

SHANKAR PRASAAD RAJAMANI

M: +1 (817) 937-7315 | E: prasaadshankar@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- Senior Data Engineer with Hands-on experience in Data Warehousing, SQL, ETL, Cloud, Python, Tableau and Excel.
- Certified Tableau Desktop Specialist with 9+ years of professional experience in Data and Business Analytics and Data Reporting.
- Strong knowledge in defining business processes and implementing data and ETL solutions.
- Collaborative team player with a strong commitment to enhancing system performance and delivering actionable insights for strategic decision-making.

TECHNICAL SKILLS

Languages: Python, SQL, HTML, JavaScript, jQuery

Tools: Databricks, Informatica PowerCenter, Control-M, Talend, Visual Studio, SSIS, SSMS, MS Excel, JIRA

Data Visualization: Tableau, Matplotlib, Seaborn, SSRS

Data Warehouse: Snowflake, Google BigQuery

Databases: Teradata, Oracle PL/SQL, SQL Server, PostgreSQL, MySQL

Cloud: Informatica IICS, Google Cloud Platform, Amazon S3, Amazon ECS

WORK EXPERIENCE

Senior Data Analyst | System Soft Technologies, Client: AT&T, Dallas, Texas

February 2024 - Present

- Analyzed existing on-prem Teradata data models to ensure desired business functionality in the new Snowflake cloud warehouse for AT&T's data modernization project.
- Developed SnowSQL queries to replicate Teradata tables, views, procedures, and other processes, ensuring uninterrupted business functionality during migration to Snowflake.
- Implemented data migration pipelines using Databricks to transfer and transform large datasets from Teradata warehouse to Snowflake, enhancing data accessibility and performance.
- Created shell scripts using Snow SQL CLI to extract data from Snowflake into CSV, JSON, Parquet and AVRO files for business teams.
- Conducted data proofing and data auditing using Databricks, ensuring data integrity and accuracy across large-scale datasets, reducing data errors by 50%.
- Performed ad-hoc data analysis to categorize customers based on their subscription duration with AT&T products, enabling the identification of loyal customers and targeted actions for payment defaulters.
- Conducted data wrangling on raw data from multiple source systems using SnowSQL and Databricks, ensuring clean and structured data for Power BI reports, resulting a 40% improvement in business decision making.

Senior Data Engineer | Wipro Limited, USA

June 2019 – January 2024

Client: Charles Schwab, Westlake, Texas

April 2021 – January 2024

- Owned the TD Ameritrade data integration project for Core Brokerage team and performed data integration testing for existing ETL process and data compatible testing in Teradata warehouse by developing test cases using Teradata SQL.
- Optimized existing ETL process in Informatica PowerCenter to handle high volume of data, reducing data loading time by 50% and enhancing overall system performance.
- Spearheaded the development and implementation of new ETL processes in the cloud for multiple large-scale data integration projects to achieve the company's goal of having a unified data platform in GCP BigQuery for both TD Ameritrade and Schwab data.
- Collaborated closely with cross-functional teams to grasp their specific data needs, offering data-driven recommendations tailored to their goals.
- Performed data profiling activities on various source systems required to define business and technical requirements.
- Supported Production issues for a legacy database by analyzing the root cause and providing fixes using Oracle SQL and Oracle PL/SQL.
- Performed impact analysis to identify all the schemas, tables and columns of client applications that use the legacy database using Oracle SQL and Oracle PL/SQL and analyzing ETL pipelines and UNIX scripts.

Senior Data Analyst | Client: Capital One, Plano, Texas

June 2019 – March 2021

- Created an automated reporting tool using Python framework to eliminate the manual reporting process in Excel which improved the team's productivity by 75%.

- Owned the data reporting and built comprehensive financial reports as Docker applications in Amazon ECS for the Sales and Origination team to identify and categorize loan applications based on the credit score which aided business decision making.
- Developed and optimized data metrics using SnowSQL that helped identify the auto loan defaulters for the Loan Servicing team at CapitalOne.
- Developed and automated data ingestion and transformation pipelines using Snowpipe, Streams and Tasks in Snowflake.
- Conducted an ad-hoc analysis to find out the Auto dealers payment authenticity which helped to identify the fraudulent auto dealers.
- Developed Customer credibility Tableau Dashboard reflecting key metrics of customers credit scores on loan and credit card payments improving Loan servicing team decision making by 50%.

Application Development Analyst | Accenture Solutions Private Ltd, India

November 2013–July 2017

- Worked as an Adobe Communiqué 5 or CQ5 developer (java-based content management system).
- Owned a new initiative to lead the migration of user data to Adobe Communiqué 5 websites which helped business to offer high-end digital experience to their customers.
- Implemented custom JavaScript and jQuery functionalities and created reusable solutions which improved the website performance.
- Worked as Functional Analyst to ensure the various CQ5 components functionalities of the website.

EDUCATION

University of Texas at Arlington, USA | Master's in Information Systems | GPA – 3.83/4

August 2017- May 2019

SASTRA University, India | Bachelor's in Information and Communication Technology

July 2009 - May 2013

CERTIFICATION

Tableau Desktop Specialist | Tableau

September 2024
