SUMMARY

Results-driven Software Engineer with 3+ years of experience in cloud computing, microservices architecture, and distributed systems. Adept at designing and deploying fault-tolerant scalable microservices, optimizing system performance, and implementing cloud-based solutions. Experienced in leading high-impact projects, mentoring teams, collaborating with stakeholders, and driving cost-effective solutions that enhance operational efficiency.

TECHNICAL SKILLS

Languages: HTML, CSS, SQL, C, C++, C#, Java, JavaScript, TypeScript, Python, Spark
Frameworks: Spring Boot, React, Flask, Kafka, Hibernate, Hadoop (Big Data), Firebase
Developer Tools: Microsoft Azure (Azure Kubernetes Service, Azure Functions, Azure SQL), GCP, AWS, Git, Docker, Kubernetes, Terraform, Redis, RabbitMQ, PostgreSQL, MySQL, MongoDB, Maven, Elasticsearch, CI/CD, Linux, Swagger, Figma, JUnit, Mockito, Postman, Selenium

EXPERIENCE

- Student Technical Assistant**
The University of Texas at Arlington

Jun 2024 – Present
Arlington, TX

 - Redesigned the university's department website, improving structure, navigation, and user experience, resulting in a **30% increase in user engagement**.
 - Migrated websites from legacy systems to CampusPress, enhancing design interactivity and usability, which led to a **35% increase in user satisfaction** among faculty members.
- Software Engineer**
Tata Consultancy Services

Aug 2020 – Jun 2023
Bangalore, India

 - Developed and deployed RESTful APIs for microservices using Azure Kubernetes Service (AKS) to automate and optimize order consolidation by enabling centralized rule-based batching. This initiative led to a **20% cost reduction** and **40%-time savings**, significantly enhancing sales delivery efficiency.
 - Streamlined and digitalized the end-to-end process of a port-based warehouse by developing scalable warehouse management microservices. It facilitated real-time tracking and resulted in a remarkable **15% reduction in shipping errors**, enhancing operational efficiency.
 - Led Agile-driven initiatives to migrate services from on-premises to Azure Kubernetes Service (AKS) while **managing 5+ middleware systems**, ensuring scalability and resilience.
 - Developed and deployed automated log-monitoring solutions for mission-critical applications, **improving issue detection by 30%** and enhancing operational efficiency in a high-availability environment.
 - Spearheaded and managed a team for two consecutive years during high-traffic e-commerce sale periods, optimizing system reliability and ensuring **99.99%** uptime under peak loads.
 - Architected the foundational backend system for a sale monitoring dashboard, **delivering the Minimum Viable Product (MVP) in 3 months** to support real-time insights.
 - Implemented 10+ new features** in Efulfill, enhancing warehouse operations and improving order fulfillment efficiency by **25%**.
 - Automated CI/CD pipelines with Azure DevOps, **reducing deployment time by 50%**.

PROJECTS

- ShopSwift – E-Commerce Platform** | *HTML, CSS, JavaScript, Spring Boot, MySQL*

Jun 2024 – Aug 2024

 - Built a responsive and secure e-commerce platform **supporting 500+ concurrent users**, enabling seamless transactions for sellers to list products and buyers to make purchases effortlessly.
- Portfolio Website** | *React, HTML, CSS*

Dec 2024 – Jan 2025

 - Designed and developed a personal front-end portfolio website to showcase projects and skills, incorporating modern UI/UX principles and web development best practices for an engaging user experience and **improving page responsiveness across 100%** of tested screen sizes.
- Volunteer Management System** | *React, MySQL, Laravel, Node.js*

Jan 2024 – May 2024

 - Created a streamlined web platform for managing volunteers, automating user registration, graduate tracking, and administrative tasks to enhance program efficiency.
- Text Summarizer** | *Flask, GCP*

Aug 2023 – Nov 2023

 - Built an AI-driven text summarizer using the OpenAI API and cloud computing, achieving **90% accuracy in context-aware summarization**. Deployed on Google App Engine with secure API key management and **99.99% uptime**, efficiently handling thousands of requests.
 - Automated testing and deployment via CI/CD pipelines on Google Cloud Build, integrating real-time logging and push notifications using Google Pub/Sub for proactive system monitoring and performance optimization.

EDUCATION

- The University of Texas at Arlington**
Master of Science in Computer Science | GPA: 4.0

Aug 2023 – May 2025
Arlington, TX
- Sastra Deemed University**
Bachelor of Technology in Computer Science and Engineering

Jun 2016 – May 2020
Thanjavur, India
