Summary

- 8+ years of specialization in Salesforce developing Apex Classes, Apex Triggers, Asynchronous Apex (Batch Apex), Visualforce pages, Lightning components, Lightning Web Components (LWC) and Web services enforcing best practices with excellent analytical, de-bugging skills, documentation skills good communication and Interpersonal Skills.
- Functional specialization in SFDC CRM with good understanding of Sales Cloud and Service Cloud, Health Cloud, Communities, Partner Relationship Management.
- Having knowledge on Salesforce CPQ (Configure, Pricing and Quote), Contract Management.
- Developed and maintained custom APEX classes, triggers, batch jobs, and asynchronous processing for CPQ automation.
- Built LWC components to enhance user experience within the Salesforce CPQ platform.
- Ensured optimal CPQ performance while adhering to Salesforce best practices and governor limits.
- Strong work experience in complete software development life cycle Agile methodology including Business interaction, Requirement Analysis, Software Architecture, Design, Development, Testing and Documentation phases.
- A team player with effective interpersonal and communication skills, adapt at building productive relationships and building rapport with a diverse set of individuals.
- Experienced in analyzing business requirements, Entity Relationship diagram and implementing them to Salesforce custom objects, Junction objects, master-detail relationships, and lookup relationships.
- Experienced in CRM processes like Sales, Marketing, Customer Service and Customer Support, Business Processes, and recommended solutions to improve their processes using SFDC.
- Monitored and approved configuration changes and architecture features to support business needs.
- Proficiency in SFDC Administrative tasks like creating Profiles, Roles, Users, Page Layouts, Email Services, Approvals, Flows, Workflows, Process Builders, Reports, Dashboards, Tasks, and actions.
- Experienced in Admin part of the salesforce, Giving right users to access to right objects and Tabs and Worked on the sharing rules to share the records to users.
- Implementation of Apex Triggers, Validation Rules, Duplication rules, Assignment Rules, Apex Class, Flows for automation of the business process.
- Extensive experience in data migration and integration using Data Loader.
- Hands on experience in deploying the components using Change sets, Copado and package.xml using Workbench.
- Tested the inbound API functionalities using Workbench & Expertise in dataload the data using workbench.
- Experienced in Service cloud implementing Web-to-Case and Email-to-Case.
- Experienced in web technologies like HTML, XML, CSS, JavaScript, REST API's.
- Experienced in writing Apex Test classes to achieve 75% code coverage before deploying the code to production.
- Expertise in APIs, REST API.
- Worked with third-party applications by integrating them with Salesforce like SAP, EBS, AWS, Dell Bhoomi.
- Experience and apply application architecture standards, procedures and best practices.
- Worked on Service Cloud Case Management, Email-To-Case, Case Assignment Rules, Case Escalation Rules and worked on Knowledge articles and placed them on the sites to make it available for users.
- Worked on Review the PR's and providing feedback, Worked on code scan issues for the code best practices.
- Implemented dynamic applications using custom metadata and custom labels.
- Translated the whole application to multiple languages using custom label translation.

- Worked on the Application development, including basic Visualforce pages/Lightning pages, Lightning Web Components, assist with each release cycle to implement and deploy new/updates to existing applications and code.
- Worked on Health cloud, created a Patient Enrolment Flow and integration to get the slots from other system and Complete registration process.
- Assignment of the Care coordinators and tracking the manufacturing of the products which will be stored in other system.
- Implemented a Retry framework mechanism for the failed callouts dynamically based on the custom metadata configuration.
- Implemented an Error log mechanism to track the salesforce errors while updating or creating the records from backend.
- Worked on the communities, implemented the lightning web components and customized the whole application.
- Routed the approvals to right business users based on the approval process and implemented dynamic assignment based on the discount of the products.
- Worked on Processing the Large set of data using asynchronous apex, Batch Apex.
- Experience in preparing Test plans, Test cases, Test scripts based on Business Requirements and Functional Requirements.
- Manage sprint backlog items, tasks and Scrum boards (physical or virtual)
- Coordinate all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Demos, Story Grooming, and Release Planning.
- Worked on the JIRA and COPADO on pipelining the sandboxes and branching strategies.
- Managed Salesforce deployments using Copado and Git-based CI/CD pipelines.
- Strong Experience on using the VS code for developing the code and to deploy the componens.
- Worked on the Fixing the critical bugs and Providing Root cause Analysis documents, Unit test documents and get it approved from business to deploy to PRODUCTION.

Technical Skills:

Customer Relationship Management (CRM)	SFDC CRM Cloud (Sales Cloud, Service Clouds, Experience Cloud, Health Cloud), Salesforce Classic & lightning Experience, Salesforce CPQ
Mobile Applications	Salesforce 1(Android and iOS) Mobile Apps
Tools	Visual Studio Code, Force.com Eclipse IDE, Data Loader, Workbench, Copado, JIRA
UI Development	Lightning Web Component (LWC), Aura, CSS, Visualforce Pages
Languages	HTML, Java Script and APEX, SOQL, SOSL

Education:

Bachelor's in engineering, JNTUK University, 2015, India.

Certifications:

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer I
- Salesforce Certified Sales Cloud Consultant
- Salesforce Certified Business Analyst
- Salesforce Certified AI Associate
- Salesforce Certified AI Specialist

Experience:

Diligent Force labs Private Limited
Infosys
Price Waterhouse Coopers

Jan 2017 – Feb 2021
Mar 2021 – Sep 2022
Sep 2022 – Jan 2025

Professional Experience

Kite Pharma (Price Waterhouse Coopers)
Salesforce Developer/ Lead

Sep 2022 – Jan 2025

Project Summary: Its an Health Cloud organization dedicated to curing the cancer for the patients, This project is used to help the care coordinators to schedule the patient visits to the hospitals and collect the blood samples from the patients and from that sample they will made cure out of it and then will inject back to the patients to cure.

Responsibilities:

- Managed development roadmap and cycle and triggered projects based on changing market/business priorities.
- Lead the delivery management process end-to-end from input from stakeholders, solutions design to deployment.
- Facilitated requirements gathering, investigated complex requirements and defined the scope of requirements
- Defined the data and sharing model for the different data and level of user within the organization
- Experience engaging with stakeholders at all levels of the organization, defining feature strategy and roadmaps
- Managed and mentored a team of developers, assigning tasks, and monitoring progress, providing feedback, and ensuring the team's overall success.
- Created a Portal for the patient Enrolment and implemented the custom flow to enroll and schedule an appointment for the patient to a hospital.
- Implemented Lightning Web Components (LWC) to capture the patient data and schedule information, Care Team Members, and Product information.
- Experience in working with Health cloud data schema.
- Experience with different connection protocols to update data and synchronous/asynchronous needs in Health Cloud.
- Created patient care plans to improve care administration to patients using Salesforce Health Cloud.
- Created custom objects, Visual Force pages, Apex Class, Apex triggers, validation rules to help track customer digital enrollment and lead qualification.
- Implemented several custom lightning web components (LWC) to enhance customer enrollment process flow and back-end server-side controllers to meet business requirements.
- Experience in working with Lightning web components (LWC).
- Experience in aura framework, Lightning Components and Salesforce Lightning Design System (SLDS).
- Created custom controllers implementing complex code for retrieval from Salesforce to VF pages.
- Created page layouts, search layouts to organize fields, custom links, related lists, and components on record pages.
- Designed and deployed Custom tabs, Custom Objects, Components, Visual Force Pages, validation rules, Approval Processes and Auto-Response Rules for automating business logic and data-modeling.
- Implemented a Apex Trigger based validation like how many enrollments can be done on single day to each specific hospital.
- Implementation of Apex Triggers, Apex Class for automation of the business process data modeling needs on Account, Contact, Opportunity, and Custom Objects.
- Created and maintained Reports and Dashboards to provide fast access to key business metrics.
- Customized Salesforce.com User Profiles by setting Standard and Custom objects layouts, Custom App, Field-level Security, Permission Sets for client services and marketing.
- Worked on different Sandboxes for development & testing; Involved in migrating the code to production instance in installments using Change Set and loading large volume of data using data loader
- Created data models and migration strategy for data extraction, transforming and loading
- Experience with integration with 3rd party services with various APIs

- Strong integration experience with SAML/OAUTH based identity platforms.
- Experience in creating and managing campaigns for lead generations on Sales Cloud.
- Created and deployed custom community using Experience cloud and setup knowledge articles
- Worked on the middleware (Salesforce Integration) to get the slots to salesforce and based on available slots we can enroll patient for specific date with patient consent.
- Assignment of the care coordinators and implemented an integration between EBS to track the manufacturing of the product for the patient where the manufacturing details will be stores in other EBS system.
- Implemented an ACM Flow where we need to collect a blood sample from the patient and will make a cure out of it and that will be injected back to the patient after manufacturing.
- Implemented a dynamic page where fields will be displayed from a metdata configuration, and we can define child records to make it a separate section and implemented validations on each page.
- Implemented an integration to import the Hospitals from EBS 3rd party system.
- Participating in Sprint Refinements, Planning and Retrospectives, Defined Sizing and solutions of stories every sprint.
- Worked on the community cloud and implemented LWC components and placed on the sites and worked on FLS.
- Worked on Integrations using REST APIs where manufacturing details will be stored in different system and logistics details will be stored in external system.
- Development of custom functionalities using LWC, Apex Triggers, Apex classes, Batch Apex.
- Mentored junior associates, helping them reach their full potential.
- Effectively managed multiple competing priorities while maintaining focus on delivering exceptional results for clients and the organization.
- Worked on the Flows to automate the business process.
- Implemented the Retry mechanism for the failed integration call to automatically retry dynamically based on the metadata configuration it is completely customisable by end users.
- Worked on providing the architectural design of customer requirement and split them into stories.
- Experience creating email templates using a marketing cloud email studio to meet customization needs from client.
- Experience of deployments in a marketing cloud environment to meet client needs.
- Created and implemented Apex test classes to ensure >75% code coverage
- Managed users, hierarchical roles, profiles, security controls and territory management.

Environment: Salesforce.com platform, Apex Language, LWC, Visual Force Pages, Aura Framework, Custom Lightning Component, Custom Controllers, Triggers, Batch Apex, Flows, Health Cloud, Workflow & Approvals, Custom Objects, Custom Tabs, Page Layouts, Email Alerts, Validation Rules, Reports and Dashboards, Visual Studio Code, JIRA, Copado.

W. L. Gore & Associates (Infosys)
Senior Associate

Mar 2021 – Sep 2022

Project Summary: Our client is one of the leading multinational manufacturing companies specializing in products derived from fluoropolymers in the US. Where the client has an E-store to sell their products and they used to maintain all the data in salesforce.

Responsibilities:

- Worked on salesforce applications where they managed Sales and maintain data in salesforce.
- As a lead developer, collaborated closely with stakeholders to gather requirements and translate them into effective Salesforce solutions tailored to their unique needs.
- Worked with Business System Analyst to provide recommendation and designed the Best Solutions for implementing new business ideas.
- Participated in Agile development processes, attending scrum meetings, and providing input on project progress.
- Implemented the Approval process and dynamically assigning the approval users based on Dynamic solution.
- Worked on the Sales Process and Lead conversions, Data Loader to import the Leads from the List provided by End users.

- Created many Lightning Components and server-side controllers to meet the business requirements.
- Having knowledge on Salesforce CPQ (Configure, Pricing and Quote), Contract Management.
- Developed and maintained custom APEX classes, triggers, batch jobs, and asynchronous processing for CPQ automation.
- Built LWC components to enhance user experience within the Salesforce CPQ platform.
- Ensured optimal CPQ performance while adhering to Salesforce best practices and governor limits.
- Created multiple Lightning Components, added CSS and Design Parameters that makes the Lightning component look and feel better. Leveraged APEX Controller to make logical decisions and displayed them on to the component.
- Extensively worked on salesforce reporting and created Reports, Dashboards, Custom report types as required.
- Experienced in Creating Roles, Profiles, Email Services, Page Layouts, Workflow Alerts and Actions, and Approval Workflow.
- Worked on the batch Apex that will run every year to check if there are any opportunities needs to be created for next year (Recursive opportunities) to continue the business.
- Implemented many Flows to automate the business as per the requirement.
- Development using Apex classes, Triggers, Flows, Batch Apex, Lightning development
- Achieved time savings for clients by automating repetitive tasks using Apex triggers and LWC
- Worked on the Batch classes and scheduled them daily to update the data that is coming from third party systems.
- Implemented an Error log mechanism to track the salesforce errors while updating or creating the records from backend. So, we can track the errors easily without debugging them.
- Created Custom Formula Fields, Field Dependencies, Validation Rules, Workflows, Approval Processes, Lightning Process Builder, Page layouts and search layouts.
- Implemented sharing rules, custom Apex sharing rules, manual record level sharing.
- Strong hands on experience using Dataloader and other data migration tools
- Experience in evaluating application performance and understanding of governor limits
- Integrated Salesforce.com with external systems like SAP using REST API.
- Visual Force Pages using Standard Controllers, Custom Controllers, Extension Controllers & Web Services API. Creating new User Interface using JavaScript, HTML and CSS in Visual Force Pages.
- In Service Cloud worked on Case Assignment Rules to direct the case to appropriate group such as Stories & PCS Central Support.
- Implemented Case Escalation Rules to escalate to different Queues based on the case aging.
- Case Management by Configuring Email-to-Case for the end user to submit a case through Outlook.
- Created and configured Email templates which were used by PCS Central users for approval processes and other field updates.

Environment: Salesforce.com, Apex Classes, Controllers, Triggers, Visual force, Force.com, Dashboards, Sales Cloud, Service Cloud, Data Migration, Workflow & Approvals, Validation rules, Case Assignment Rules, Case Escalation Rules, Email-To-Case, Aura framework, Data Loader, Change Sets, Java Ant, Custom Reports and Dashboards, Visual Studio Code, JIRA.

NeoPhotonics Corporation (Diligent Force labs Private Limited)
Salesforce Developer

Jan 2017 – Feb 2021

Project Summary: The company developed, manufactured and sold optoelectronic products that transmit, receive and switch high speed digital optical signals for communications networks.

Responsibilities:

- As a salesforce developer, worked on the sales cloud business process. Converting leads to opportunities and contact and account.
- Defined a separate record type for each business process and created a path flow for each record type.
- Worked on creating page layouts for each record type and lightning pages.

- Created dynamic visual force pages, apex classes, triggers, workflows, validation rules, email templates for various functional needs in the application.
- Designed and developed SFA based Application on Force.com Platform in Salesforce.com environment with Apex programming language at backend and Visual-Force pages as user interface.
- Worked on the Visualforce Pages for the UI and used standard apex controllers to get the data from the backend.
- Worked on the Lightning Migration, Transformed the whole application to Aura Components.
- Implemented many Aura Components as per the business requirement.
- Worked on the Sales Cloud business process, implemented approval process, Customized the approval process to add extra approval step and customized the page to display the approval history.
- Worked on Configurations like defining OWD, Creating Custom objects, Custom fields, profiles, Roles, FLS, Validation Rules, Field sets, Page Layouts, Lightning Pages.
- Created custom controllers implementing complex code for retrieval from Salesforce to VF pages. Wrote SOQL and SOSL statements within custom controllers, extensions, and triggers.
- Experience in using HTML, CSS, and JavaScript Libraries in Visualforce pages.
- Experience configuration and customization of Salesforce Sales Cloud.
- Built databases and table structures for web applications.
- Developed uniform custom pages using lightning to display the required records which helps to build and send surveys.
- Data migration using Apex Data Loader and DataLoader.io.
- UI Designing using SLDS Lightning style.
- Implemented security best practices within application development protecting sensitive client data.
- Developed uniform custom pages using lightning to display the required records which will help to build and send surveys.
- Having knowledge on Salesforce CPQ (Configure, Pricing and Quote), Contract Management.
- Developed and maintained custom APEX classes, triggers, batch jobs, and asynchronous processing for CPQ automation.
- Built LWC components to enhance user experience within the Salesforce CPQ platform.
- Worked on the Batch Apex, Process Builders, Workflow Field updates, Email deliverability.
- Implemented Email-To-Case and Case assignment Rules in Service Cloud.
- Experience setting up permissions, OWD, sharing rules, field level security based on specific business requirements
- Experience setup login access policies, single sign-on and multifactor authentication using Authenticator app
- Worked on CRM Platform environment of SFDC Sales Cloud, Service Cloud.
- Used SOQL, SOSL for data manipulation needs of the application using platform database objects.
- Used data loader for insert, update, and bulk import or export of data from salesforce.com objects.
- Development of Apex Triggers, Apex Class, Flows for automation of the business process.
- Worked on REST API, and process the data in the form of XML to store in salesforce standard & Custom objects as per the requirement.
- Experience in working with Visualforce pages and aura components.
- Experience in creating the page layouts, sections, custom buttons, standard button overrides, custom links, approval processes, custom objects, custom fields, custom Tabs.
- Worked on the OWD, profile permissions, Field level security, Tabs permissions and sharing Rules, custom sharing Rules and Apex sharing Rules, Permission Sets.
- Experience in implementing the Test classes with proper assert statements and coding best practices.
- Worked on Bug fixes and deployed as emergency release
- Worked on providing the design documents and unit test documents before deploying the stories on JIRA.

Environment: Salesforce.com platform, Apex Language, Visual Force Pages, Aura Framework (Aura Components), Sales Cloud, Service Cloud, Custom Controllers, Triggers, Workflow & Approvals, Custom Objects, Custom Tabs, Page Layouts, Email Alerts, Reports and Dashboards, Visual Studio Code, JIRA, Copado.
