DANIEL GARCIA

SUMMARY

Senior Software Engineer with 20+ years of expertise in software architecture, microservices, and cloud-native development. Proven leader in designing scalable RESTful APIs, driving DevOps practices, and mentoring engineering teams. Skilled in Azure/AWS, CI/CD pipelines, and performance optimization.

TECHNICAL SKILLS

- **Architecture & Design:** System Architecture, Microservices, RESTful API Design, Scalable Web Applications
- **Frontend:** Angular, React.js, Blazor, TypeScript, HTML5, CSS3, Responsive/UI Design
- **Backend & Cloud:** C#, .NET Core, Azure DevOps, CI/CD Pipelines, Agile/Scrum, Git, Docker
- **Data & Integration:** FME, ArcGIS, Survey123, Cityworks
- **Databases:** MySQL, CoreData, MS Server
- **Additional:** Python, PHP, Unity3D

Soft Skills

- Analytical and Problem-solving | Team Collaboration | Effective Communication

EDUCATION

- **Major:** Computer Information Systems
- **Achievement:** Best Senior Project Award

PERSONAL EXPERIENCE

Software Engineer SDI Presence (formerly Scientia Consulting Group),

Remote, Feb 2015 – Mar 2025

- **Challenge:** Monolithic Angular/.NET application hindered feature velocity.
Action: Led re-architecture into .NET Core microservices on Azure Functions and implemented Azure DevOps CI/CD.
Result: Accelerated release cadence by 50% and reduced deployment failures by 90%.
- **Challenge:** Lack of standardized code quality and testing practices across projects.
Action: Established code review guidelines, pair-programming sessions, and unit test coverage metrics.
Result: Boosted test coverage from 60% to 90% and cut production defects by 70%.
- **Challenge:** Need for cost-effective real-time communication for law enforcement.
Action: Architected and led development of a JavaScript/WebSockets audio streaming service.
Result: Saved \$250K annually by replacing third-party solutions (100% cost avoidance).

Mobile Engineer, Mavien, Remote, May 2014 – Nov 2014

- **Challenge:** Stakeholders required a functional mobile prototype under tight deadlines.
Action: Spearheaded end-to-end development of a JavaScript/HTML5 dating app with Facebook API integration.
Result: Delivered prototype 30% ahead of schedule, securing subsequent project funding.

Lead Software Engineer Age of Learning, Glendale, CA, Dec 2012 – May 2014

- **Challenge:** Legacy JavaScript codebase caused high bug rates and slowed releases.
Action: Led a cross-functional team of four to refactor into JavaScript/HTML, implement unit tests, and streamline workflows.
Result: Resolved 100% of high/medium-priority bugs, cut critical defects by 80%, and saved 200+ overtime hours.
- **Challenge:** Slow onboarding extended developer ramp-up to six weeks.
Action: Created a coding standards training program and mentorship materials.
Result: Reduced new-hire ramp-up time by 50%, accelerating project delivery.

SIGNIFICANT PROJECTS

- **Network Audio Streaming Radio:** Developed an economic solution for Santa Ana PD, saving around \$250,000.
- **Message Switch:** Instrumental in bug reduction and DOJ certification testing, ensuring app reliability and compliance.
- **ePCR:** Revolutionized fire personnel reporting with enhanced user interface and rapid input methodologies.
