EDUCATION

Georgia Institute of Technology

Aug 2021 – Dec 2024

Bachelor of Science, Computer Science

Atlanta, GA

- **Concentrations:** Intelligence & People
- **Clubs:** CS + Social Good, Women @ College of Computing, WebDev, Campus Kitchens
- **Relevant Coursework:** Object-Oriented Programming, Data Structure and Algorithms, Discrete Math, Objects and Design, Computer Organization and Programming, Information Visualization, Design and Analysis of Algorithms, Intro to Artificial Intelligence, Knowledge-Based Artificial Intelligence, Intro to Computer Vision, Automata and Complexity Theory, User Interface Design

SKILLS

- **Programming:** Java, HTML, CSS, JavaScript (ReactJS, Node.js), React Native, Python, MongoDB, GraphQL
- **Software:** Git, Figma, Microsoft Office, Android Studio, Circuit Sim
- **Languages:** English, French, Arabic

EXPERIENCE

Undergraduate Researcher Team Lead | VIP @ Georgia Tech

Jan – Dec 2024

- Led a sub-team of 6 members in developing the Reflect! platform, which facilitates collaborative problem-solving on societal issues such as AI ethics and climate engineering.
- Designed and implemented interactive work plans and modules that guided teams through activities using ReactJS and GraphQL, improving user experience in navigating complex discussions and proposals.
- Managed team tasks using Agile methodologies, communicated progress to faculty advisors, and ensured project milestones were met on time.

Software Engineer Intern | EV Geeks

May – Aug 2024

- Developed and maintained backend services for an EV charging management platform using Java.
- Implemented RESTful APIs to handle charging station data, user sessions, and billing information.
- Optimized database queries with JPA & Hibernate to improve system performance.
- Designed a real-time event processing module using Java & Apache Kafka to track charger status, energy consumption, and error logs.
- Implemented WebSocket-based notifications for live charger updates in the user dashboard.
- Wrote JUnit & Mockito test cases to ensure code reliability and maintainability.

App Developer | Georgia Tech Capstone

Aug 2023 – May 2024

- Worked in a team of six to create Rate My Song, an interactive music review app that provides live feedback to up-and-coming artists, inspired by TikTok's music livestreams.
- Implemented both frontend (React Native) and backend (Node.js) features, facilitating smooth client-server communication and real-time updates.
- Conducted user research through surveys, interviews, and observations, gathering insights from musicians and music reviewers to refine the app's features and improve user engagement.

Engagement Leader | CS + Social Good

Apr 2022 – Dec 2023

- Led efforts to connect students with opportunities at the intersection of technology and social impact, developing a network of professionals and students involved in social good within corporate, non-profit, and research sectors.
- Organized and hosted events, including tactical workshops and panel discussions featuring local entrepreneurs and researchers, to foster community engagement in socially impactful tech.

Web Developer | GT WebDev

Jan – May 2022

- Collaborated in a team of five to design and build the web platform Megaphone that helps users find and organize local protests, increasing engagement in social activism.
- Developed core components using ReactJS, Node.js, and MongoDB, ensuring scalability and user-friendly interface design.
