SUMMARY

- **SAP Consultant with 8+ years** of industry experience in SAP Implementation, customization, configuration and testing SAP Projects.
- Expertise in **SAP MM, SD**, with required knowledge of **SAP MDM(master data governance), F&R(forecasting & replenishment), FIORI modules**.
- Experience on **SAP ERP ECC 6.0** and **SAP S/4 HANA**.
- Experience of Configuration setup, customized solution deployments, solution documentations, GO-Live preparations, hyper care support.
- **SAP MM-PTP**: Handling procure to pay processes like procurement, inventory management, and material plannings. Majorly involved in Integration with SAP EWM/TM.
- **SAP SD-OTC**: Experience in OTC flows like-Sales order processing (receiving customer order and creating SO), pricing procedures, availability check, delivery and goods issues (picking packing posting of goods issue which integrated with MM), Billing and Invoicing, payment and processing
- Strong background in phases of SAP projects like gathering business requirements, analysis, preparing the business workflows, design & specification, documentation, and testing all test cycles.
- Subject Matter Expert for Test Cycles: Unit, Integration, Edge and Performance tests - pre and post deployment.
- Conducted different test cycles Unit, Integration SIT, FIT and UAT testing.
- Worked in the implementations and configurations of 3 complete SAP implementation lifecycles (**Green field /Brown field implementation**) both in Waterfall, Agile Methodology
- Experience with management skills, leading Large Onshore and Offshore team with End-to-End responsibilities.
- Experience with interacting directly with clients onsite, having diverse, multi disciplined business professionals and strong interpersonal skills.
- Excellent communicator with emphasis on meeting client with SAP requirements, capable of making professional presentations and quick learner with an ability to rapidly adapt to emerging technologies.
- Automated Testing :Performing a thorough unit, integration, and regression tests in the environment the defect is found
- Designed and implemented automation framework. Setting up selenium test environments such as selenium web driver, Maven integration, TestNG, Java, and Jenkins integration.
- Worked with **CI/CD pipelines** (Jenkins, GitHub Actions) to integrate Selenium tests of SAP module in the deployment process
- Good Interpersonal & Soft skills, positive attitude. Achievement oriented and performance driven with proper. Efficient in problem solving, coordination and problem analysis.

SKILLS SUMMARY

ERP Packages	SAP ECC 6.0, SAP R3, SAP HANA, SAP S/4 HANA, SAP Fiori
SAP Modules	SAP MM, SAP SD, SAP F&R, SAP MDM/MDG(master data)
SAP Processes	Supply chain management(SCM), Procure to Pay(P2P), Order to Cash(OTC), Logistics, Reverse logistics

Tools	SAP Solman(focused Build) ALM, JIRA, Azure (ADO), REQ, Selenium Webdriver, Jenkins, GitLab CI/CD, RestAssured
Office Software	MS Word, MS Excel. MS Powerpoint, MS Office Suite,
Operating Systems	Windows XP/7/10/11/NT
Active Certifications	SAP S4HANA Sourcing and Procurement

PROFESSIONAL EXPERIENCE

Client: | TCS

Jan 2025 - Present

Role: SAP Functional Consultant

Technology Stack: SAP S/4 HANA, SAP MM, SAP SD, Test Planning, Testing, Documentation

Responsibilities:

- Prepare and deliver **design proposal, solution proposals and presentations, assessing enhancement feasibilities** for business requirements etc.
- Closely worked with **business analysts, business users, and technical teams to understand business requirements** related to **procurement, inventory management, and material master data**.
- Translate these business requirements into functional test cases and test scripts.
- Verify that **SD processes integrate** correctly with other SAP modules like **MM, Finance (FI/),** and Production Planning (PP).
- Test Planning & Strategy: Involved in the test design of functional aspects of MM processes
- Conduct **end-to-end testing** to validate data flow between different modules and ensure seamless transactions.
- Work with the development team to ensure defects are prioritized and fixed. And prepare detail test report to track daily progress.
- Functional role : **Ensuring efficient flow of goods from raw materials** to finished products by optimizing **inventory levels, planning production schedules, and managing logistics** across the entire **supply chain**, all within the SAP system framework
- **Project Management:** Conducted Meetings like DSU, Defect triage, Daily test status check, Sprint review, lessons learnt sessions. Conducted Kick off sessions and Sign off Sessions at each test cycles. Managed reporting for the Project.

Client: Nobia AB-Sweden | Sweden, SE

Aug 2023 – December 2024

Role: SAP consultant in Supply Chain

SAP Functional at a global IT Services Company.

Project Description : Europe's leading kitchen specialist developing & selling kitchen solutions using latest digital technology to migrate over S/4HANA platform.

Technology Stack: SAP S/4 HANA, SAP MM, SAP SD, Azure Devops, IBM's Bluework live, ALM

Responsibilities:

- Functional consultant in Supply chain processes -**SAP MM, SAP SD (Procurement P2P, Order to Cash OTC, Inventory Management, Invoice Verification, Logistics & Reverse Logistics Execution).**
- End to end solution implementation for Nordics entities (Sweden, Finland and Denmark countries) § Organize customer workshop and end user training sessions § In charge of SAP functional configurations and participate in integration tests
- Key member in the senior team to understand and analyze business functionalities, solution proposals, functional specification preparation, solution deployment and perform testing.

§ Configuration setup, customized solution deployments, solution documentations, cutover activities.

- **Material management(MM)-PTP /Inventory Management(IM):** Majorly involved in the Procure to Pay(P2P/PTP) cycles. Implement and support logistics execution processes, such as **inbound and outbound delivery processing**. Starting from maintaining **material master and vendor master, PIR**, Creation and maintaining of **purchasing documents like PR, PO, goods receipt, and Invoice verification**. Inventory management-creation of **Stock transfer order (STO)**, Warehouse management processes (**inbound delivery IBD, Goods receipt**) and **stock movements**.
Sales and Distribution (**SD**)-**Order to Cash(OTC)** :Majorly executed the OTC processes flows like-**Sales order processing** (receiving **customer order** and **creating SO**), **availability check, Delivery** and **goods issues (picking packing posting of goods issue** which integrated with MM) ,**Billing** and **Invoicing, payment** and **processing** involving **SAP FI/FICO**.
- **Business Process Analysis and Optimization:** Strong background in gathering the business requirements, preparing business workflows, **design & specification documentation**, testing and training material. Defined **process workflow and business flow diagram** along with Process Area owner, Solution architects and cross stream functional in an IBM's platform know as Blue works live.
- **Customization:** Experience in **Customizing Application workflows**, which includes N levels of Approval processes.
- **Test Management:** Involved as a Quality assurance Lead for supply chain Area involving modules like **MTD(Make to Deploy)**, **PTP(Procure to pay)**, **FTS(Forecast to Sale)**.
- Managed a team as QA analyst Lead responsible for testing all Business E2E flows. **User Training and Support:** Design and deliver training programs for end-users to ensure effective utilization of **SAP system Landscape**.
- **Project Management:** Conducted Meetings like **DSU, Defect triage, Daily test status check, Sprint review, lessons learnt sessions**. Conducted **Kick off sessions** and **Sign off Sessions** at each test cycles. **Managed reporting for the Project**.
- Ensured continuous **UAT support** , and provided Post go live support thereby resolving their queries and providing expert guidance.

Client: Coop Sverige-Sweden | Sweden, SE

Dec 2020 –Aug 2023

Role: SAP MM,SD Functional consultant

SAP Functional in a Retail Company

Project Description :End To End S/4HANA implementation within its core business systems for digital business transformation in entire retail grocery industry across globe.

Technology Stack: SAP S/4 HANA, SAP ECC, SAP MM(SAP EWM/TM), SAP SD,SAP MDM, SAP F&R (Logistics),SAP FIORI

Responsibilities:

- **Material Management(MM)(SD):** Functional consultant(Material management) Retail domain, having well refined knowledge in different SAP modules involving the **P2P cycles**, cross functional knowledge in SAP **Logistics, SD (Sales and Distribution) ,FNR(forecasting and Replenishment)**, SAP FIORI expertise .
- Dealt functionally with MM settings, including **master data(MDG)**, procurement ,document types, release strategies. Setting up master data (both vendor and material) with the procurement processes. Involved for config of Purchasing docs(PR, PO, Contracts), **Movement type (GR/GI Transfers)** as per Coop's business.
- Configuration setup, customized solution deployments.
- **Master Data Governance(MDG)-** Setting up of basic master data in **MM-Material master**, sales org,setting up pricing and condition record, assigning loading function group, delivery plant, shipping conditions, **SD-Customer master**, pricing conditions, vendor master, defining partner functions.
- **SAP- MM (Logistics & Inventory Management):** Worked in Procurement Process- Purchase requisition, Purchase orders, good receipt, Invoice verification.
Configuration of **Company Code, Plant, Storage Location, Purchasing Organization**.
Assigning document types, **release strategies**, and number ranges.

- Managed to set the P2P process integration with SAP modules such as SAP SD and SAP FI, Warehouse management(EWM)
- Integrating the Logistics flow with **SAP EWM(Extended warehouse management) and SAP TM(transport management)**. Ensure **seamless stock transfer** between **MM and EWM**. Maintained storage locations, stock types, and material master integration. Mapping **MM storage locations with EWM** warehouse structures. Integrated **outbound deliveries** from **SAP MM** with **EWM**.
Define **picking strategies** (FIFO, LIFO, batch picking, wave picking)
Worked with **handling unit (HU)** management for packaging optimization.
Configured **packaging materials** and rules in **MM-EWM integration**
Ensuring **purchase order (PO)** deliveries are linked to **transportation planning**.
Defining **preferred transport modes (air, road, sea, rail)** based on materials.
- **SAP SD – OTC (Order to cash)**:Worked on the OTC processes of **Order creation**,(configuring sales order type),setting up **item categories**, defining and assigning **Pricing procedures**(customized according to business needs), defining different **price components**(base price, discount, tax),configuring **condition type**, access sequence, condition tables, setting up of **pricing determination rules** (based on customer, material, region). Defining delivery document types, assigning shipping points and shipping procedures based on plant, **loading group, payment procedure**, **SAP Workflow for order approval**, credit checks, and invoicing delivery and goods issues, Returns and Refund.
Configuring billing doc types and integrating the SD pricing with **MM (procurement pricing)** and **FI (billing)**.
- Responsible for **E2E solution design** of **reverse logistics** (Returns & Claims of customer goods) for societies of different models and external customers to fulfill retail requirements of returns and claims for DC supplied (put away) and vendor direct products.
- **Deployed UI5 Apps for Order processing**, Return and Claims Orders, Retail **Product Lookup** and Order creation in Mass tool.
- Involved In the Consignment, Subcontracting, Movement Types, Physical Inventory (IM, EWM).
- **Integration and Customization**: Designed and build a **custom order scheduling Tool** to manage day **basis sales in stores for Coop**.
- Designed custom solution for **shortage allocation and deliveries (outbound deliveries)** from warehouse to stores based on priorities of store across different locations.
- **Project Planning**: Collaborated with business analysts, developers, and cross functional consultants to define Test Cycles. contributed on proper project **planning, design, documentation** for SAP S/4HANA transformation Journey
- **Test Management**: Managed a team as QA analyst Lead responsible for testing all Business E2E flows. Managed **SFT, Regression, Integration Testing** involving diff Legacy and **end-to-end testing** to ensure quality standards were met through diff test cycles. Ensured continuous UAT support.
- **Project Success** : Majorly involved in the first go live of the first Coop central automated warehouse for fresh frozen dry goods in Eskilstuna, Sweden. The facility is now the hub of Coop's entire supply chain with deliveries to all **800 Coop stores**. The processes of de-palletizing, picking on pallets and pallet sorting, which are now fully automated with the help of robots. The degree of **automation is 95%**.
COOP Sweden SAP Implementation project €3M and was delivered in 10 months(expected 12 months).
The terminal has inbound and outbound deliveries of around 8,000 pallets per day. This means that the picking robots handle around 370,000 retail packs (B-pack) in one day.

Client: Ulta Beauty Inc | Kolkata , India

Feb 2020 – Nov 2020

Role: SAP Functional & Automation Test Analyst

Technology stack: SAP MM, SAP HRM

Responsibilities: SAP Functional Consultant.

- SD, MM, EWM, ABAP, IDOC Processing § Good understanding of both business process and technical development.
- Successfully automated more than 30+ use cases in short period of time.
- Problem fixes in the area of Retail Master data, Channel Execution, Procure to Pay.
- End to end automated solution (incident resolution / incident monitoring).

Client: Kingfisher Information technology | **Kolkata , India**

Jan 2019 – Jan 2020

Role: SAP Functional & Automation Test Analyst

Project Description: Leading home improvement company in UK and Europe

Technology stack: Selenium Web driver, Jenkins, SAP MM, SAP HRM

Responsibilities:

- SAP Functional on **SAP MM, HCM(HR) /FI Modules**. Played vital role in implementation of organizational structures, job roles, and personnel actions and supporting SAP Materials Management (MM) modules.
- Demonstrated expertise in **procurement, inventory management, invoice verification, and logistics execution., process optimization**, and providing user training and support
- Implement and support logistics execution processes, such as **inbound and outbound delivery processing**.
- Coordinate with cross-functional teams and external vendors to ensure seamless integration and project execution
- Ensured **Data migration and integration with other SAP modules** and third-party systems
- Identified test scenarios and define the scope of automated testing.
- Develop automated test scripts of SAP HR/MM/SD flows, using Selenium WebDriver . Integrated Automated tests with **CI/CD pipelines** using **Jenkins**
- Integration with **Automation Tools (UFT, Selenium): Auto-log defects based on script failures**
- **Monitoring Test Runs & Reports** through monitoring tools and Log: Analyzing execution history to identify recurring issues
- **Build of Pipelines using Selenium and SAP Fiori/UI5 automation** for web-based SAP modules of SP HR and Material management.
- Automated **UI interactions** like form filling, button clicks, dropdown selections, and alert handling.
- Dealt with challenges like SAP's dynamic object identifiers, modal pop-ups, and synchronization issues.
- Handled **SAP login, navigation, data entry, validation, and report extraction**.
- Familiarity **GitHub** for version control and collaboration development.

TCS Initial Learning Program(Training)| Gandhinagar, India

Sept 2018 – Dec 2018

Role: Assistant system Engineer

SAP ABAP-Learned SAP ABAP as a trainee in Initial learning program. **Technology stack:** SAP ABAP

Responsibilities:

- Code Optimization & Debugging :Learned to **debug and troubleshoot SAP system errors..**
- Developed **basic reports, forms, and database tables**.
- Enhancements & Modifications: Learn **User Exits, Customer Exits, BADI (Business Add-Ins), and Enhancements**.
- Data Migration & Interfaces: Worked with **BDC (Batch Data Communication), LSMW (Legacy System Migration Workbench**
- Understood Understand **IDOCs, BAPIs, and RFCs for system integration**
- Custom Report Development :Custom Report Development: Created **Interactive, and ALV Reports** using **ABAP List Viewer (ALV)**.
- Enhancing Standard SAP Functionality: Modify standard SAP processes without modifying the core SAP system.

Client: TATA CONSULTANCY SERVICES LTD | Kolkata , India

May 2017– August 2018

Role: Internship in SAP ABAP

Technology stack: SAP ABAP

Responsibilities:

- Code Optimization & Debugging: Practice Debugging and Writing Simple Programs in ABAP Editor (SE38). Use ABAP Debugger to troubleshoot program errors.
- Data Dictionary (DDIC) in ABAP: Create **Tables, Views, Data Elements, and Domains** (T-Code: **SE11**), **Structures, Data Elements, and Domains**. ABAP Reports Development: **Classical Reports** (Basic Output Reports). **Interactive Reports** (Drilldown Reporting). **ALV Reports** (Formatted Reports using ABAP List Viewer).
- Module Pool Programming (Dialog Programming): Create custom SAP screens with interactive user input.
- Forms Development: Work with SAP Script, **SmartForms**, for document printing.
- ABAP Open SQL & Database Interaction: Write SELECT, INSERT, UPDATE, DELETE Queries , Optimize SQL Performance with **Indexes & Joins**.
- Maintain **Indexes and Foreign Key Relationships** for database optimization.

EDUCATION

Bachelor of Technology in Electronics and Instrumentation Engineering | : Academy Of Technology, [MAKAUT]2018 India

- *Among Top Performers of the EIE: Academic Session 2014-2018*
