

KAJARI BHAUMIK

(737) 600-5773 | kbhaumik@charlotte.edu | <https://www.linkedin.com/in/kajaribhaumik/> | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with 6+ years of experience in analytics, data modeling, and ETL development. Proficient in SQL, Python, and BI tools (Power BI, Tableau). Adept at transforming complex data into actionable insights, optimizing processes, and enhancing decision-making. Experienced in cross-functional collaboration to drive business intelligence and operational efficiency

TECHNICAL SKILLS

• Programming:	SQL (PL/SQL, SparkSQL), Python, PySpark, R, SAS, Informatica
• BI & Data Visualization:	Power BI, Tableau, AWS QuickSight, Streamlit, DAX, KPI Tracking
• Databases & Data Warehousing:	RDBMS (MySQL, PostgreSQL), Snowflake, Redshift, BigQuery
• Data Analysis & Modeling:	Statistical Analysis, A/B Testing, Predictive Modeling, Machine Learning, Forecasting
• Data Modeling:	Star Schema, Snowflake Schema, Dimensional Modeling, DAX Measures
• Cloud & Big Data:	AWS (Redshift, S3, Glue), Hadoop, PySpark, SparkSQL
• Automation & Agile Tools:	Alteryx, Autosys, Git, JIRA, Process Automation, Confluence, Agile (Scrum, Kanban)
• Soft Skills:	Data Storytelling, Problem-Solving, Requirements Analysis, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Data Science Associate | September 2023 – December 2024

School of Data Science UNCC, Charlotte, NC

- Engineered advanced ETL pipelines processing financial and operational data across 7 departments
- Built self-service data models using SQL and Snowflake, enabling faculty and students to generate custom reports without IT intervention
- Optimized SQL queries using advanced indexing and partitioning, reducing dashboard refresh time by 40%
- Designed and developed Power BI dashboards to track KPIs and financials across 7 departments, improving resource allocation for \$2M+ funds
- Implemented data governance best practices, ensuring security and access control for BI reports
- Led ad-hoc data analysis projects, identifying key trends in student performance and providing actionable insights

Data Science Intern | August 2024 – December 2024

CDL Basketball Enterprise Inc., Bayville, NJ

- Developed Power BI dashboards to analyze 10,000+ basketball shots, identifying optimal shooting zones and improving performance analysis
- Implemented AI driven tools using computer vision and object detection to track basketball with 93% accuracy for performance analysis
- Integrated SQL analytics and computer vision models into BI dashboards, enabling seamless collaboration between analysts and coaches
- Improved query performance by 65% through optimized indexing and distributed system design

Senior Data Analyst | June 2019 – December 2022

Education Board of West Bengal, Kolkata, India

- Designed a fraud detection system for vendor payments using Python and advanced SQL, reducing irregular transactions by 35%
- Automated ETL data validation using advanced SQL (stored procedures, triggers), reducing errors and manual effort by 40%
- Built SQL-driven alert system to identify suspicious payment patterns across multiple vendor accounts

Data Analyst | February 2017 – May 2019

Education Board of West Bengal, Kolkata, India

- Developed ETL processes with Python and SQL, automating data collection and processing across 15 schools
- Performed comprehensive statistical analysis to identify critical risk factors, reducing girl student dropout rates by 30%
- Developed Tableau dashboards for student performance tracking and resource optimization for 10+ key programs
- Optimized \$2M resource allocation by automating year-over-year student performance reports with SQL and DAX measures in Power BI

EDUCATION

Master of Science in Data Science and Business Analytics | December 2024 | **GPA:** 4.0/4.0

University of North Carolina at Charlotte

Coursework: Data Mining, Machine Learning, Business Intelligence, Knowledge Discovery in Database, Cloud Computing

ACADEMIC PROJECTS

Enterprise-Scale ML Model Development (Finalist, Truist Bank Competition)

- Achieved **5th rank** out of 39 teams across 3 universities in prestigious modeling competition organized by **Truist Bank** ([LinkedIn](#))
- Designed efficient data preprocessing and model optimization pipeline for financial data analysis, achieving 84% ROC on [Kaggle submission](#)
- Presented findings and methodologies to industry experts, showcasing innovative model deployment strategies

Scalable Data Warehouse and Retail Analytics

- Engineered an ETL pipeline processing 31M+ transactions, integrating diverse data sources using Python, PostgreSQL and SQLAlchemy
- Built a scalable data warehouse for RFM analysis, cohort segmentation, and time-series forecasting to predict sales trends
- Designed Power BI dashboards with integrated SQL and DAX for real-time analytics
