ADDITIONAL SKILLS

Project Planning

Process Improvements

Process Automation

Data Analysis

- Worked with Excel Power Query to automate some of the manual Excel processes and provide the data to businesses on a timely basis.
- Developed SSIS packages to gather data from various sources across the business such as databases, SFTP, Excel files and loaded them into our server.
- Monitored and updated the KPI Dashboard for any changes in a timely manner to provide insights to business on key metrics.
- Worked on a migration project to move existing tableau reports into looker and built new dashboards.

SENIOR BUSINESS INTELLIGENCE ANALYST

West Bend Insurance / June 2019 – April 2022

- Gathered data from oracle, MYSQL & Excel sources and loaded them into SQL Server using SSIS packages.
- Developed Power BI Dashboards using various data sources to help business make KPI decisions.
- Experience with Microsoft Azure Databricks to gather data from multiple sources and load them into the server using notebooks.
- Experience with Microsoft Azure Analysis services to create data models where the users can get the data into Excel, Power BI, and Tableau
- Developed dashboards and ad-hoc reports using MS Power BI and SSRS for senior management team for analysis.
- Experience with DAX queries to create data models in PowerPivot & Power BI reporting.
- Collaborated with different stakeholders from various business units to validate and approve compliance tests independently.
- Created SSIS packages to implement error/failure handling with event handlers, row redirects, and loggings.
- Wrote calculated columns, Measures query's using DAX in Power BI to show good data analysis techniques.
- Created different visualization (Stacked bar Chart, Clustered bar Chart, Scatter Chart, Pie Chart, Donut Chart, Line & Clustered Column Chart, Map, Slicer, Time Brush etc.) in Power BI according to the requirements.
- Using SQL Server Reporting Services (SSRS) delivering enterprise, Web-enabled reporting to create reports that draw content from a variety of data sources.
- Developed custom calculated measures using DAX in Power BI to compare the company's industry wide.
- Held meetings & training with the business users to help them understand and self-serve on the Power BI dashboards.
- Experience with GIT Repo's to push the code changes and publish across various environments.
- Used MS Excel/Access VBA SQL to send system generated e-mails, manage and report embedded Excel documents.
