

Khaja Babu Shaik

+1 (913) 206 6234 | khajababushaik012@gmail.com | [Linkedin](#)

PROFILE SUMMARY:

- Having 6+ years of experience in Information Technology industry in various roles with excellent experience in Software Integration, Linux Administration, Configuration, Production support, Solid Understanding of Cloud Computing strategies & expertise in the areas of Build and Release management, CI/CD Pipelining, DevOps Engineer Build & Release Management, AWS Cloud Services.
- Hands on experience in installing and administrating CI tools like **Hudson/Jenkins, Subversion, Bamboo** and **Nexus/Art factory**.
- Worked on infrastructure with **Docker** containerization. Collaborated with development support teams to setup a continuous delivery environment with the use of **Docker**.
- Experienced in Cloud automation using **AWS Cloud Formation templates, Python, Ruby, Chef (DevOps), Puppet (DevOps), Vagrant**.
- Hands-on experience with **Ansible scripts** and Ansible Tower as Configuration management tool, to automate repetitive tasks, quickly deploy critical applications, Environment configuration Files, Users, Mount points, Packages across the classified inventory as needed.
- Used **Ansible scripts** to automate the Cassandra Tasks such as new installations/configurations and Basic Server Level Checks
- Installed and configured an automated tool **Puppet** that included the installation and configuration of the **Puppet master**, agent nodes and an admin control workstation.
- Experience in Infrastructure Development and Operations, involved in designing and deploying utilizing almost all the **AWS** stack like **EC2, EBS, S3, VPC, RDS, SES, ELB, Auto scaling, Cloud Front, Cloud Formation, ElasticCache, Cloud Watch, SNS, Route 53**.
- Expertise in scripting for automation, and monitoring using **Shell, Python & Perl scripts**.
- Extensively worked on **Hudson/Jenkins** and **Bamboo** for **continuous integration (CI)** and for End to End automation for all build and deployments.
- Designed **Network Security Groups (NSGs)** to control inbound and outbound access to network interfaces (NICs), VMs and **subnets**.
- Production experience in large environments using configuration management tools **Chef, Puppet** and **Ansible**.
- Wrote **Ansible** Playbooks with **Python** SSH as the Wrapper to Manage Configurations of AWS Nodes and Test Playbooks on AWS instances using Python.
- Expertise in **DevOps, Release Engineering, Configuration Management, Cloud Infrastructure Automation**, it includes Amazon Web Services (AWS), **Ant, Maven, Jenkins, Chef, SVN**, and **GitHub**.
- Virtualized the servers using the **Docker** for the test environments and dev-environments using **Docker containers**.
- Involved in setting up **JIRA** as defect tracking system and configured various workflows, customizations and plugins for the **JIRA bug/issue tracker**.
- Involved in **Linux administration activities** like troubleshooting of regular issues, configuration issues, applying patches, **kernel upgrades, package management**, diagnosing resource utilization and file system issues.
- Administered tasks like taking backups, expanding file system disk space, creating **NFS mounts, TCP/IP, UDP, OSI Model, N tier Architecture, DNS, DHCP, NAS, NFS, SSH, HTTP** and **HTTPS**
- Extensively used Ruby scripting on **Chef** Automation for creating cookbooks comprising all resources, Data bags, templates, attributes.
- Experience in branching, tagging and maintaining version across the environment using SCM tools like **Subversion, GIT**.

EDUCATION:

University of Missouri – Kansas City

Master of Science in Computer Science; GPA: 3.5/4.

Kansas City, MO, 64111

TECHNICAL SKILLS:

Operating Systems	RHEL/CentOS, Linux-Ubuntu, Windows, Sun Solaris
Build/Automation Tools	Puppet, Chef, Ansible, Ant, Maven, Jenkins, IBM Urban deploy, Hudson & Bamboo
Languages	Shell, Bash, Perl, Ruby and Python scripting
Databases	MySQL, MongoDB, Cassandra, PostgreSQL, SQL Server
Backup/Monitoring Tools	S3 (Simple Storage Service), Cron Jobs, Cloud watch, Opsgenie, Splunk, Nagios
Version Control Tools	Subversion, GIT, Tortoise SVN, Visual SVN
Virtualization/Containerization Technologies	VMWARE, VSPHERE 5.5/6.0, VCENTER SERVER, AWS ECS, Docker Container services, Pivotal Cloud Foundry, Vagrant
Cluster Management	Kubernetes, Docker Swarm
Web/Application Server	IIS, Tomcat, Apache, JBoss, WebSphere Application Server, Web Logic
Build and Deploy Tools	ANT, Maven, Gradle, Jenkins, Bamboo, TeamCity, TFS.
AWS Cloud	EC2, S3, Lambda, Auto Scaling, Cloud Watch, Cloud Formation
Web Technologies/ Programming Languages	Servlets, JDBC, JSP, XML, HTML, .Net, Java Script, Java/J2EE, C, C++, Ruby, Perl Scripting, Python, Shell scripting
Software Methodologies	Agile-SCRUM, Waterfall, RUP, Xtreme
Project Management/ Bug tracking Tools	JIRA, Confluence, Rally, Remedy, HP Quality Center, Bugzilla

WORK EXPERIENCE:

Client: Master Card, O'Fallon, MO

Jan 2024 - Till date

Title: DevOps Engineer

Roles & Responsibilities:

- Experience in Virtualization technologies like **VMWare, Vagrant** and worked with containerizing applications like **Docker, Kubernetes**.
- Involved in **AWS EC2/VPC/S3/SQS/SNS** based automation through **Terraform, Ansible, Python, Bash Scripts**. Adopted new features as they were released by Amazon, including ELB & EBS.
- Automated deployment of application using deployment tool (**Ansible**). Work with product owners to understand desired application capabilities and testing scenarios.
- Design, build, configure, test, install software, manage and support all aspects and components of the application development environments in **AWS**.
- Utilized AWS Cloud formation to create new **AWS** environments (e.g. Test) following best practices in VPC / Subnet design.
- Written Cloud Formation Templates (CFT) in **JSON** and **YAML** format to build the **AWS services** with the paradigm of Infrastructure as a Code.
- Responsible for the development and maintenance of processes and associated scripts/tools for automated build, testing and deployment of the products to various developments.
- Continuous integration with **Jenkins**. Continuously evaluate and recommend improvement to CI/CD processes.
- Used **Kubernetes** for creating new Projects, Services for load balancing and adding them to Routes by accessing from outside, created Pods through new application and controlling, scaling and troubleshooting pods through SSH.
- Integrated **Docker** container orchestration framework using Kubernetes by creating pods, configMaps and deployments.
- Used **Jenkins** pipelines to drive all microservices builds out to the **Docker registry** and then deployed to **Kubernetes**, Created Pods and managed using Kubernetes.

- Developed RESTful API's, which takes in an HTTP request and produces the HTTP response in JSON Format using **microservices**. Server monitoring using Splunk, created custom Splunk, dashboards, and reports to reduce user requests.
- Manage Production Server infrastructure environment, collaborated with development team to troubleshoot and resolve issues, deliver product release with frequent deployment with zero downtime deployment.
- Configuring, automation and maintaining build and deployment CI/CD tools git/ git-hub, Jenkins/Hudson, ANT, Docker-registry/daemon, Nexus and JIRA for Multi-Environment with high degrees of standardization for both infrastructure and application stack automation in **AWS cloud platform**.
- Worked on container based technologies like **Docker** and **Kubernetes**. **Kubernetes** is being used to orchestrate the deployment, scaling and management of **Docker Containers**.
- Developed **microservice** on boarding tools leveraging **Python** and **Jenkins** allowing for easy creation and maintenance of build jobs and **Kubernetes** deploy and services.
- Building/Maintaining **Docker** container clusters managed by **Kubernetes Linux, Bash, GIT, Docker**. Utilized **Kubernetes** and **Docker** for the runtime environment of the CI/CD system to build, test deploy.
- Extensively involved in infrastructure as code, execution plans, resource graph and change automation using **Terraform**. Managed **AWS infrastructure** as code using Terraform.
- Created **Terraform** scripts for **EC2 instances, Elastic Load balancers** and **S3 buckets**.
- Managed different infrastructure resources, like physical machines, VMs and even Docker containers using **Terraform** It supports different Cloud service providers like **AWS**.
- Built **Jenkins** jobs to create AWS infrastructure from GitHub repos containing **Terraform** code.
- Configure **ELK stack** in conjunction with AWS and using LogStash to output data to **AWS S3**.
- We had used **Ansible-Galaxy** for Templates and modified as per our requirement. Installed and Implemented **Ansible configuration** management system. Used Ansible to manage Web applications, Environments configuration Files, Users, Mount points and Packages.

Environment: Ansible, Jenkins, Kubernetes, Docker AWS (EC2, S3, EBS, ELB, RDS, SNS, SQS, VPC, Redshift, Cloud formation, CloudWatch, ELK Stack), python (BOTO API), Shell scripting, Ruby, Linux Administration, Terraform, Ant, MongoDB, JIRA, GIT, Splunk.

Client: Centene, St. Louis, MO

June 2023 -Dec 2023

Title: DevOps Engineer

Roles & Responsibilities:

- Handled **Docker** Engine, Docker-Hub, Docker Compose, Docker Registry, Docker Swarm and Orchestration tools such as **Kubernetes**. Responsible for container creation and management for different applications on Docker engine through writing and editing Docker files.
- Automated **AWS** components like **EC2 instances, Security groups, ELB, RDS, IAM** through **AWS Cloud information templates**.
- Configured applications on **Docker** applications by utilizing Docker Compose tool which uses a file configured in **YAML** format. Used **Kubernetes** to manage containerized applications using its nodes, Config-maps, Selector, Services, and deployed application Containers as pods.
- Experience in designing and deploying **AWS Solutions** using **EC2, S3, and EBS, Elastic Load balancer (ELB)**, **auto-scaling groups** and **OpsWorks**.
- Configuring new releases with Pre-deployment conditions like Triggers, Pre-deployment approvers, Gates.
- Worked with **libraries** for pipelines by adding new **variable groups** and **secure files**.
- Configured **Chef** Servers, worker nodes & bootstrapping Chef Nodes for configuration management; also proficient in creating Chef Templates, Recipes, Cookbooks, Resources, Roles, Attributes & Data bags.

Environment: TFS, .Net, Windows, SVN, GIT, MS Visual Studio, AWS, Docker, Kubernetes, PowerShell, C#, Java, Jira, SQL Server, MS office, MS Project, SharePoint, SSMS, OpCon Enterprise Manager Server, JAMS Automation Scheduler.

Client: Discover Financial Services, India

May 2020 - Dec 2022

Title: DevOps Engineer

Roles & Responsibilities:

- Creating fully automated CI build and deployment infrastructure and processes for multiple projects.

- Developing scripts for build, deployment, maintenance and related tasks using Jenkins, Docker, Maven, Python and Bash
- instances systems with Chef Automation. Wrote recipes, tools, **shell scripts** and monitoring checks.
- Installing and Configuring Monit, AppD & Grafana and Logstash and File Beat for monitoring and transferring logs to Elastic search
- Used **Micro services** architecture with **Spring Boot** based service through **REST**
- Experience in creating alarms and notifications for **EC2 instances** using **Cloud Watch**.
- Creating Lambda function to automate snapshot back up on **AWS** and set up the scheduled backup.
- Utilize Camel to integrate **microservices** with other **microservices** and **RabbitMQ** messaging exchanges.
- Worked on creating the Docker containers and **Docker** consoles for managing the application life cycle.
- Experience with **Elasticsearch, Logstash & Kibana stacks**.
- Used **Chef** to manage Web Applications, Config Files, Database, Commands, Users, Mount Points, and Packages.
- Implemented a Continuous Delivery pipeline with **Docker, Jenkins** and **GitHub** and **AWS AMI's**
- **Docker** file to manage customized containers, exposing a container with port redirect, container volume management, **docker** inspect,
- Experience of writing & managing **Chef Scripts** & using Linux automated deployments using Chef.
- **DynamoDB** and ordering based on the location of mobile users and ordering trends
- Experience with **Nagios/Observeium/New Relic** monitoring and alerting services for servers, switches, applications and services.

Environment: AWS EC2, S3, Cloud Formation, Dynamo DB, Kinesis, VPC, IAM, Tomcat Apache, Micro-Services, Cloud Watch, New Relic, Git, Linux, ELK Stack, Jenkins, Maven, Ansible, JVM etc

Client: Delphi Technologies, India

March 2019 to April 2020

Title: DevOps Associate

Roles & Responsibilities:

- Documented work done, skills required and mitigated in future projects.
- Build and Configuration of Internally developed Software, Release Management activities.
- Developed **UNIX** and **Perl Scripts** for the purpose of manual deployment of the code to the different environments and E-mail the team when the build is completed.
- Designed and developed scripts using batch, **Shell** and **Perl** for automating the build activities.
- Specialized in automating tasks and process through scripts, implementing branching models, implementing Build/Release solutions.
- Helped to solve queries of developers related to build release issues.
- Managed Perforce Repositories to download the artifacts during the build.
- Branching and merging code lines in the Perforce, adding revision lines and resolving all the conflicts rose during the merges while performing Integration and Rebase.
- Used Perforce as **Version Control System** for maintaining the discipline required working with the codes on different files.
- Extensively used Perforce as a Configuration Management tool to manage source code
- Worked closely with developers and managers to resolve the issues that rose during the deployments to different environments.

Environment: JIRA, SVN, Apache ANT, XML, Maven, Jenkins, Apache Tomcat, Shell Script, Unix/Linux, Windows, Oracle.

Certifications:

- Web Developer with java by Course era
- Machine Learning with Python by IBM Full Stack Developer
- Data Science Professional Certificate by IBM
- Salesforce Administrator
