

Ashok Patel, P.Eng, Six-Sigma Black Belt

122 Whalley Crest Saskatoon, Canada S7T0H9

Cell: +1-403-333-7999

ashokpateljob@gmail.com

Executive Summary:

A **dynamic** professional Maintenance system engineer with over **25 years** of experience designing, implementing, and managing **SAP S4 HANA Enterprise Asset Management / Plant Maintenance applications for effective Maintenance Planning and Scheduling**. Add value to your team with proven knowledge of SAP Asset Manager (**SAM**) for Asset Strategy Performance Management (**ASPM-RCM/RBI/SIS**) & **PdMS**, SAP Intelligent Asset Management (**IAM**), **Fiori**, project delivery, support, and Hyper Care. Excellent interpersonal, communication, problem-solving, and decision-making skills. Builds and maintains good relationships with senior management and core team members. Lead and motivate teams to deliver best-in-class Maintenance Management systems and projects. Delivering complex CMMS business technical requirements in **SAP S4 HANA 2022 EAM/PM/P2P, Business processes, Digital twin and Core master data for effective planning and scheduling**

Skills Highlights:

■ Multiple End to End implementation of SAP EAM/PM	■ Master data management for SAP EAM/MM/PS/FI/QM
■ Maintenance Strategy BOM set up & PM Optimization	■ Setup Information Management (Operation/Maintenance)
■ Preparation of SAP Business Blueprint, SOP & Training	■ Design/Implement CMMS/SAP Connected Applications
■ Maintenance and Turnaround Planning & Scheduling	■ Set up Business processes & KPIs for Oil & Gas, Chem
■ Digital Asset / Digital Twin for smart Planning/scheduling	■ Integration SAP EAM with P2P/QM/PS/PP/FICO/HR
■ Advise S4 HANA Asset Management Best Practices	■ Identify & Rollout Continuous Improvements (SAP EAM)
■ Cutover & Data Migration activity-LTMC/LSMW	■ Develop RICEF and FDS Data objects
■ SAP EAM Data transformation, Digital Transformation	■ Perform RCM, RBI, IPF & set Asset Integrity systems
■ Set MOC, Permit system and Maintenance strategies	■ Spare parts management for Project and Operations
■ Knowledge of SAP S4 HANA IAM, FIORI and SAP P2P	■ Configure FIORI launch pad and Custom apps

Accomplishments:

- Multiple Maintenance systems End-to-End Implementation of **SAP EAM/PM and Work Process Rollout for Upstream, Downstream, and Midstream Plants (Refinery, Pipeline, Terminal, and LNG)**
- Successfully implementation of a **Business cycle** of SAP PM with integration points with SAP MM, FICO, and PS
- Completed and Delivered two **Six Sigma** lean Projects and Saved US \$ 1 million
- Delivered Asset Management (**Data/Documents**) Solution for **30 billion** LNG Canada Greenfield Project
- **SAP ECC to ECC System** (one Company to another Company) and **SAP ECC to S4 HANA migration**
- Collected the design requirement from **SAP ECC to S4 HANA 2022 cloud Private Release(S4 IAM, Hierarchy, Terminology, Master data and Business work processes)**
- Develop Maintenance BOM standards & Define and Optimize **Maintenance strategies Plant Start-up**
- **Fiori/UI5 apps** utilization for **RSH(Resource Scheduling) / FSM (Field Service Management)**
- **S4 SHANA-Checklist** (Inspection/Calibration), **Phase-base** Maintenance for effective Planning/Scheduling

Academic Achievements:

- **P,Eng .Professional Engineer Designation with APEGA**(Canada Professional Engineering)
- **B.Eng. Bachelor of Engineering** in Electronics and Communication Bhavnagar University, **India** June 1996)
- **Six Sigma Black Belt** from **BMG University USA**

Experience:

Maintenance Engineering Specialist/iCMMS/SAP EAM LNG Canada Calgary, Canada

January 2019 – Till

*A Key member of the **LNG Canada Engineering and Maintenance Team** that is supporting a team of 35 personnel responsible for the design of Engineering and Maintenance systems for a “Multi-Billion Dollar” project.*

- Provides Digital technical expertise and professional advice in the implementation of **Maintenance Strategies**
- Develops and Supports Maintenance **Work Pack** requirements and provides Best Practices solutions
- Represents Digital Maintenance System **Focal** in technical discussions related to plant design changes (**MOC**)
- Provide Plant **Digitalization** support in terms of **Data and Information Management System** set-up
- Led the planning and analysis activities related to UI5 and SAP ECC to S4 HANA 2022 migration and design
- String, Unit and integration testing of Applications and **Interfaces with connected application(PTW)**
- Support SAP & Non-IT Interface design, IDOC monitoring and SAP **User Access Management**
- End-to-end responsibility for the **SAP EAM, PS, QM and MM**, in the SAP **S4 HANA 2022** environment
- Engages in full life cycle stages of project execution in the EAM area delivering on all phases of Projects
- Preparation of Business **Blueprint** for SAP PM and connected applications.
- Develop maintenance processes(**PM/PdM**) including Material, manpower and cost analysis
- Implement leader Standard Work processes including Hands-on tool time and competency framework set-up
- Managing and mapping the **ARIBA** catalogue for external procurement for Work order processing
- Set Data management framework from different phases of the Greenfield projects(EPC to Run and Maintain)
- Assist the line maintenance organizations in the implementation of approved new IT tools(FSR/PTW/RFIDs)
- Develop SAP Taxonomy for Key Data design and system setup for Operation/Maintenance Readiness
- Effective **Planning and Scheduling** to improve total productivity and reduce equipment downtime

Maintenance Excellence Engineer Oman LNG, Sur, Oman

February 2017 – December 2018

*A Key member of the **Oman LNG Maintenance Excellence team**, supporting Multi-Discipline Engineering and Maintenance team (Electrical, Instrument, Static and Rotating)*

- Review Oracle EAM ERP functionality and provide business support for “**Enhancement**”
- Build Maintenance and Reliability and Asset Integrity Dashboard Reports for Asset Health checks
- Set up Oracle ERP Asset Management System(**ISO14224**)for Maintenance Execution and Major Maintenance
- Identify Maintenance Gap based on Results of **RCM, IPF and RBI** studies and Optimize Maintenance Strategy
- Manage Quality Assurance “**Audit**” plan for Major Shutdown and Management of Change (MOC) Activities
- Manipulate and analyze “**Complex**”, high-volume, dimensional data from varying sources (DCS/PI, Vibration)
- Develop a **Maintenance Reference Plan** for major maintenance activities and projected maintenance costs
- Provides **Digital** technology to enhance Company profitability and improve productivity
- Develops, tracks, and maintains accurate backlog information, including man-hour requirements by craft and cost
- Carry out optimization studies of procurement Systems using Lean Operating Methods, **Six Sigma, and CI tools**
- Set up Maintenance routines for operation rounds and Safety walk management
- Support Bad actor analysis, RAM modelling and equipment Criticality based on Bowtie, Hazop and Hazid study

Integrated Maintenance System Specialist Canada LNG, Calgary, Canada

February 2015 – February 2017

*A Key member of the **LNG Canada Engineering and Maintenance Team** supporting a team of 15 personnel responsible for the CMMS system of a “Multi-Billion Dollar” project*

- Developed, implemented and rolled out Integrated Maintenance Management Systems, KPIs, e-SPIR, RRM, e-PTW, CIMS and Gas-GAME work process for safe and reliable Maintenance execution and plant operation

- Recognized by the Maintenance management build committee for simplicity from end-user and awarded an **“Excellent”** Rating for the development and delivery of a robust Asset Hierarchy for a Mega Green-field Project.
- Recognized for **“High quality data”** requirement which included Technical and Process data from Lessons learned
- Developed operate phase **Safety Critical Element (SCE)** performance standards which provide assurance
- Provide project support for the scope consists of the IM Design, Critical spare parts, **Commissioning and Start-up**, Project to Asset Handover, Critical and FEED documents for Project Delivery **“Success”** within the time frame.
- Develop **Asset Hierarchy, BOM Specification** and Data and Documents Quality requirements from EPC.
- Define the Operate phase requirement of **Smart Plant Foundation, 3DModel, Smart P&ID & Instrumentation**.
- Set up Maintenance budgeting and spending control methodologies.
- Identified Global Asset Management work process for Operation excellence and Maintenance/Integrity.

Maintenance Strategy Lead
Shell Canada Limited Calgary Canada

March 2013 –January 2015

*Project Lead supporting **Maintenance Reliability Turnaround** Multimillion Dollar Project*

- Review and report Maintenance **“Compliance”** for Performance standards and Maintenance strategies.
- Assure leadership for SAP master data integrity, maintenance Work processes and **KPI reporting**.
- Keep Maintenance Strategies up to date within their **5-yearly review cycle**
- Review management of equipment spare parts requirements via Maintenance and **Asset BOMs**
- Optimization of equipment performance through adjustment of maintenance tasks and setting up **RCA** for failures
- Tracking of high avoidable maintenance **“Costs”** and sharing with Discipline Technical Authorities
- Evaluate and identify opportunities to improve the application of **“Condition Based Maintenance”**
- **“Continuous”** Improvement for the maintenance execution delivery processes
- Perform **“Benchmarking”** Studies by monitoring competitor’s activities in maintenance management
- Develops and maintains **Maintenance Work Pack** and provides **Best Practices solutions**
- Integrated Planning and Scheduling for Operation and Maintenance in SAP PM/Primavera

SAP PM Maintenance & Integrity Implementation Consultant
Shell Canada Limited Calgary Canada

November 2011- February 2013

*Member of the core team supporting **MMS** Multimillion Dollar Project to know that our **“ASSET IS SAFE AND WE KNOW IT”***

- Develop inspection and preventative maintenance specifications to prevent equipment major accidents.
- **A Quality Management** Framework set up for data minimum standard and testing of maintenance tasks.
- Implemented Operational Performance Standard (PS) for **“Goal Zero”**
- Responsible for delivery of maintenance and turnaround planning and scheduling data requirement
- Apply RCM methodology for creating **Maintenance Strategies** for Safety/Production critical equipment
- Perform audit of maintenance strategy review and ensuring **“Global PM Library”** is used appropriately
- Deliver best-in-class **Maintenance Management System** to manage existing and newly introduced assets
- **Hands-on experience** of the implementation of CMMS long-strategic plan and focus areas

SAP PM Maintenance Management Support Engineer
Shell Canada Limited Calgary Canada

June 2007 – October 2011

*Team lead of supporting **MIE implementation** Multimillion Dollar Project*

- Monitor equipment performance and provide **scientific data-driven** improvement opportunities.
- Responsible for SAP-PM master data setup (Asset Hierarchy, Task list, PMs, BOMs, FLOCs and Equipment)
- Review Weekly, 14days, 30days, 90days, 52Week PM planning and support for scheduling with GWOS/Primavera
- Responsible for analyzing equipment and operating data and setting **“Data Quality Standards”**
- Review FSR (**Facility status Report**) and ensure no SCE (Safety Critical) PMs over dues.
- Lead SAP Training events for Planners, Discipline Engineers, Scheduler, and technician training
- Perform technical risk analysis and studies on managing assets and its effect on **production**

Member of the **Maintenance and Operation Core team** and led a team of 25 members

- Prepare detailed design specifications for the operation and testing of Process Network equipment.
- Develop & Execute Maintenance Plans and Strategies for **Efficient Operations of Process Network equipment**.
- **Optical Fiber cable** Network Splicing, Testing, Maintenance and Com missing.
- Installation, Commissioning and start-up of DCS, UPS, Diesel Generator, HVAC, security system and ACDB panels
- Analyze the root cause of failures and provide recommendations to reduce Optical fiber cable faults
- Implement **ISO 9001** system in maintenance organization and Perform safety audit for staff and contractor safety.
- Successfully completed and Implemented Six Sigma lean approaches on energy and Material Consumption.
- Planning, designing and Commissioning of IT data enters/hub/Towers.

Operation and Maintenance Engineer
Aarvee Denims Ltd Bavla, India

July 1996 to December 2000

Training | Certifications:

- Six Sigma Black Belt from BMG University (USA)
- Corrosion and inspection management System and Flange Management System
- Oracle-Asset Information Management Oman
- **Primavera(P6)** for Shutdown Planning and Scheduling Oman
- Visible Safety Leadership Oman
- SAP S4 HANA/ECC - EAM/PS/QM/PP from SAP Learning Hub
- Develop Maintenance strategy, PM Library & Data cleansing/Transformation
- ISO Standards ISO14224/55000/1/2
- Develop RICEFW components- functional specification, Test cases, Error handling and solution design
- Knowledge - SAP IS-U Customer Service and Plant Maintenance integration experience
- Tools - AVEVA, Hexagon Smart plan foundation, Smart connect, DMS(Assai web) and SPI(SIFRO)
- Knowledge - SAP IAM (AIN, ASPM, PAI. Asset Manager) and Fiori Launchpad
- Knowledge - SAP ASPM for RCM, RBI, CIU and RCA.SAP AIN for Vendor and Service management
- Knowledge - SAP PAI for Asset Health Prediction (Based on Machine learning) and Optimization
- Knowledge - SAP Asset Manager for Field Operations, Roles, SAP Basis, Infra and DB
- Knowledge - SAP P2P process mapping
- Knowledge - SAP Finance and Controlling

Key Focus Areas | Performance Indicators:

- **Training and Support:** Provide ongoing training to plant maintenance teams to enhance reliability processes
- **Performance Measurement:** Audit and support progress on the Reliability and Maintenance Roadmap
- **CMMS Enhancement:** Improve and standardize master data structures and workflows
- **Project Leadership:** Lead assigned projects, delivering effective solutions
- **Team Collaboration:** Participate in team activities to continually refine reliability & maintainability processes
- **Reliability Methodologies:** Failure Modes and Effects Criticality Analysis (FMECA), Root Cause Analysis (RCA), Reliability Centered Maintenance (RCM), and Total Productive Maintenance (TPM)
- **KPIs:** Reliability (MTBF-Mean Time between Failures), (MTTR-Mean Time to Repair) & Quality of RCA
- **Predictive technologies:** Vibration analysis, thermal imaging, ultrasonic testing & oil analysis
- **MRO:** Expert in Maintenance, Repair and overhaul and Shutdown/Turnaround
- **ERP Tools:** SAP, Maximo, Oracle ERS, ETL, e-SPIR,IAP
- **Integrity Tools :** CIMS(Corrosion inspection Management system), w-IMS(Web Integrity Management system)
- **Operations Tools:** PTW, SIMPOS, Alarm Manager, Plant Information(PI), DCS, HAZOP, Lock-Out-Tag-out
- **Process Safety :** HAZOP, IPF, Bow-tie, HSSE cases
