVN, Maven, JUnit, HTML,CSS, XML, XSLT, HTML/DHTML, Eclipse, Mongo DB.

- Implemented RESTful web services for various client-side applications.
- Integrated third party APIs into the backend system for additional features and functionality
- Monitored resource usage through Amazon CloudWatch dashboards to identify potential issues before they become critical problems.
- Worked closely with DevOps teams for continuous integration and delivery of software products using Terraform playbooks.
- Performed root cause analysis of production issues related to serverless architecture components such as Lambda functions or API Gateways.
- Conducted research on new technologies that could be utilized within the backend architecture.
- Reviewed code written by other developers to ensure it adheres to coding standards.
- Managed source control repositories such as GitLab., ensuring versioning accuracy across projects.
- Implemented modules into Node JS to integrate with designs and requirements
- Developed cloud-native applications using Amazon Web Services services such as S3, Lambda and API Gateway,CloudWatch Logs.
- Implemented serverless architectures with AWS Lambda functions, API Gateway and DynamoDB.
- Developed stored procedures, functions and triggers to support application requirements.
- Researched new venues for events and created detailed reports for management review.

ENVIRONMENT: NodeJS 18.9,Aws Lambda Functions,postman,Smile CDR, Gitlab, Docker,Postgres,**ReactJS**,NextJS with tRPC, TypeScript..

Full Stack Developer, 05/2021 - 05/2022

FedEx - Memphis, TN

- Participated in Agile (Scrum) methodology and Involved in Design, development, System testing and User Acceptance Testing
- The application is based on Micro Service Oriented Architecture using Angular 9.0 and Cassandra DB and MySQL to develop Single Page Applications (SPA)
- Implemented Angular 4.0 directives, expressions, routing capabilities for bookmarking, filters, validations and Angular UI components, Components, ng-Modules, Providers, Services and classes for navigation respectively
- Worked with Angular CLI and Typescript in Angular 4.0 to create Controllers and Angular components for the Web Pages. Optimized performance is achieved by Angular 4 Lazy Loading
- Used Spring Boot which is radically faster in building cloud Micro Services and develop spring based application with very less configuration
- Involved to implement various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library

- Implemented Elastic Search for caching to enhance the performance of application
- Implemented modules into Node JS to integrate with designs and requirements
- Used Node Package Manager (NPM) to manage modules & used it to install useful tools as Grunt and Express
- Used Express JS which is fast, assertive, essential and moderate web framework of Node.js that helps manage a sever and routes. Worked with Express JS which gives MVC Structure to the Node JS
- Built-in AJAX HTTP Service with observables is used extensively for making quick and incremental updates to UI of the application
- Applied to the business modules integration using Spring Boot, Cassandra DB
- Worked in integrating JMS with SPRING BOOT by providing an instance which is embed with Active MQ
- Deployed frontend application using AWS S3 and configured CORS to consume RESTful services from another domain
- Deployed Spring Boot based micro services on Docker containers using Amazon ECS. Experience in introducing Docker utilizing Docker tool compartment
- Condition provisioning arrangements utilizing Docker. Authenticating Users and to provide the security to Restful web services using OAUTH 2.0
- Using Swagger Framework, actualizing the Restful API and Swagger gives the rich UI to test API
- Worked on unit test cases using Karma and Jasmine on client side. Wrote comprehensive Unit test cases using JUnit and Spock
- Load data from various data sources into HDFS using Kafka
- Worked with the configured and maintained Jenkins to implement the CI/CD process
- **Environment:** Angular 4.0, **Node JS**, HTML5, CSS3-SASS, Twitter Bootstrap4.0, ES6 JavaScript, **React-Axios**, AJAX HTTP Service, **TypeScript**, Spring boot, JPA, jQuery, OAuth2.0, Apache Kafka, Active MQ, Jenkins, Bamboo, Log4j, MY SQL, Cassandra DB, Elastic search, Redis, NPM, Web pack, RESTful, EC2, AWS S3, EBS, Elastic Load Balancer, Junit4, Docker, Spock, Karma, Jasmine, Eclipse Java EE IDE.

Sr Java Developer, 02/2020 - 04/2021

Sunera Technologies - Frisco, TX

- Worked on gathering the requirements and developing a working architecture to deploy
- Worked on generating sequence and data flow diagrams using UML
- Create team-specific agile process flow in JIRA to move tasks from one activity to another.
- Development in Java EE, including GUI, business logic, and data access.
- Designed and developed UI screens with JAXB and JSF (MVC) to provide interactive screens to display data

- Developed the business layer logic and implemented EJBs, Session beans.
- Implemented Java and J2EE Design patterns like Business Delegate and Data Transfer Object (DTO), Data Access Object and Service Locator
- Developed and implemented web services and used Spring Framework.
- Prepare Java/J2EE development structure for XCode, Maven.
- Involved in the creation of web services, WSDL, and web methods with Annotation in Hibernate. Used the Spring container for the data source and to load the Hibernate specific classes.
- Involved in developing the UI panels using JSF, XHTML, CSS, DOJO, and JQuery.
- Involved in the creation of an interface to manage the user menu and bulk update of attributes using Angular, ExtJS, and jQuery.
- Developed AJAX scripting to process server-side JSP scripting.
- Integrated MVC framework, Backbone.js, to the existing web applications.
- Worked on maintaining the database system using Sybase.
- Used Xcode as an IDE, configured, and deployed the application onto the WebLogic application server using Maven build scripts to automate the build and deployment process.
- Building and deploying the JAR files on JBoss to support testing and stable maintenance.
- Worked with Oracle in maintaining the vendor and patient databases, and connecting them by JDBC.
- Experience in writing test cases using JUnit testing framework and configuring applications on WebLogic Server.
- Developed the web interface and interaction using Stripes and Angular.
- The web interface was made easy to secure with the Spring framework.
- Experience in working on Web Application Security scanning tools - AppScan, VeraCode.
- Analyzing report requirements and developing the reports by writing Teradata SQL Queries and using MS Excel, Power Point, and UNIX.
- Write bash and Perl scripts for file maintenance and web page generation using common utilities, including vim, sed, find, grep, and rsync.
- Worked to store the data on the cloud storage service.
- Developed client-side application using Java Swing framework.
- Designed, developed, implemented, and maintained custom Ant tasks in Java and Groovy.
- Wrote the Grails Sanitizer Plugin to address security of Rich Text in Grails applications.
- Design, develop, and test SOA services using SOA/Web Service/Oracle Fusion Middleware.
- Extensive experience in developing applications using Java and related technologies using WATERFALL and AGILE (SCRUM) methodologies
- Updating status on a daily basis and participating in user story grooming and estimation sessions.

- Developed React applications using Redux state management and RESTful APIs.
- Developed JavaBeans with Hibernate for necessary transactions, like fetching the required data and updating the vendor information.
- Utilized Jenkins, Git, and Eclipse for deployment on test servers and to move towards CI/CD.
- Worked on Jenkins to integrate the code and perform testing on it.
- Manually tested the web application through different environments.
- Performed SOA/web services testing using SOAP UI, wrote adaptors to test/invoke web services.
- Created custom components, forms, and interfaces for user interactions in React.
- Extensively used Selenium (XPath and CSS locators) to test the web application
- Used SOAP UI tool to test SOA-based architecture application to test SOAP services and REST API.
- Performed unit testing of code modules written in Angular 2, 4.
- Involved in the development of test plan, scenarios, and test scripts for manual, automation, and functional testing of the application.
- Contributing effectively at many different points in a project life cycle as an individual contributor.
- **Environment:** Java 8, JPA, Spring, Hibernate, Struts, Stripes, EJB, JSF, JQuery, Ajax, ReactJS, JavaScript, Oracle 11g, Jira, Maven, PL/SQL, JDBC, Solr, Apache CXF, JAXB, NoSQL, CI/CD, Jenkins, Cloud logging, Cloud Storage, ActiveMQ, REST, XCode, Weblogic, Node.js, Bootstrap, Sybase, Backbone.js, Angular 1-4, WODM 8.1, Acegi Security, JUnit, Agile, UML, JSP, JBoss, Servlet, Selenium, SOA.

Full Stack Developer, 06/2018 - 01/2020

Santander Bank - New York

- Followed agile software development practices, including paired programming, test-driven development, and Scrum status meetings.
- Developed and implemented code on new requirements as a developer using Spring MVC and Hibernate, using Agile Methodology.
- Developed Use Case Diagrams, Object Mapping Diagrams, and Class Diagrams in UML.
- Migrated legacy code from older versions of **Angular** to newer ones.
- Developed Controller and Business layers of the MVC using Spring.
- Developing APIs to support AngularJS UI migration and XSDs to build web service data.
- Developed and maintained multiple Angular applications with TypeScript, HTML, CSS and JavaScript.
- Created custom directives to extend the functionality of existing components.
- Developed code to consume web services using SOAP and REST.
- Developed RESTful web services using JAX-RS.
- Finding Memory Issues by using JVM memory management tools.

- Refactored the bad code to the best design patterns.
- Developed Sequential and UML notation documents for the new tasks.
- Wrote SQL queries to analyze the data.
- Implemented content-based message router for outgoing XML web service requests, then processed the response messages to insert into an enterprise database.
- Used Bindy, Stax, and JAXB with Camel to work with CSV and XML files. Used Groovy to design and develop the web-based applications.
- Configured the xml files for spring security injection to ensure back-end security by discriminating the role of users as well as access authority for the URIs and server side assets
- Made the integration of data in several applications in favor JSON documents with dynamic schemas using Mongo-DB (NoSQL) database
- Used JIRA to track the progress of the project and wrote test cases. Used JUnit as a testing framework in a Test-Driven Development environment.
- Used Spring MVC for implementing the web tier and developed web-based application service components. Configured beans using Spring IoC.
- Used Hibernate in the data access layer to access and update information in the database.
- Used Hibernate Query Language (HQL) to query the database for complex data
- Used Spring MVC Model-View-Controller to handle and intercept user requests, and used various controllers to delegate the request flow to the backend tier of the application.
- Exposed Restful web services using JAX-RS and implemented Angular promises to handle asynchronous communication with our Restful API for various requirements.
- Extensively used XML and Java Architecture for XML Binding (JAXB) to map java classes to XML representation
- Build Restful API web services using Node.js and Express.js, and use a full complement of Express, AngularJS, and Node.
- Coordinated with the QA team for the development of the test plan, test cases, and test code. Responsible for defect allocation and resolution using Selenium.
- Used Jenkins for continuous integration, and Go for continuous delivery/deployment of the applications.
- Developed server-side software modules and client-side user interface components deployed entirely in Compute Cloud of Amazon web Services (AWS)
- Hands-on experience in developing AWS CloudFormation templates and setting up auto scaling for EC2 instances. Involved in the automated provisioning of AWS cloud environment using Jenkins and Chef.
- **Environment:** Core Java, J2EE, JDK, spring MVC, spring security, spring IOC, Hibernate, Angular JS, JSP, JavaScript, Servlet's, JAX-RS, JAX-WS, HTML5, JavaScript, CSS3, Oracle Database, SQL, JUNIT, Agile, RDBMS, GIT, Apache Tomcat, Maven, Jenkins, SOAP, REST, RESTful, JAX-RS, JVM, UML, XML,

Mongo-DB (NoSQL), JSON, HQL, Node JS, Express JS, Amazon web Services (AWS), Amazon EC2, Jenkins.

Java Developer, 04/2016 - 05/2018

Charles Schwab - Houston, TX

- Agile development (2 week sprints/Iterations), Test Driven Development (TDD), Junit, Mockito, Maven, JIRA issue navigator, Crucible Code Reviews is part of every day's work
- Developed application on **spring 3.x framework** by utilizing its features like Spring Dependency injection, Spring Beans, Spring Security (ACEGI Security), Spring JDBC, Spring Web flow using Spring MVC
- Worked on **Spring Web Flow, Spring MVC** to build an application from scratch using Spring XML configurations and annotations.
- Wrote controllers to handle incoming requests and send output to the UI on Ruby on Rails. Used CQ5 Adobe using REST principles.
- Used AWS Amazon Web Services EC2 to run applications and workloads.
- Used Spring Security framework to set up authentication and authorization for the application using firm-wide single sign-on. Worked on Node JS Application with Express Framework.
- Developed persistence layer integrating Hibernate with Spring ORM support, also used Spring JDBC for lightweight database operations
- Used JPA Annotations for Mapping Objects to Tables, hibernate features such as Lazy Loading, Hibernate Query Language (HQL), Criteria and Pagination
- Experience with Service oriented architecture (SOA), developing SOAP web services based on JAX-WS (Document Style) using HTTP Protocol on Bottom Up style development for creating Endpoints
- Used Command and Query Responsibility Segregation (CQRS) to write domain logics and Data persistence on event sourcing patterns
- Used Digital asset management (DAM) for analyzing and designing new modules and ATG for applications
- Used Spring Framework for dependency injection, integration of Hibernate using Spring ORM support, and development of **RESTful web services** to give JSON output.
- Used EJB as a middleware in designing and developing a three-tier distributed application.
- Developed user interface using JSP, JSF, Ajax, LESS, Dojo, and jQuery.
- Used Drools to handle complex business rules using Rule Sets and Rule Flows.
- Integrated the Drools and JBPM to application framework, which involved dynamic creation of knowledgebase and Knowledge session.
- Responsible for designing, development, and delivery of the Workflow process using jBPM.
- Monitor application usage and protect your business from advanced threats with security reporting and monitoring using Azure AD and TFS.
- Implemented Java Persistence API (JPA) through Hibernate
- Wrote complex SQLs, Stored Procedures, PL/SQL using SQL developer and TOAD, executed on **JAVA 8** Oracle Database. Used **AWS Amazon Web**

Services CloudFormation templates and AMI to recreate instances.

- Involved in configuration, data conversion, and implementation of Oracle EBS Procure-to-Pay, Inventory, Warehouse Management, and Order-to-Cash modules.
- Used SVN as a source control tool for branching, merging, and maintaining code versions in the repository, enabled using Maven Versioning Capability.
- Used Maven for building, deploying application, creating JPA-based entity objects, and compiling GWT application.
- **ENVIRONMENT:** Java 8, Java 6, Agile, TDD, Spring, JPA, jBPM, Hibernate, SOAP, JAXB, DOJO, WSDL, WADL, RESTful, Calypso Jackson, Jasper Reports, JUnit, Mockito, Oracle, DB2, SQLs, CQRS, Apache Camel, JBoss Fuse 6.1, Python, Fuse Fabric8, WebSphere, React JS, Node JS, IBM MQ, PL/SQL Developer, iBATIS, SOAP-UI, FO, GWT, XSS, SQL Injection, Ajax, LESS, jQuery, JavaScript, CSS 3, Node JS, Kafka, Ext JS, Bootstrap, Unix, SVN, Git, Eclipse, JIRA, Microsoft SQL Developer, Maven.

Java Developer, 07/2013 - 10/2015

Qualcomm - India

- Involved in gathering system requirements for the application and worked with the business team to review the requirements, and went through the Software Requirement Specification document and Architecture document.
- Developed the application using **Spring Framework** that uses Model View Controller (MVC) architecture with JSP as the view
- Developed presentation layer using JSP, HTML, and CSS, and JQuery, Ajax, and JavaScript.
- Developed and implemented **Java applications using Spring, Hibernate and Struts frameworks.**
- Developed server-side services using Spring Web Services (SOAP, WSDL)
- Extensively used Spring IOC for Dependency Injection.
- Developed J2EE components on Eclipse IDE. Used Restful web services with JSON.
- Consumed and Developed Web services (REST) through JAX-RS in Apache Axis to interact with other components
- Used Oracle 10g database for table creation and was involved in writing SQL queries using joins and stored procedures. Used Apache CXF, an open-source tool, to generate Java stubs from WSDL.
- Used multithreading and concurrency, and implemented threads while preparing and generating mails.
- Used Hibernate for Object-Relational Mapping and for database operations in the MongoDB database.
- Used JUnit for testing the application and Maven for building projects. Deployed the applications on WebSphere Application Server.
- **ENVIRONMENT:** Java 8, Java 6, Agile, TDD, Spring, JPA, jBPM, Hibernate, SOAP, JAXB, DOJO, WSDL, WADL, RESTful, Calypso Jackson, Jasper Reports, JUnit, Mockito, Oracle, DB2, SQLs, CQRS, Apache Camel, JBoss Fuse 6.1, Python, Fuse Fabric8, WebSphere, React JS, Node JS, IBM MQ, PL/SQL

Developer, iBATIS, SOAP-UI, FO, GWT, XSS, SQL Injection, Ajax, LESS, jQuery, JavaScript, CSS 3, Node JS, Kafka, Ext JS, Bootstrap, Unix, SVN, Git, Eclipse, JIRA, Microsoft SQL Developer, Maven.

EDUCATION AND TRAINING

Master of Science, Information Technology, 2011

Anna University

Bachelor of Science, Computer Applications, 2009

Periyar University
