EDUCATION

Master of Computer Science,
University of Massachusetts Lowell

Coursework: Machine Learning, AI, Cloud Computing, Data Engineering, Databases, Algorithms, IoT, and Cybersecurity.

Lowell, MA
Aug 2022 – May 2024

Bachelor of Computer Science, Jawaharlal Nehru Technological University

Jul 2018 – Jun 2022

SKILLS

- **Programming & Scripting:** Python, SQL, Java, Scala, Bash
- **Big Data & Cloud:** Apache Spark, Hadoop, Kafka, AWS (Redshift, S3, Lambda, Glue), Azure (Databricks, Data Factory, Synapse), GCP (BigQuery)
- **ETL & Databases:** Airflow, Snowflake, PostgreSQL, MySQL, MongoDB, Oracle, Cassandra
- **Data Visualization & Modeling:** Power BI, Tableau, Star Schema, Snowflake Schema, OLAP, Dimensional Modeling
- **DevOps & Automation:** Docker, Kubernetes, Terraform, Jenkins, CI/CD Pipelines
- **Monitoring & Version Control:** Prometheus, Grafana, ELK Stack, Git, JIRA

EXPERIENCE

Data Engineer | Aramark, University of Massachusetts Lowell

Sep 2022 – May 2024

- Developed ETL pipelines leveraging **Azure Data Factory** for workflow automation, increasing efficiency by 60% using **Python** and **SQL**.
- Designed **Power BI dashboards** to track food trends, reducing waste by 20% and improving stock management.
- Integrated **Azure Blob Storage** and Synapse Analytics for optimized dining data storage and fast query processing.
- Automated reporting workflows with **Azure Logic Apps**, reducing manual tracking and boosting scheduling efficiency.
- Queried large dining datasets using **Azure SQL Data Warehouse** and **Python** scripts, ensuring accuracy in demand forecasting and budgeting.

Data Engineer | ADP

Jul 2021 – May 2022

- Engineered ETL workflows using **AWS Glue** for ingestion, **Apache Spark** for data transformation, and **Redshift** for analytics, optimizing payroll data processing by 40%.
- Improved **Snowflake** models to enhance analytics for 300+ stakeholders, increasing reporting accuracy by 35%.
- Developed **SQL-based** validation workflows to ensure data consistency and compliance, reducing errors.
- Configured **AWS CloudWatch dashboards** for real-time system monitoring and performance optimization.
- Deployed serverless workflows using **AWS Lambda** and **Python**, cutting operational costs by 25%.

Data Analyst Intern | ADP

Jul 2020 – Dec 2020

- Conducted **SQL-based analysis** with **AWS Athena**, improving decision-making for 15+ monthly business reports.
- Automated **data ingestion pipelines** with **AWS Glue**, reducing manual effort by 20%.
- Created **Tableau dashboards** for key performance metrics, improving reporting for 10+ stakeholders.
- Designed **DynamoDB** storage structures, enhancing data retrieval speed by 25%.
- Wrote **Python** scripts to extract, transform, and analyze payroll data, improving process automation.

PROJECTS

Enterprise Payroll Data Pipeline Optimization

- Developed a **high-performance ETL pipeline** using **Apache Spark**, **Databricks**, and **Snowflake**, improving payroll processing by 40%.
- Developed anomaly detection workflows with **Airflow**, ensuring system reliability and meeting payroll compliance standards.

Real-Time Sales Trend Analysis

- Designed a real-time sales analytics platform using **Kafka**, **Spark Streaming**, and **Snowflake**, tracking product trends and optimizing inventory decisions to reduce shortages by 20%.
- Built interactive **Power BI dashboards**, enabling sales teams to track performance and effectively forecast trends.

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

Certified System Administrator - ServiceNow

Data Engineering Foundations (LinkedIn Learning)
