PROFILE SUMMARY

15 years of overall work experience with strong skillset as **Business Analyst** across **Insurance, Healthcare** and **Education** domain.

- Broad knowledge with various types of **SDLC** methodologies in an enterprise IT environment
- Proven **Agile** approach and **Scrum** mindset – “**SAFE Agilist**” certified
- Strong competencies in documenting **Epics, Features** and **User Stories** using scrum tools including **JIRA** and **Confluence**
- Extensive proficiency in **Client Relationship Management** – multiple assignments for client communication and presentation; extensive **stakeholder management** across business, product owners, development team and SMEs
- Deep involvement across the business requirement to delivery roadmap - requirement gathering, data analysis, scope definition, strategy formulation, solution implementation, user acceptance testing and quality assurance
- Wide geography exposure handling clientele across USA, UK, and South Africa

EMPLOYMENT HISTORY

Business Analyst at Tata Consultancy Services (2016-current)

Domain: Education

- Worked as an offshore Business Analyst; key responsibilities include requirement gathering, project planning, progress tracking, maintaining status report and sharing it with all the stakeholders
- Prepared high level business requirement documents, issue log, risk register, capacity planning
- Captured business as well as technical requirements in the form of user stories in JIRA
- Conducted brainstorming sessions with dev team to mitigate any understanding gap from requirement perspective and resolve project risks, roadblocks, and obstacles

Domain: Health Care

- Created project plans to fit all stakeholder / customer needs
- Managed project reporting, project reviews and project steering meetings; tracked project advancement through clear and concise status reports; proactively identified potential issues and took corrective actions
- Led all aspects of project management, including capacity planning, resource utilization, project documentation, stakeholder engagement, client feedback incorporation and change management
- Conducted brainstorming sessions with stakeholders and SMEs to prioritize different project modules and optimize resource allocation

Domain: Insurance Project 1

- Contributed in product backlog grooming with Product Owner, writing user stories and acceptance criteria
- Conducted all ceremonies of scrum, spring planning, sprint demo, sprint

retrospective

- Provided tactical management and leadership support to project teams, to ensure that the project proceeds within the agreed tolerances of time/budget and delivers a fit for purpose outcome to the customer
- Performed gap analysis between legacy and BaNCS static data structure
- Converted legacy structure to BaNCS format post data analysis and provided support for further technical resolution
- Partnered with QA team and SMEs to ensure adequate test coverage
- Contributed to the UAT phase to ensure coverage of all business cases

Domain – Insurance Project 2

- Worked as a senior UI developer in scrum team of 15 members for a migration project
- Performed strategic planning, effort, and cost estimation
- Acquired Service Level Agreement data and compiled monthly analytical reports

Technical Lead at Wipro Technologies (2008-2016)

Domain: Manufacturing

- Led onshore team of 10 members for delivering quote templates for BigMachines using Modusone at **Lexington, USA**
- Monitored customer satisfaction at all levels throughout project life cycle
- Analysed business requirement and developed technical specifications for system development
- Managed project risk by monitoring schedule and quality
- Spearheaded project single handedly from offshore by ensuring quality of deliverables as per agreed terms

Domain – Healthcare

- Formulated and implemented strategies for process improvement by bringing down SLA breach count
- Researched and documented existing and new processes for support team and interacted with business users and vendors to gather requirements for proposed system enhancement
- Mentored 15 new team members and enabled them for better efficiency

Domain: Energy & Utility

- Implemented new tools as value addition apart from client deliverables
- Enhanced project deliverables by executing all cut over and release management activities
- Delivered regular compliance reports to drive process improvement and corrective measures
