

Sai Lokesh Reddy Gayam

San Francisco, CA | (510)-255-0650 | sailokeshreddyg@gmail.com | [Linkedin](#) | [Github](#)

SUMMARY

Full Stack Software Engineer with 2+ years of experience specializing in front-end (React.js, JavaScript) and back-end (Java, Spring Boot, Python) development. Proven track record in building scalable web applications, RESTful APIs, and managing both SQL and NoSQL databases

EDUCATION

California State University, East Bay

Masters in Computer Science

Hayward, CA

Aug 2023 – May 2025

CMR Institute of Technology

Bachelors of Technology, CS

Hyd, India

Aug 2018 – May 2022

EXPERIENCE

Software Engineer

WashMetrix

May 2024 – Present

San Francisco, CA

- Played a key role in developing a React-based web application for data analytics of car wash stations, achieving a 25% improvement in user engagement
- Developed frontend React components that used GraphQL and integrated backend RESTful APIs built using FastAPI and Python, reducing API response time by 30%
- Wrote SQL scripts to extract data from POS systems into our databases, improving data efficiency by 20%.
- Achieved 90% test coverage (Jest, Pytest), aligning with best practices for reliability and fault tolerance

Software Engineer 1

Zemoso Technologies Pvt. Ltd

Jan 2023 – Aug 2023

Hyderabad, India

- Integrated external APIs from industry giants like Amazon and QuickBooks, boosting software functionality and increasing user satisfaction by 20%.
- Specialized in ReactJS, Python, and Spring Boot, contributing to a 15% faster project delivery timeline by implementing modular and reusable code structures.
- Collaborated within cross-functional teams, ensuring timely completion of bootcamps and successful project delivery, achieving a 100% on-time delivery rate across all assigned projects.
- Conducted code reviews and mentored junior developers, improving overall code quality by 15% and fostering a culture of continuous learning.

Associate Software Engineer

Zemoso Technologies Pvt. Ltd

Nov 2021 – Dec 2022

Hyderabad, India

- Established a CI/CD pipeline, reducing development cycles by 40% and improving deployment frequency by 25%, allowing for faster feedback loops and quicker iterations
- Resolved issues with a 95% satisfaction rate, ensuring effective solutions and data security by adhering to Agile methodologies and software development lifecycle (SDLC) principles.

PROJECTS

AI-Powered Student Support System Using Gemini API | *Python, React, Gemini AI*

Nov 2024

- Built a cloud-based web app using React + Python for student support, integrating CI/CD pipelines
- Used Agile sprints to iterate quickly based on feedback, simulating production cycles.

NLP analysis of Restaurant reviews | *Scikit-learn, ML model training, Django, Git*

Apr 2021

- Developed an ML-powered review analyzer with full-stack deployment using Django and MongoDB.
- Practiced modular design and end-to-end testing to ensure scalable code structure.

TECHNICAL SKILLS

Programming: C, Python, Java, JavaScript, TypeScript, HTML5, CSS3

Databases: PostgreSQL, MongoDB, SQL, NoSQL Databases

Libraries/Frameworks: ReactJS, Node.js, FastAPI, GraphQL, Spring Boot, REST API, Pytest, Django, JUnit

Cloud Technologies: AWS, Kubernetes, CI/CD, Jenkins, Docker

Development Practices: Distributed Systems, Microservices, Agile, Software Development Life Cycle, Design Patterns.
