Professional Profile

Results driven Data Analyst with expertise in Power BI, SQL, Python, and Excel, skilled in data visualization, reporting, and statistical analysis. Adept at transforming complex datasets into actionable business insights and optimizing decision-making with analytics tools. Experienced in data entry, database management, and ensuring data accuracy for business operations. Strong communication and collaboration skills, bridging technical and business teams to drive efficiency.

Projects:

- **Designed and developed an interactive Power BI dashboard to visualize key metrics, leveraging advanced DAX functions, anomaly detection, and optimized data modeling for efficient decision-making.**
- **Analyzed customer data and generated quarterly business reports for New-Wheels in Excel and SQL, identifying key metrics and trends to address declining sales and improve customer satisfaction through targeted marketing and operational improvements.**
- **Conducted data analysis in Python and Power BI for FoodHub, a food aggregator app, to optimize customer experience and improve business operations by identifying restaurant demand patterns and delivery performance metrics.**

Professional Experiences

Dignity Health Data Analyst - Phoenix, AZ

January 2022 – December 2024

- Compiled and prepared patient assessment packets to ensure comprehensive data evaluation.
- Conducted data analysis using Excel, providing actionable insights and guidance for data-driven decision-making.
- Monitored and followed up on order tracking reports weekly, ensuring adherence to procedural guidelines; reprocessed unsigned orders and key documents as required.
- Led data-driven initiatives to engage with physicians and marketing staff, ensuring timely acquisition of signatures on orders, addendums, and other critical documents; prioritized the processing of unsigned orders older than 30 days.
- Managed and processed physician notifications efficiently, adhering to workflow and regulatory standards.
- Systematically received, processed, and archived all medical record documents according to standard operating procedures, maintaining the integrity of patient medical records.
- Prepared and distributed medical records in compliance with policy, ensuring prompt response to payer requests.

Allstate Insurance Data Analyst Specialist (Finance Department) - Cleveland, OH

July 2018 – December 2021

- Created comprehensive damage estimates for 1st and 3rd party material damage, leveraging data to ensure accurate assessments.
- Inspected damaged property, performed data analysis to complete estimates, and documented findings thoroughly.
- Worked toward claim resolution by ensuring regulatory compliance and adherence to fair claims practices.
- Analyzed and summarized claims exceeding authority limits, submitting detailed reports to management for approval.
- Identified potential subrogation and fraud referral opportunities through data analysis and referred cases.

- Possessed the skill set and ability to perform CAT (catastrophe) related duties, including necessary travel, by analyzing and managing data in high-pressure situations.
