

ERIC BROOKS

4003 N Bernard St, Chicago, IL , 60618

904 647 3935 # www.linkedin.com/in/eric-brooks-b1465534b # eric.brooks1906@gmail.com

Dynamic and results-driven **Full Stack Engineer** with over 10 years of experience in designing, developing, and deploying scalable software solutions.

Proficient in both backend and frontend technologies, including **Python, Angular, Django, React, and Node.js**.

Skilled in implementing microservices architecture and cloud-native solutions on platforms such as **AWS, GCP, and Azure**, with a strong focus on performance optimization and system reliability.

Proven track record of enhancing team productivity through mentorship and adoption of best practices in **CI/CD** and Agile methodologies.

Adept at collaborating with crossfunctional teams to deliver high-quality, secure, and user-centric applications, while ensuring alignment with business objectives and improving customer satisfaction.

SKILLS

- **Languages:** Python, Java, C++, JavaScript, TypeScript, SQL
- **Frameworks:** React, Angular, Node.js, Express.js, FastAPI, Django, Flask, Kafka
- **Cloud:** AWS (ECS, Lambda, EC2, API Gateway), GCP, Azure, Microsoft Architecture
- **DevOps & CI/CD:** Docker, Kubernetes, Jenkins, Git/Bitbucket, GitHub, Terraform, CDK, Postman, Tenable, Jira
- **Databases:** SQL Model, NoSQL (Cassandra, Elasticsearch)
- **Tools & Frameworks:** API Security, RESTful APIs, GraphQL API, CI/CD, Agile Methodologies

PROFESSIONAL EXPERIENCE

Senior Software Engineer | **APN Consulting Inc.**, Monmouth Junction, NJ | June 2022 – Present

- Designed and developed scalable full-stack applications using **Python, Angular, and microservices** architecture, enhancing performance by 40% and ensuring high reliability.
- Integrated cloud-native solutions leveraging **AWS** services such as **ECS, Lambda, and API Gateway**, optimizing infrastructure costs by 20% and improving deployment agility.
- Developed dynamic user interfaces with **Angular**, ensuring a seamless and responsive user experience that integrates effectively with backend services.
- Built robust and secure **FastAPI** and **Django** APIs for efficient data processing, facilitating fast data exchange and improving application responsiveness.
- Automated **CI/CD** pipelines using **Python, Docker, and Terraform**, accelerating deployment cycles by 30% while maintaining consistent environment setups.
- Mentored junior developers on full-stack best practices in **Python** and **Angular**, leading to a 25% reduction in bugs and enhancing overall code quality.
- Implemented **API** security protocols and integrated **OAuth2**, ensuring data security and compliance with industry standards.
- Optimized database performance through effective use of **Redis** caching and improved querying techniques in **Cassandra** and **Elasticsearch**, reducing retrieval times by 35%.
- Developed comprehensive unit and integration tests using **Pytest** and **Mock**, achieving 90% test coverage and significantly reducing post-release issues.
- Designed and deployed serverless architectures using **AWS Lambda** and **API Gateway**, cutting operational costs for event-driven applications.

- Led workshops and knowledge-sharing sessions on advanced full-stack techniques, fostering an environment of continuous learning and development within the team.
- Collaborated closely with product managers and stakeholders to ensure that full-stack solutions align with business objectives, resulting in a 20% improvement in customer satisfaction.

Software Engineer | **Fusion Health**, Woodbridge Township, NJ | June 2019 – May 2022

- Developed and maintained full-stack applications utilizing **Django**, **Flask**, **React**, and **Node.js**, ensuring cohesive integration between frontend and backend services.
- Built high-performance, asynchronous APIs with **FastAPI** in **Python**, reducing response times by 30% and enhancing overall application efficiency.
- Conducted database optimizations and implemented data retrieval strategies using **Cassandra** and **Elasticsearch**, achieving a 35% reduction in query times and boosting data reliability.
- Deployed **Python**-based microservices on **GCP** with **Kubernetes**, enabling dynamic scaling and reducing latency during peak loads.
- Implemented test automation and continuous integration workflows using **Jenkins** and **Python scripts**, improving build reliability and deployment accuracy by 30%.
- Managed data migrations and ETL processes with **Python**, ensuring smooth transitions and accurate data synchronization across systems.
- Streamlined version control and code deployment by utilizing **GitHub** and **Bitbucket**, enhancing team collaboration and reducing merge conflicts.
- Established monitoring and logging solutions with **Postman** and **Tenable**, minimizing downtime through proactive system alerting and troubleshooting.
- Developed **RESTful** and **GraphQL APIs** to facilitate efficient data exchange, significantly improving system responsiveness and user experience.
- Collaborated in **Agile** sprints with cross-functional teams, ensuring full-stack features met requirements and exceeded performance expectations.

Software Engineer | **Deloitte**, New York, NY | June 2015 – May 2019

- Contributed to the development of full-stack applications using **Python**, **Flask**, **Django**, **React**, and **Angular**, improving scalability and maintainability across the board.
- Designed secure, high-performance **RESTful** and **GraphQL APIs**, enhancing data accessibility and reducing response times by 25%.
- Developed automation scripts in **Python** for infrastructure management on **AWS** and **GCP**, standardizing environments and reducing deployment times.
- Integrated logging and monitoring solutions using **Postman** and **Tenable**, decreasing system downtime by proactively identifying and resolving issues.
- Enhanced **CI/CD** workflows with **Jenkins** and **Python** automation, increasing deployment frequency and reducing release times significantly.
- Conducted code reviews and performance optimizations that improved system efficiency by reducing memory usage by 15%.
- Collaborated with data engineers to develop efficient data processing workflows, ensuring data integrity and minimizing latency in **ETL** processes.
- Employed **Agile** methodologies to deliver full-stack project components that met tight deadlines and aligned with cross-functional team goals.

EDUCATION

Bachelor's Degree in Computer Science | **Florida Institute of Technology** | Melbourne, Florida | Sep 2011 – Jun 2015

- Relevant Courses: Data Structures, Algorithm Analysis, Software Engineering, Database Management
