ISTQB Advanced Test Automation Engineer Certified

Phone: 346 - 531 - 7765

Email: sreelakshmicp@gmail.com

Synopsis

High-Performing Senior Quality Assurance Professional with a Bachelor's degree in Computer Science from **Cochin University of Science And Technology** and **Post Graduate Diploma in Artificial Intelligence** from **Centennial College, Canada**. ISTQB Advanced Test Automation Engineer Certified, with expertise in TestAutomation framework development and maintenance, Test Management and Manual Testing for web applications within an Agile and Waterfall SDLC.

Summary of Qualifications

- Automation Test Engineer with over 7 years of experience in QA methodologies, development/execution of test plans, test cases and test scripts execution, and defect management.
- 7+ years of Experience in Automation testing using Selenium. Experience in designing and developing Automation Test Framework, executing, and maintaining automation scripts using Selenium WebDriver using Java and C# (Eclipse as IDE for Java and Visual Studio for C#), JavaScript, Automation Test Report integrating Extend Report, integrating Allure reports to Jenkin WebDriverIO framework.
- Strong Experience in Java programming, C# programming, Selenium WebDriver, frameworks such as TestNg, Cucumber and SpecFlow and in-depth knowledge in WebDriverIO JavaScript Testing framework including Mocha, Chai including Node js, Robot framework by conducting POC's.
- Experience in using various Methods (GET, POST, DELETE, PUT) in Restful API for automation and API Testing using POSTMAN.
- Experience working in an Agile Environment and having expert knowledge of Agile Methodologies and Ceremonies.
- Effective mentor for new QA team members and other stakeholders.
- Experience in working with different domains such as Utilities, Insurance and Banking.
- Thorough understanding of Software Development Life Cycle (SDLC) and Involved Test activities.
- Extensive experience in performing Functional, end-to-end, Smoke, Sanity, Regression and User Acceptance Testing, defect management using HP ALM, Azure DevOps, Microsoft TFS.
- Expertise of using SharePoint 2010 as document management tool to Share, Organize and Manage documents within and outside organization.
- Strong knowledge of writing queries to perform Database Testing.
- Strong knowledge of using VBA macros to automate the data management using Excel.
- Strong knowledge and expertise using Version Control Systems GitHub and Bitbucket.
- Superior analytical, troubleshooting, communication and presentation skill.
- Strong Knowledge of Machine Learning Algorithms, supervised learnings and Amazon Web Services, Web application development using HTML, CSS, JavaScript, NodeJS, Flask framework.

- Strong problem-solving, organizational, and time management skills along with an ability to perform under pressure, in fast-paced, individual and team-based environments.
-

Technical Skills

- Programming Languages : C#, Java, Python, VBA macros, SQL, JavaScript, HTML.
 - Test Automation Tools. : Selenium WebDriver, TestNg, Robot, Cucumber, SpecFlow, Postman, Visual Studio, VS Code, Maven, Extent Report, Apache POI, log4j, Nodejs, Mocha, Chai
 - Test Management Tools : Microsoft TFS, HP ALM, Azure DevOps, HP ALM, Jenkins.
 - Defect Tracking Tools. : HP ALM, Azure DevOps.
 - AWS Partner : AWS Cloud Practitioner Essentials • Operating Systems : Unix, Windows, macOS, iOS, Android.
 - Databases : MySQL, Microsoft SQL Server, Oracle, MySQL Workbench, DynamoDB
 - Source Control Systems : Git, Bitbucket.
 - Testing Skills : Functional Testing, Automation Testing, POM Framework, Data Driven framework, BDD framework, Database Testing, Regression Testing, API Testing, Agile Methodology, E2E Testing.
-

Work Experience

Senior QA Analyst

June 2022 to Sep 2024

TCS (BMO), Canada

Projects - Payment Processing Systems – Banking domain

Responsibilities:

- Participated in sprint planning meetings to define the effort estimation and prioritization of tasks to meet sprint commitment.
- Successfully implemented and maintained a robust automation test framework using TestNG and Cucumber.
- Utilized Git for version control, managing source code changes, and ensuring a collaborative and organized development process.
- Maintain /update automation scripts, raise pull request and participate in code review.
- Led a team of four automation engineers in designing, developing, and maintaining a comprehensive automation test framework using TestNG and Cucumber.
- Provided technical guidance and mentorship to team members, fostering a collaborative and high-performance work environment.
- Led the team in creating and managing JIRA tickets for project tasks.
- Maintain the test cases and logged the defects using HP ALM.
- Developed and executed strategic test plans, ensuring comprehensive test coverage for critical functionalities.
- Collaborated with cross-functional teams, including developers, product managers, and QA, to align testing efforts with project goals.
- Effectively managed resources, including task allocation, workload balancing, and performance evaluations.
- Performing Functional, Smoke, Regression, Exploratory, and Production Testing.
- Reporting defects and following through their resolution life cycle.

- Develop utilities to enhance the framework using Restful API and perform API testing using POSTMAN.
- Designed and developed Robot Framework Testing framework and integrated Allure report with Jenkins for generating and publishing comprehensive test reports as part of a proof-of-concept (POC).
- Develop testing tool using VBA macro for test data management.
- Understanding Project documents, customer demands, and product objectives to create and execute test cases.
- Participated in sprint demo and sprint retro meetings.
- Led the Defect Triage meetings involving Stakeholders.
- **Environment and tools used:** Windows, HP ALM, Chrome, Edge, Selenium WebDriver, Cucumber, POSTMAN, Bitbucket, Robot, Visual Studio Code Eclipse, Maven, SharePoint, VBA macros, Confluence, Jenkins, JIRA.

Machine Learning Developer – Intern

Jan 2022 – April 2022

Centennial College, Canada

Projects - Cloud Machine learning using AWS.

A full stack serverless intelligent enabled application” using cloud Artificial Intelligence (AI) services. The application will help address a real-world business problem that happens within the back-office processes of companies/organizations. The application is to make the task of populating the “Leads contact store” on the cloud much easier, by intelligently detecting the potential contact information from the business card.

Responsibilities:

- Develop an intelligent application using Chalice Framework, and HTML, CSS, JavaScript using front end.
- Integrated the application with the DynamoDB and AWS services such as S3 for storage AWS Boto3 for development toolkit, AWS Textract, AWS comprehend.
- Maintain /update code using GitHub, raise pull request and participate in code review.
- Performing Functional, Smoke, Regression, Exploratory, and Production Testing.
- **Environment and tools used:** Windows, AWS Services, HTML, CSS, JavaScript, GitHub, Python, Visual Studio Code.

QA Specialist (Automation Tester)

Sep 2015 – Dec 2021

Tata Consultancy Services (AmTrust), India Domain - Insurance

This project involves development of the insurance application on the top of .NET framework. Inbuild automation tool was used for maintaining the regression test cases. Azure DevOps was used as the Project Management tool.

Responsibilities:

- Own the design, development and maintenance SpecFlow BDD Framework using Extent Report in C# and NUnit.
- Automate Regression test cases and maintain existing automation test framework.
- Monitor, maintain, and provide reports for bug tracking and defect resolution to the team and IT management and to assist in process improvement in these areas.

- Participate in Agile ceremonies such as Sprint planning, daily scrum, backlog refinement, sprint retrospective meetings.
- Create test cases and execute test cases in Azure DevOps
- Implement cross-browser compatibility and achieve parallel execution using Selenium Grid.
- Worked closely with the Scrum Master and Product Owners.
- Defect reporting, tracking and verification in Azure.
- Follow the code review process by raising the merge request in git, following code guidelines, and git branching.
- Performed database testing to ensure data consistency on the back end by writing SQL queries.
- Participated in weekly QA Team meetings to discuss testing objectives and results. **Environment and tools used:** Windows, Excel VBA macro, Microsoft SQL Server 2016, Sharepoint, Chrome, Firefox, Edge, Visual Studio, Selenium WebDriver, NUnit. **Software Test Developer**

Tata Consultancy Services (Prudential), India

Domain – Insurance

This project involves development and testing of insurance application developed in Java. Initial proof of concept was done using Selenium Cucumber.

Responsibilities:

- Participated in requirement analysis and test case design and development.
- .Involved in building the test plan and test cases for the project.
- Design and develop WebDriverIO JavaScript Testing as part POC.
- Developed automation BDD Cucumber framework using selenium java and Page Object Model.
- Performed Sanity, Functional, end-to-end, Regression and User Acceptance Testing on the application.
- Provided consolidated status reports for defects and test case execution progress with respect to the plan. **Environment and tools used:** Windows, Azure DevOps, Chrome, IE, Selenium WebDriver, Cucumber framework, git, Java, Eclipse, Maven, JUnit, WebDriverIO.

QA Engineer

Tata Consultancy Services (Enbridge Gas), India Domain – Utility

This project involves development and testing of utility application developed on top of .NET framework. Team Foundation Server was used as the project management tool. The test cases are executed in the Team Foundation Server. Separate team was maintained for testing the data migration from the legacy application to the modern application.

Responsibilities:

- Participated in requirement analysis, test case design, test development and execution phases.
- Performing Functional, Smoke, Regression, Exploratory and UAT Testing.
- Reporting defects and following through their defect life cycle.
- Implemented different technique for test case design such as Boundary Value Analysis, Equivalence Partitioning.
- Performing Functional, Smoke, Regression, Exploratory, and Production Testing.
- Develop SQL queries as part of data migration testing.
- Develop testing tool using VBA macro for test data management.

- Contributed in developing new automation test cases and maintaining TestNG framework using selenium webdriver
 - **Environment and tools used:** Windows, Edge, Oracle SQL Developer, Chrome, Selenium WebDriver, TestNG framework, git, Java, Eclipse, Maven, TFS.
-

Education

Post Graduate Diploma in Artificial Intelligence

Jan 2021 to April 2022

Centennial College, Canada

Overall GPA: 8.4

Bachelor of Engineering in Computer Engineering

June 2011 to April 2015

Cochin University of Science and Technology

Overall GPA: 7.4

Certifications and Professional Development Courses

- AWS Partner: AWS Cloud Practitioner Essentials
- Applied Machine Learning: Algorithms, LinkedIn
- Learning Python (2020), LinkedIn
- Neural Networks and Convolutional Neural Networks Essential Training, LinkedIn
- Artificial Intelligence Foundations: Machine Learning, LinkedIn
- VSkill Certification in Selenium, INTELLIGENT COMMUNICATION SYSTEMS INDIA LIMITED
- Certification in Java, TestDom.
- Testing Concepts Assessment - E2, TCS Internal Curriculum
- Assurance: Test Automation Foundation, TCS Internal
- Process: Agile Way of Working Foundation, TCS Internal
- Udemy Certification – Cypress Automation testing
- ISTQB Advanced Test Automation Engineer Certified
